

Submitter: Daryl Rothenbucher

On Behalf Of:

Committee: House Committee On Rules

Measure: SB1583

As a parent of a student in Oregon I oppose HB 1583. This bill restricts local school boards from directing curriculum in schools. It is the job of the School Board, voted on

by each community, to oversee and approve any material presented to students in that

community. This bill will further separate parent control over their children, and prevent

their voices from being heard.

The purpose of public education is to teach basic learning fundamentals: READING, WRITING, and MATHEMATICS, subjects in which our state is among the worst ranked

in the country. Regardless of political affiliation, until that humiliating fact is remedied, these subjects are the sole areas our schools, boards, faculty's, and politicians should

be focused.

Please VOTE NO on HB 1583
