

Submitter: Sunil Kini

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: HB4130

I strongly favor ANY and ALL restrictions on the corporate practice of medicine by non-physicians and non-physician entities. Corporate interests favor profits over patients every single time. They do little to help physicians and this in turn hurts patients. One example is Prenuvo. They operate in California and several other states in the country and are guilty of unethical and illegal behavior in their operations ranging from false and misleading advertisement to superceding individual physician judgement encouraging all radiologists to recommend expensive follow up testing regardless if the follow-up testing is based on scientific evidence or is otherwise clinically indicated for each individual patient. This is HORROBLE for the practice of medicine in this country.
