Transportation Funding Needs

Sufficient and reliable funding needs for on-road multimodal maintenance services, agency operations and safety

Introduction

Oregon has benefited from a foundation of transportation funding paid by users across the state. Unfortunately, the primary funding mechanism, the gas tax, is eroding. And while our funding erodes, the need remains and continues to grow. Seismic vulnerability, lack of multimodal options, congestion, deferred maintenance — and a sharp increase in crashes, serious injuries and fatalities — threaten Oregon’s residents, visitors, businesses and the state overall.

We know what it takes to build roads that serve as the backbone for thriving communities and rural destinations; multimodal connections that foster safe and healthy travel; interstates that bring Oregon’s goods to markets all over the world; and a statewide transit system that carries Oregonians where they need to go. However, Oregon’s transportation funding structure today can’t maintain what we already have, let alone make the improvements we know we need to make, to keep our transportation system and infrastructure assets from becoming liabilities.

Oregon’s transportation system works best when we keep our roads, bike lanes, and sidewalks open and safe for travel, and our communities clean and livable. This document identifies the transportation funding needs for the Oregon Department of Transportation.

The focus of this document is on operations, maintenance and safety needs that are eligible for State Highway Fund investments. Needs are based on the goal to ensure our transportation system serves people, grows the economy, and improves Oregon’s future. A summary of needs is shown on Table 1 on the next page and described in this document.

The needs described in the table and this document are for ODOT-only State Highway Fund eligible investments. Local and other transportation funding needs exist but are not estimated in this document.

Table 1: Summary of ODOT State Highway Transportation Funding Needs for Service Functions and Safety

Service	Estimated Annual Need	Annual Funding Gap
Service Functions		
Maintenance	\$ 450 million	\$ 205 million
DMV	\$ 170 million	\$ 50 million
Commerce and Compliance	\$ 60 million	\$ 25 million
Agency Operations	\$ 450 million	\$ 170 million
Safety System Investments		
Preservation	\$ 1,250 million	\$ 980 million
Programmatic and Systemic Safety Investments	\$ 200 million	\$ 145 million
Safe Routes to School Infrastructure	\$ 50 million	\$ 35 million
On-Road Bicycle and Pedestrian Network	\$ 135 million	\$ 115 million
Great Streets Program	\$ 65 million	\$ 45 million
On-Road Freight Investments	\$ 12 million	\$ 8 million
TOTAL	\$2,842,000,000	\$1,778,000,000
Fulfilling HB 2017 Commitments		
I-5 Rose Quarter	\$ 1,500 - \$1,900 million	\$ 900 - \$ 1,300 million
I-205 Improvements	\$ 1,450 - \$1,550 million	\$ 1,250 - \$ 1,350 million
TOTAL	\$ 2,950 - \$3,450 million	\$ 2,150 - \$ 2,650 million

Funding Challenges

Transportation agencies across Oregon, including ODOT, are facing a structural revenue challenges. Fuels tax revenues have flattened and are on track to decline. At the same time, we are seeing record inflation. Funding that is available is directed towards specific uses, leaving many core services like maintenance and operations grossly underfunded. Some of the key funding challenges are described more below.

Fuels Tax Revenue Decline

In Oregon, gas tax is combined with fees on drivers, vehicles, and trucks to form the State Highway Fund. The average driver spends about \$160 per year in Oregon gas tax and also pays an annual vehicle registration fee that varies by vehicle fuel efficiency. State Highway Fund dollars are distributed to transportation agencies across the state.

Oregon's fleet of passenger vehicles is 21% more efficient than 15 years ago. And within a decade, virtually every new car sold in Oregon will be electric according to rules adopted by the Oregon Department of Environmental Quality. This switch to EVs will help reduce greenhouse gas emissions from transportation by about 60% below 1990 levels over the next 25 years and, under our current system, will significantly reduce funding for maintaining and operating the transportation system.

Fuels tax revenue is declining.

Rigid Fee Structure

Driver and motor vehicle fees collected by the DMV contribute to the State Highway Fund. However, about 75% of fees paid to DMV go to local governments, state highway projects, and other programs—to the point that the fees DMV is allowed to retain no longer cover the cost of doing business. While HB 2017 (2017) raised title and registration fees, less than 3% of this additional revenue went to highway maintenance—and none of it was retained by the DMV to cover their cost of serving customers. For example, the average title fee for a passenger car today is \$101. Of that, only \$10 goes to DMV for the cost of providing the service, yet it costs the agency \$27 to provide that service.

