

Submitter: Daniel Mitchell

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: HB4130

The corporate practice of medicine is destroying healthcare quality. Business managers are making medical decisions that affect quality medicine like what should be tested preoperatively even though the managers have no medical back ground. One of the worse effects of big business involvement is production pressures that cause medical mistakes and the next is hiring personal that staff areas of the hospital that are not appropriately qualified.
