

Submitter: Samantha Schneider

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

As a physician who has previously practiced for corporate medicine and started my own private independent practice, I know firsthand the difference between corporate practice of medicine and independence. Corporate medicine negatively impacts patient health outcomes, quality of care and contributes to moral injury seen amongst physicians in medicine. The goal of corporate medicine is profit for investors which can be in direct opposition to the physicians goal of providing high quality care. Please keep medicine in the hands of physicians who know what is best for patients and not wall street which just looks to profit.