Rise of Record Inflation

Oregon's gas tax and fees on drivers, vehicles, and trucks don't increase with inflation. Each year, the purchasing power of existing revenues decline. Since 2017, the National Highway Construction Cost Index has increased by over 80%. ODOT is also seeing its costs for day-to-day maintenance go up. Equipment costs have gone up about 25% over the past four years alone. The costs of dump trucks have increased from \$231,000 in 2013 to \$342,000 in 2023—a 48% increase, and we have about 400 in our fleet at any given time. Half ton pickups have increased from \$30,000 to \$56,000—an 86% increase. Paint costs about 30% more than it did four years ago, and ODOT buys over a hundred thousand gallons a year.

Reliance on Few Sources of Revenue

Oregon has traditionally applied a "user pays" principle to funding our transportation system. Revenue for maintenance and operations is raised primarily from the gas tax and fees on drivers, vehicles, and trucks. While other taxes and fees exist, they don't contribute to ongoing maintenance and operations of the transportation system.

Underfunding the transportation system is not a challenge unique to Oregon. However, other states often also use revenue from sales taxes, property taxes, or tolling. Twenty-four states and the District of Columbia have a variable-rate gas tax that adjusts with inflation or prices. Oregon does not use inflation-resistant funding mechanisms, so increases in inflation and declines in fuel use have a comparatively greater impact to our transportation revenue, and will continue to do so into the future.

Investment Needs

Service Functions are ODOT's core services. They comprise both the most visible portions of the agency in our Maintenance, DMV, and Commerce and Compliance Divisions and the less visible portions of the agency like HR, IT, and Finance, which help keep the agency running. Costs have continued to rise while investments made from transportation packages over the last 20 years have largely neglected this portion of the agency. These services are funded almost exclusively with the State Highway Fund, as federal dollars can't be used for most of these purposes.

Safety System Investments are those that specifically target eliminating fatalities and serious injuries. Safety is a top priority for ODOT and nearly every dollar spent has a safety benefit. However, traffic deaths are increasing in Oregon and nationally. More focused investments and efforts are needed, which are described later in this section.

Service Functions

Billions of dollars flow through ODOT every year but the amount available for road maintenance and agency operations is a small fraction. It is also constrained by state and federal law, and relies too heavily on a declining source.

ODOT's Legislatively Adopted Budget for the 2023-2025 biennium is \$6.3 billion. Of this, \$2.7 billion are federal funds, which generally can't be used for maintenance and agency operations, and over \$700 million are dedicated to transit, Connect Oregon, passenger rail, and other activities.

That leaves the State Highway Fund as the source ODOT relies on to cover almost all costs of day-to-day maintenance and agency operations. For the 2023-25 biennium we project the State Highway Fund will take in \$3.5 billion in total revenue.

Under state law, before we can pay for maintenance, ODOT first has to transfer funds to other agencies and local governments, cover the cost of collecting the revenue, pay debt service for bonds the Legislature authorized, and dedicate funds to construction programs as directed in HB 1717 (2017). That leaves \$370 million per year available for maintenance and agency operations (e.g. IT, HR, and finance) that are critical to carrying out the agency's mission. That's about 20% of the total State Highway Fund (or about 10% of total funds coming into the agency). That number has remained flat in recent years, even as total State Highway Fund revenue has increased, because the majority of the new money from HB 1717 was directed by the legislature to construction programs.

The highway maintenance portion of the budget approved by the Legislature for the 2023-2025 biennium is \$631 million. This includes 1,328 total staff positions for the maintenance program, with about 100 of those currently held vacant for budget savings. The Legislatively Adopted Budget reduced ODOT’s maintenance budget by \$30 million from our current service levels due to inadequate funds. On top of that, we are reducing the maintenance budget by another \$39 million, for a total reduction of \$68 million in this two-year cycle to stay within our available resources. The Legislature provided \$39 million to offset maintenance reductions for specific uses, but it still leaves the maintenance budget about \$29 million short — a cut of about 5% compared to the amount needed to maintain the current service level from last biennium.

Cuts in the 2025-2027 biennium are projected to be even more dramatic based on revenue estimates. Current projections indicate planned spending would need to be reduced by \$350 million to \$400 million in that timeframe. This would result in reduced service levels for clearing crashes, plowing snow, patching pavement, and removing litter and graffiti. There would also be longer wait times for DMV and other customers and less ability to address safety risks.

Maintenance and Operations Funding Needs

Maintenance and operations encompasses the activities associated with repairing existing transportation infrastructure and keeping the highway system open and functional. ODOT staff are responsible for about 8,000 miles of roads and 2,700 bridges across the state. Significant staffing resources, equipment, materials and supplies are needed to efficiently and effectively carry out maintenance and operations services. Maintenance, performed primarily by ODOT crews, includes everything from painting centerlines, plowing snow, patching potholes, fixing guardrails, responding to crashes, replacing stop signs, repairing damage from severe weather events, and communicating every day with the public. Maintenance does not include activities intended to enhance existing transportation infrastructure, nor can it but supported with federal funds, except in limited cases.

