BACKGROUND:

The Public Employees Retirement System (PERS) provides retirement benefits for state agencies and approximately 900 units of local government. PERS is overseen by a five-member board that appoints an executive director to manage the agency's daily operations, including the management of benefits for more than 393,000 active, inactive, and retired members and beneficiaries.

In 2023, the Legislative Assembly enacted House Bill 2283. HB 2283 created modified ORS 238.450 to allow PERS to lock member data from employer changes after the date when the member is no longer able to challenge the data. Existing law provides specified exceptions that allow an employer to make changes to locked employment data, such as because of a notice of entitlement dispute.

When determining length of service for retirement credit for some employees, PERS may need to assess whether the employee performed service for a "major fraction of a month." Presently, this term is not defined in statute.

ORS 238A.010 is a statute crediting employees with 40 hours of service for each calendar week unless an employer reports otherwise. This statute was used when retirement credit was based on a pro rata share of 2080 hours in a year. PERS now relies on employer reporting for determining retirement credit.

Senate Bill 851 modifies statutory provisions relating to employer reporting and raises the maximum amount the Public Employment Retirement Board is permitted to waive recovery of for payments made to persons not entitled to receive from overpayments or improperly made payments.
