

Submitter: Susan Nicholson

On Behalf Of:

Committee: House Committee On Rules

Measure: SB1583

Parents, grandparents and community members need to have input on the curriculum and reading materials that are used and allowed in classrooms. There is a difference between “banning” books and choosing books that are age appropriate and avoid sexually explicit content. It is not the schools place to be indoctrinating children into alternate sexual orientations. And it is and will always be inappropriate for children to see or read material that most parents view as pornography.