Maintenance and operations include both proactive and reactive activities:

- **Proactive activities** are planned to keep the system in good condition. Examples include sealing pavement cracks, cleaning drainage systems, and maintaining roadside vegetation. These actions all prevent deterioration of the highway system and reduce safety risks. Prolonging the life of these assets is significantly more cost effective than reacting to infrastructure failures that are often the result of deferred maintenance.

Maintenance work helps us identify and mitigate small issues before they become big problems.

- **Reactive maintenance work** responds to incidents or weather to correct an immediate problem. Examples include responding to and repairing damage from a crash, repairing a landslide, and plowing snow and sanding/deicing the roadway.

Maintenance work helps us identify and mitigate small issues before they become big problems, saving us money down the road and helping reduce our overall risk, not to mention increasing the day to day safety for Oregonians.

ODOT Maintenance and Operations needs around \$205 million per year in additional investment to keep up with inflation, meet the needs of today's transportation system, and ensure the resources are available to retain our capabilities into the future (Table 2).

Table 2: Annual Funding Needed to Bring Maintenance Back to 2017-2019 Service Levels and Address Needs

Total Investment Area Need	\$205,000,000*
Restore services lost due to inflation & budget cuts	\$121,100,000
Road, Bridge and Traffic Maintenance	\$ 38,000,000
Emergency Repairs	\$ 1,200,000
Responding to Incidents	\$ 2,200,000
Clean Up: Camp, Graffiti & Litter	\$ 10,800,000
Fleet, Fuels, Materials, Supplies & Equipment	\$ 18,000,000
Operational Support	\$ 3,900,000
Wireless Communications	\$ 7,100,000
Facilities Maintenance	\$ 2,800,000

*Rounded to the nearest million

Beyond the impacts of inflation and rising costs, additional investment is needed in the following:

- **Capabilities.** This includes the supporting equipment, facilities and systems necessary to deliver the maintenance and operations programs. Investment in this category will:
 - o Restore funding needed to maintain the operational effectiveness of staff.
 - o Replace equipment and vehicles in a reasonable timeframe to avoid high repair costs.
 - o Replace current maintenance software systems that are beyond service life and lack modern capabilities. For example, ODOT is one of the few state DOTs that lacks a modern maintenance management system, and a system to track permits for highway system use or access.

- **Direct services and systems.** Public demands of the transportation system are changing. Investment in this category will:
 - o Maintain active transportation features, like separated bike lanes, multi-use paths, and enhanced pedestrian crossings.
 - o Provide additional dedicated incident response capabilities to clear incidents more quickly and reduce congestion.
 - o Meet the increased demand for graffiti, litter, and camp clean up.
 - o Meet the safety and communication needs of ODOT and Oregon State Police by replacing all land-based radios; they were purchased under the state radio project over a decade ago and are now reaching end of life.
- **Climate Impacts.** Weather extremes have resulted in more frequent and severe emergency events, leading to road closures and increased agency response and repair costs. On average, ODOT is spending an additional \$18 million every five years on these events. Extreme weather and climate impacts have also emphasized the need for more proactive investment in culvert maintenance, addressing unstable slopes to protect against landslides, and hazard tree management along our highways. Every \$1 spent on proactive resilience saves an estimated \$6 in repairs, but little dedicated funding exists to proactively invest.

DMV Service Funding Needs

As the face of state government, DMV staff provide a direct personal connection with millions of customers each year. Today's DMV has about the same number of employees than it did 20 years ago. Meanwhile Oregon's population has grown by 20% over the same period. In addition, DMV is a significant fee collector that funds the transportation sector. In the 2021-2023 biennium DMV collected about \$1.2 billion, yet was allowed to use only about 25% of that for operations. The other 75% went to state, county, and city roads, transit, passenger rail, and more. The amount DMV was allowed to keep, \$302 million, was less than the cost to operate the DMV — \$306 million. That means DMV requires a subsidy from other parts of the State Highway Fund, and this gap is going to grow over time as costs go up and fees are set at flat rates. To better serve people in Oregon with greater speed, quality, and convenience, DMV requires additional staffing and systems.

Additional customer-facing staff would allow for full staffing at available counters, shorten wait times for customers, and ensure that offices don't have to close due to staffing issues — a regular problem with today's constrained staffing.

The number of DMV employees is about the same as 20 years ago despite Oregon's population growth.

DMV's Customer Contact/Call Center, which takes 1.1 million customer contacts a year, needs resources to answer calls, provide a call-back option, and offer web chat for a modern, efficient, customer-focused experience.

Funding for new mobile DMV services will allow DMV staff to bring their services directly to customers, such as people who lack access to physical DMV locations or are unable to access online services.

In total these improvements would require about \$50 million per year in additional investments, adjusted for inflation.

