

Submitter: Linda Tran
On Behalf Of:
Committee: Senate Committee On Rules
Measure: HB4130

As an elected government official, it is your duty to protect the general public. Allowing corporations more control over medicine would put profit over patients medical needs. Corporations meddling in medicine has contributed to consolidation and hurting care while saddling doctors and nurses with bigger workloads and patients with heftier bills. We have seen what medicine has become since 2020 and now more than ever, we have to make it right. We must advocate for the social change we need in this country.
