Committee: House Committee On Rules
Measure: SB1583

Climate Change is about fear mongering and removing people from the earth. <https://twitter.com/TomANelson/status/1740356736643400074> Podcast with Tom Nelson who has 15,000 followers for the college textbook we published for environmental science. Make 2024 the year for planting native trees and shrubs. 25 ppm of fraud in the NOAA carbon dioxide rise. More than 50 PhD's at NOAA have been fired. https://cctruth.org/NOAA_Mauna.pdf The extremists prosecuting this law have quite clearly not understood that their climate change narrative is all about fear-Mongering and removing people from the earth. Every year they recycle the ad below, which of course never comes to pass and never will. Nonetheless, it has a powerful impact on the willfully uninformed.

As you may know, the key figures perpetuating these lies are all the familiar suspects. Bill Gates, Klaus Schwab, George Soros, and now Jane Goodall, are advocating for a drastic reduction in the world's population by 2030. I know that sounds extreme, but please watch this video before it's taken down.