Commerce and Compliance Funding Needs

The Commerce and Compliance Division (CCD) promotes a safe, efficient, and responsible commercial transportation industry by ensuring that commercial vehicles (freight trucks) traveling across Oregon's transportation system are compliant with all safety regulations. CCD also registers commercial vehicles in Oregon and collects appropriate road usage charges. The number of trucks and motor carrier accounts has grown significantly since 2019. Prior to 2019, CCD maintained about 25,000 accounts with about 250,000 vehicles in our tax enrollment program. Today, the number of accounts is above 60,000 and the number of vehicles enrolled in the tax program is over 600,000. At the same time, staffing levels have been reduced.

To effectively manage this growing responsibility, CCD needs new systems that both provide customer self-service options and can expand the managed accounts. The increase in customers and vehicles will also require additional roadside equipment to manage the increased traffic flows. While the division collects taxes and fees that cover operating costs, increased investments are needed for services and infrastructure.

In total CCD needs approximately \$60 million per year to maintain customer service offerings and roadside infrastructure, with an annual gap of about \$25 million. Increased funding would allow for programmatic needs to be met over the next 20 years, including: modernizing the IT systems for tax, registration and roadside enforcement; modernizing truck weigh stations and safety inspection facilities along major highways; and increasing staffing levels to provide sustainable customer service to the industry.

While the Commerce and Compliance Division collects taxes and fees that cover operating costs, increased investments are needed for services and infrastructure.

Agency Operations Funding Needs

Agency operations encompasses the administrative functions of the agency, portions of our planning and project delivery groups that don't charge their costs directly to projects, funding for IT improvements, and facilities maintenance, repair, and construction. The total annual need for these activities is \$450 million and the current gap is \$170 million.

A significant portion of the funding gap (\$85 million) can be attributed to maintenance, repair, and construction of facilities. ODOT owns 1,179 buildings comprising approximately 3.1 million gross square feet of space. That includes office buildings, maintenance shops, warehouses, residential facilities, and other building types. Funding to maintain and replace these facilities has been sporadic and insufficient. Of the remaining gap, approximately \$15 million is needed to support and modernize several IT systems and improve security. Funding would allow ODOT to retain critical staff and expertise, improve agency delivery mechanisms, and support the programs and projects underway throughout the agency.

Agency operations includes the administrative functions of ODOT.

Safety System Investments

Fatalities and serious injuries are on the rise in Oregon and throughout the U.S. In 2023, 586 people died on Oregon's roads. Safety is foundational to ODOT, but our current investment and approach to safety is not enough to combat the issues, such as impaired driving, speeding, and distracted driving. The Oregon Transportation Plan focuses on eliminating fatalities and serious injuries through a "Safe System" approach. Implementing the Safe System framework moves us closer to increasing road safety, including safer roads, safer people, and safer speeds.

The categories below are some of the key investments that can be made to further safety and are eligible for State Highway Funds.

The Safe System approach.

Preservation Funding Needs

The Preservation Program repairs and replaces existing bridge, pavement, culvert and signal infrastructure to ensure long term performance. Many of these assets (such as bridges) were constructed over the last century and are reaching the end of their service life. Preserving these assets to a "State of Good Repair" means that we can manage the entire life cycle of an asset. This program is currently federally funded at \$270 million (when adjusted for inflation).

As ODOT is currently funded, our bridge, pavement, culvert and signal assets are deteriorating faster than we can repair and replace them. For example, with current funding it would take us about 50 years to

As currently funded, our bridge, pavement, culvert and signal assets are deteriorating faster than we can repair and replace them.

pave all the roads in the state system: well outside our needed paving cycle. Current funding will also force us to stop all non-interstate paving after 2027.

Similarly, for our 2,700 bridges, the current repair and replacement cycle is 900 years. Bridges are typically constructed for 50-to-100-year life spans. The failure to adequately preserve this infrastructure means these assets become potential liabilities, closed to heavy trucks.

The present federal funding represents about 22% of the funds needed to preserve these assets to a State of Good Repair. To reach 100% State of Good Repair, \$1.25 billion per year in total investment is needed. For bridges alone, \$1.25 billion would replace about 1% (27 total) and rehabilitate about 3% (81 total) of our bridges annually, across all routes, assuring the bridge life cycle across our system is 100 years instead of 900 years. For pavement preservation, investing in the State of Good Repair preserves safe, smooth conditions for higher speed routes and prevents a backlog of roads in the worst condition.

For traffic signal systems, obsolete equipment needs to be replaced as well as electronics on a regular cycle to prevent failures of the systems and reduce downtime to maintain operational safety. Culvert investments rely on a combination of investment in maintenance and operations as well as preservation – this is a risk management choice. The goal is to reduce culvert failures, decrease the number of culverts beyond their design life, and provide replacements that address climate resiliency.

