

Submitter: Leslie Poston

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

Corporations and monopolies work against the public good and against public health in favor of profit margins and have no place in our health care system. That a monopoly owned by a billionaire, like Amazon, would get into healthcare while allowing their warehouse workers to die on the floor (literally) is case in point as to why this is a terrible idea. I support keeping corporate interests out of our healthcare.
