

Submitter: Zenia Kuzma  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB4026

Please do not place barriers on voters to make their own decisions and initiatives. The ability to direct their future is the keystone to democracy. Voters live in communities not corporations. One size fits all legislative policies that dictate local land use results in

Voter apathy, a fragmented community and elitism. It gives developers a blank slate without regard to wildlife habitat, water resources and existing infrastructure. Developers cannot and do not vote, people do. Do not take that democratic process away. The ability to impact change by voters is a power guaranteed by our constitution. Thank you.