ODOT needs an additional \$980 million annually — beyond the federal funding — to preserve our bridge, pavement, culvert and signal assets. This breaks down to \$485 million for bridges, \$330 million for pavement, \$55 million for signals and \$110 million for culverts. This does not include bridges that fall in the mega-project scale (due to cost, technical complexity, environmental permitting, community impact, etc.) which would include end of life replacement for bridges on major river crossings (such as the I-5 Boone Bridge over the Willamette River) and historic coastal bridges. Roughly 5% of ODOT’s bridges on the system fall into this latter category and would require separate funding.

Programmatic and Systemic Safety Investments Funding Needs

Investments in this category are focused on reducing fatalities and serious injuries through dedicated funding programs or systemic investments that provide safer roads.

Address Locations with High Traffic Deaths, focusing on some of the most dangerous locations in the state. Today's dedicated funding for the All Roads Transportation Safety Program (ARTS) addresses the safety needs at the highest crash locations regardless of jurisdiction (state highway, county road, or city street). Needs total about 300% of available funding annually. These additional needs could be met with an increase in funding of \$60 million more per year. An additional \$40 million could support maintenance and small enhancements, and more expensive proven safety countermeasures, like roundabouts, statewide. The total annual funding gap for this category is \$100 million.

Wildlife Crossings help to prevent animal-vehicle collisions. Each year, there are over 7,000 wildlife-vehicle collisions in Oregon; on average, four people die and 521 people are seriously injured in those collisions. There is no dedicated federal or state funding source to reduce wildlife-vehicle collisions, despite a recent state law meant to reduce these types of collisions (HB 2834 in 2019). An investment of \$5 million per year would enable the construction of an additional 20 wildlife fencing and structure projects over the next 30 years.

Pedestrian Crossing fatalities have drastically increased in recent years. The most critical crosswalk safety issues have been identified and a minimum of \$9 million per year is needed to address deficiencies at existing marked crosswalks. Broader improvements to pedestrian safety would require an additional \$115 million per year to add more crosswalks and reach desired spacing frequency. This is not currently captured in Table 1 or Table 3 summary of needs.

Road Safety Audits are used to identify and fund safety components as part of other DOT projects. There is a need to expand and stabilize ODOT's program, including staff to review project scopes and funding to add the safety enhancements to project budgets. An investment of \$30 million per year would be needed to ensure safety is integrated into project design for a broader range of investments.

Speed Limit Setting involves the investigation, review and approval of speed limit reductions. By adding \$1 million per year for ODOT's speed zoning program, speed limits can be analyzed for 80 additional corridors annually.

Overall, the increased investments needed to address locations with high traffic deaths, add wildlife and pedestrian crossings, conduct road safety audits and set speed limits totals an additional \$145 million per year.

A minimum of \$9 million per year is needed to address deficiencies at marked crosswalks.

Safe Routes to School Infrastructure Funding Needs

Few schools in Oregon are accessible by continuous walkways, bikeways, or safe crossings. Safe Routes to School (SRTS) fills in gaps in walking and biking infrastructure and makes it safer for kids to travel to and from school. Oregon's current SRTS infrastructure program (\$15 million per year provided by HB 2017) is oversubscribed by about 2.5:1, and high schools are now eligible, adding to the funding issue. An additional investment of about \$32 million per year should complete safe connections to kindergarten-8th grade schools in the next 30 years, allowing students use walkways or bikeways to access education. To support project development, local assistance, and administrative support, an additional \$3 million per year is needed, making the total increase needed for SRTS \$35 million.

On-Road Bicycle and Pedestrian Funding Needs

Oregon's walking and biking network is incomplete. Within communities, sidewalks may be located on only one side of the street or missing altogether. Bike lanes exist on some roads but are rarely continuous in a way that people can take them from origin to destination. People are less safe when they are forced to walk or bike on the street without facilities to protect them. Biking and walking are often the only option for people to reach critical services.

With today's funding it will take over 150 years to complete the biking and walking system along ODOT's roads. An additional \$115 million per year would allow for the completion of the network in about 30 years. This kind of transformative investment would support Oregonians to make safer, healthier and more environmentally friendly travel choices, reducing emissions and congestion.

Great Streets Program Funding Needs

ODOT's Great Streets program addresses multiple corridor needs within a single project. It enables a more holistic approach, focusing on safety, equity, and climate. The Great Streets program can fund features such as a curb ramps, sidewalk gaps, crossings, and traffic signals as part of a single project. It supports complete streets and corridors as well as state roads that may eventually be transferred to local jurisdictions.

The Great Streets program launched in 2022 with an annual investment of around \$8.3 million. Given the popularity and success of the program, funding is set to increase to just over \$20 million annually in 2027. An infusion of \$45 million each year would enable investments in higher-cost safety needs to get to safer streets, safer people, and safer speeds.

Safe Routes to School fills in gaps in walking and biking infrastructure.

