

Submitter: kathleen Hill  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB4130

People spend many years and a lot of money becoming healthcare practitioners. They are the experts on what is best for a patient's health. To have an insurance company or non-medical panel determine what I need to stay healthy is disgusting. They are centered on profit only, and the continued use of such a system makes being a doctor or nurse prohibitive, in part because their liability insurance rates are so high. Cut corporations out of healthcare decisions.
