

Submitter: Kathleen Johnson

On Behalf Of:

Committee: House Committee On Rules

Measure: SB1583

Ethnic studies are not necessary in our schools. Most younger children don't even see the differences between races. They look at each other through pure eyes. By introducing this unnecessary information to them only causes them to form prejudices and divide them. Please don't let this bill become a law. It is detrimental for our society and individuals. Soon, no parent will want their children in the Oregon public schools. I know if I had young children in my home now, I would definitely find a way to remove them from this school system, even if it meant moving out of state.