On Road Freight Funding Needs

One of the most significant safety issues for freight trucks is adequate parking. Truck drivers are required to park and rest at regular intervals. However, nearly all rest areas along Oregon's interstates lack adequate capacity and truck parking statewide is deficient. A total additional investment of \$51 million, annualized to \$2 million for 30 years, would support increased parking at five rest areas and enable technology for drivers to plan ahead, ensuring drivers can rest when required and be alert on the road. There are also critical safety needs for rail lines that cross roads. Improvements are needed for warning systems, barriers, and separations. With a total additional investment of \$180 million, annualized to \$6 million per year for 30 years, grade separation could be added at six intersections and crossing signals could be added or upgraded across the state. The total additional freight safety needs for on-road investments total \$8 million per year.

Fulfilling HB 2017 Commitments

Funding gaps remain for two major Portland-area investments identified in HB 2017 (2017), including the I-5 Rose Quarter Improvement Project and I-205 Improvements Project.

I-5 Rose Quarter Improvement Project Funding Needs

ODOT was directed by the Oregon Legislature to address congestion on I-5 at the Rose Quarter. Working together with community leaders, the project addresses the state's top bottleneck and one of the worst freight bottlenecks in the country while also creating new community space with the construction of a highway cover that will help knit together the Albina community.

ODOT was recently awarded a \$450 million grant from USDOT under the Reconnecting Communities and Neighborhoods grant program to build the initial, central portion of the project's highway cover. ODOT is currently applying for a \$750 million federal grant under the INFRA program (with up to \$250 million in state matching funds), to complete construction of the project's highway cover, build safety and operational improvements on the I-5 mainline, and construct the separated bicycle

I-5 at the Rose Quarter.

and pedestrian bridge over I-5. With current funding committed, ODOT estimates an additional \$900 million - \$1,300 million is needed to complete full project construction. This does not include a potential INFRA award nor associated state matching funds.

I-205 Improvements Project

Construction of Phase 1 (Abernethy Bridge) began in 2022, with financing tools provided by the legislature and the expectation that toll revenue would ultimately be used to payback short-term funding sources. Phase 1 will likely cost around \$750 million, though a precise final cost estimate is still under development. There is currently \$200 million in available resources for this initial phase.

Members of the Joint Committee on Transportation requested the total cost for I-205, which would include a second phase. Phase 2 would add a northbound and southbound third lane between Stafford Road and OR 213, replace the Tualatin River Bridges, seismically upgrade or replace all overcrossings, and add needed soundwalls. Phase 2 is expected to cost \$700-\$800 million and is currently unfunded. Design for this phase reached 60% in the fourth quarter of 2023 and has not advanced further.

With current funding committed, ODOT estimates an additional \$1.25 - \$1.35 billion is needed to complete full project construction.

Summary of Investment Needs

Table 3, on the following page, shows a summary of the funding needs described above and inflated over time.

Phase 1 of the I-205 improvements is underway with the Abernethy Bridge construction.

Table 3: Annual Funding Gap for ODOT Service Functions and State Highway Fund Safety System Investments

<i>Values rounded as appropriate</i>	Current Annual Funding Total Need	Current Annual Funding Gap	Annual Funding Gap over next 10 years	Annual Funding Gap over next 20 Years	Outcomes
Service Functions					
Maintenance	\$450,000,000	\$205,000,000	\$290,000,000	\$400,000,000	Maintains the existing system baselined to the 2017-2019 budget before cuts. Adds costs associated with historically unfunded work such as a rise in incident response, operations and maintenance of stormwater treatment facilities, maintenance of separated bike and pedestrian facilities and graffiti, litter and camp clean up.
DMV	\$170,000,000	\$50,000,000	\$80,000,000	\$130,000,000	Increases front line staff to decrease wait times and keep offices open. Increases staffing and system upgrades at the customer contact center to provide a more efficient customer experience. Setup mobile DMV services to meet customers where they are.
Commerce and Compliance	\$60,000,000	\$25,000,000	\$40,000,000	\$50,000,000	Updates legacy tax, registration and roadside enforcement systems to enable connectivity with modern systems and trucking technology. Increases staffing to provide more timely auditing of registration and tax filings as well as increase CCD's roadside service to carriers.
Agency Operations	\$450,000,000	\$170,000,000	\$210,000,000	\$250,000,000	Restores reduced support levels in HR, Finance, and Procurement. Replace legacy IT systems along with other security IT investments. Makes facility investments for needed improvements. Maintains existing assets.
Safety System Investments					
Preservation	\$1,250,000,000	\$980,000,000	\$1,180,000,000	\$1,400,000,000	Repairs and replaces the upfront investment in our transportation system assets to ensure infrastructure is operational long term. Ensures that pavement, bridges, signals and culverts are being repaired and replaced within their design lifecycle, to prevent deterioration of the system resulting in reduced safety and operations. For example, this means that we are replacing our 2700 bridges on a 100 year cycle instead of a 900 year cycle.
Programmatic and Systemic Safety Investments	\$200,000,000	\$145,000,000	\$175,000,000	\$205,000,000	Gets to backlog of funding for high-fatality sites and allows for systemic investments in large-scale safety improvements like roundabouts. Implements a new road safety audit program to add safety to more projects. Builds around 20 wildlife crossing or fencing projects over next 20 years to reduce animal-vehicle collisions. Addresses crosswalk deficiencies. Does not increase the number and frequency of crosswalks to desired spacing identified in guidance, which would be an additional \$115M annually. Supports efforts to set lower speed limits on roads.
Safe Routes to School Infrastructure	\$50,000,000	\$35,000,000	\$40,000,000	\$50,000,000	Tripled the existing SRTS infrastructure grant program, which is currently oversubscribed about 2.5:1. Supports safe connections for K-8 grade schools in the next 30 years. Additional schools are now eligible, which will increase demand for the program. Also provides project development, local assistance, and administrative support.
On-Road Bicycle and Pedestrian Network	\$135,000,000	\$115,000,000	\$140,000,000	\$160,000,000	Completes gaps in walkways and bikeways on state roads within urban areas within 30 years instead of over 150 years. Addresses existing deficiencies.
Great Streets Program	\$65,000,000	\$45,000,000	\$50,000,000	\$60,000,000	Supports improvements to state roads where multiple high priority needs overlap to support safer, more climate friendly and equitable outcomes. It looks at funding the holistic needs within a corridor or community. With this additional infusion, larger-scale safety and other investments could be made simultaneously.
On-Road Freight Investments	\$12,000,000	\$8,000,000	\$10,000,000	\$11,000,000	Focuses on freight safety by increasing truck parking along major interstates in Oregon, and making rail-road crossings safer. Does not include needs for freight truck efficiency.
Fulfilling HB 2017 Commitments					
I-5 Rose Quarter	\$1,500-\$1,900M	\$900 million - \$1,300 million total			Complete the HB 2017 Rose Quarter project
I-205 Improvements	\$1,450-\$1,550M	\$1,250 million - \$1,350 million total			Complete the HB 2017 improvement on I-205

Potential Structural Funding Solutions

Oregon is not alone in its pursuit of a modern transportation funding system. However, Oregon is somewhat unique in terms of its constitutional framework, historical distributions, and potential new revenue options. As Oregon evaluates options for transportation funding, the state should consider sufficient, sustainable, and durable solutions.

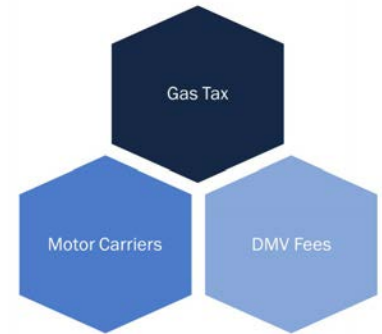

As the first state to establish a per-mile road use charge program and one of the leading states in the deployment of an electric fleet, Oregon is a national leader in the transition to a cleaner, modern transportation system. Decarbonizing Oregon’s transportation system through use of cleaner fuels, fewer and more efficient miles driven, and an accelerated transition to an electric fleet benefits the state — but it also brings a renewed urgency to decarbonize our funding structure and identify a sustainable approach to fund ongoing maintenance and operation of our transportation system.

Oregon’s State Highway Fund relies on revenue from the gas tax, DMV fees and motor carrier taxes. More diversified funding streams are needed. Policymakers can choose from a variety of transportation fees and taxes to fund immediate needs and ensure that all users of the system are paying their fair share. Fees like a road usage charge can help capture the costs for user’s wear and tear on the transportation system. To ensure lasting buying power, indexing all fees to inflation or some other factor is necessary.

Previous transportation visioning panels have explored a variety of transportation funding options, some of which were implemented as part of HB 2017. However, the vast majority of funds raised by HB 2017 were either for public transportation, or dedicated to highway capital programs, not operations and maintenance. Derived and updated from this past panel’s work, Table 4 (next page) reflects a variety funding options for consideration by policymakers, indicating how well each addresses certain outcomes such as revenue stability. Included are options for increasing existing user fees, such as increasing the gas tax and DMV fees, as well as new fee options like a studded tire tax.

Below that, Table 5 provides estimates on the amount of revenue generated through certain increases in existing taxes and fees, based on the April 2024 ODOT State Revenue Forecast. For example, raising the fuel tax by 1 cent generates approximately \$16 million per year; or raising passenger registration fees by \$10 per year generates approximately \$38 million per year. It should be noted that the revenue estimates do not assume commensurate increases in heavy vehicle taxes/fees in order to maintain cost responsibility, which will be determined as part of the next Highway Cost Allocation Study.

Current State Highway Fund revenue sources

Current funding relies on revenue from the gas tax, DMV fees and motor carrier taxes.

Sustainable funding options for Oregon to consider

A more diversified funding stream is needed to meet immediate needs and ensure that all users are paying their fair share.

Table 4: Roadway Funding Options

Fee Options	Adequacy of revenue	Responsive to inflation	Stability and predictability	Appropriateness of dedication	Administrative costs	Equity by income
Increase state gas taxes	Very Good	Poor	Fair	Good	Very Good	Poor
Increase DMV fees (licenses, registration or titles)	Good	Poor	Very Good	Fair	Very Good	Poor
Increase new vehicle use tax	Poor	Good	Fair	Fair	Very Good	Very Good
Increase MPG-based vehicle registration fees	Good	Poor	Very Good	Fair	Very Good	Poor
Temporary gas tax increase	Very Good	Poor	Poor	Good	Very Good	Poor
New vehicle user fees (first time title fee)	Poor	Poor	Fair	Fair	Very Good	Good
State gas tax indexing	Very Good	Very Good	Good	Good	Very Good	Poor
Local gas tax	Fair	Poor	Fair	Good	Very Good	Poor
Local registration fee	Fair	Poor	Very Good	Fair	Very Good	Poor
Studded tire tax	Poor	Poor	Poor	Good	Good	Fair
Bridge toll	Good	Fair	Good	Very Good	Poor	Fair
Per mile road user charges	Very Good	Poor	Very Good	Very Good	Fair	Fair
Carbon tax	Good	Poor	Fair	Very Good	Very Good	Poor

Table 5: Amount of Revenue that can be Generated by Raising Existing Taxes and Fees

Category	Per unit	Revenue (\$Millions)*
Fuels Tax	\$ 0.01	\$ 16.00
Passenger Registration	\$10.00	\$ 38.00
Tiered Registration	**	\$200.00
Light Vehicle Titles	\$10.00	\$ 10.00
Class C License	\$10.00	\$ 4.00
Use Tax	0.1%	\$ 2.50

*Revenue estimates do *not* include complementary increases in heavy truck taxes because the cost responsible ratio of light to heavy revenue will be determined in the upcoming Highway Cost Allocation Study.

** Consistent with the HB 2017 Section 75 *Study* (2017), the \$200 million revenue estimate represents the projected annual revenue generated from high efficiency passenger vehicles to achieve cost parity.

Call to Action

Oregonians across the state rely on a safe, well-functioning, and accessible transportation system. But our existing funding structure can no longer support the level of service and reliability Oregonians have experienced for decades nor can it deliver the modern, safe transportation system Oregonians deserve.

Transportation agencies across the state are already living with this new reality; reduced spending means reduced maintenance and operations services. These funding-based reductions bring increased vulnerability to weather and natural disasters, increased time to clear crashes and reopen roads, longer wait times at the DMV, and decreased reliability in services from transportation agencies across the state.

The funding strategies laid out in this document provide a path to a modern, reliable, environmentally friendly and safe transportation system. With sufficient investment in the core operations of the agency, we can restore the level of service Oregonians expect from their transportation agency. And with additional investment, we can build the transportation system Oregonians deserve.

The Oregon Department of Transportation was originally created in 1913 and tasked with building a robust transportation network to serve and connect Oregonians. Since its inception, ODOT has served every person and community across our state. Whether through plowing the interstates, running the local weigh station, painting bike lanes on main streets, or from the DMV counter, ODOT employees serve their communities because they are part of their communities. We want to help Oregon thrive, and with these investments, we believe it will.

With sufficient investment in the core operations of the agency, we can restore the level of service Oregonians expect.

UMS Finance Plan Background

OTC has approved updated UMS Finance Plan to:

- Address loss of I-205 toll revenue
- Address higher costs for I-205 Abernethy Bridge
- Make meaningful progress on I-5 Rose Quarter

OTC took action:

- Provided \$250 million in HB 2017 UMS funds to get Rose Quarter under construction
- Transferred \$100 million in Bridge Program from I-405 Fremont painting to I-205 Abernethy
- Approved finance plan to close I-205 Abernethy gap by issuing bonds repaid by HB 2017 Bridge and Seismic funds

I-205 Abernethy Bridge

- Based on proposed settlement, ODOT updated project cost estimate to \$815 million
- Additional funds needed from HB 2017 Bridge/Seismic funds to reach this amount
- Additional funds likely needed based on remaining risks identified; future STIP amendments will be brought as funding needed

I-5 Rose Quarter Investment

Dedicating \$250m buys:

- Complete SB auxiliary lane, construct partial NB auxiliary lane
- Extend highway cover
- Bridge work and stormwater improvements

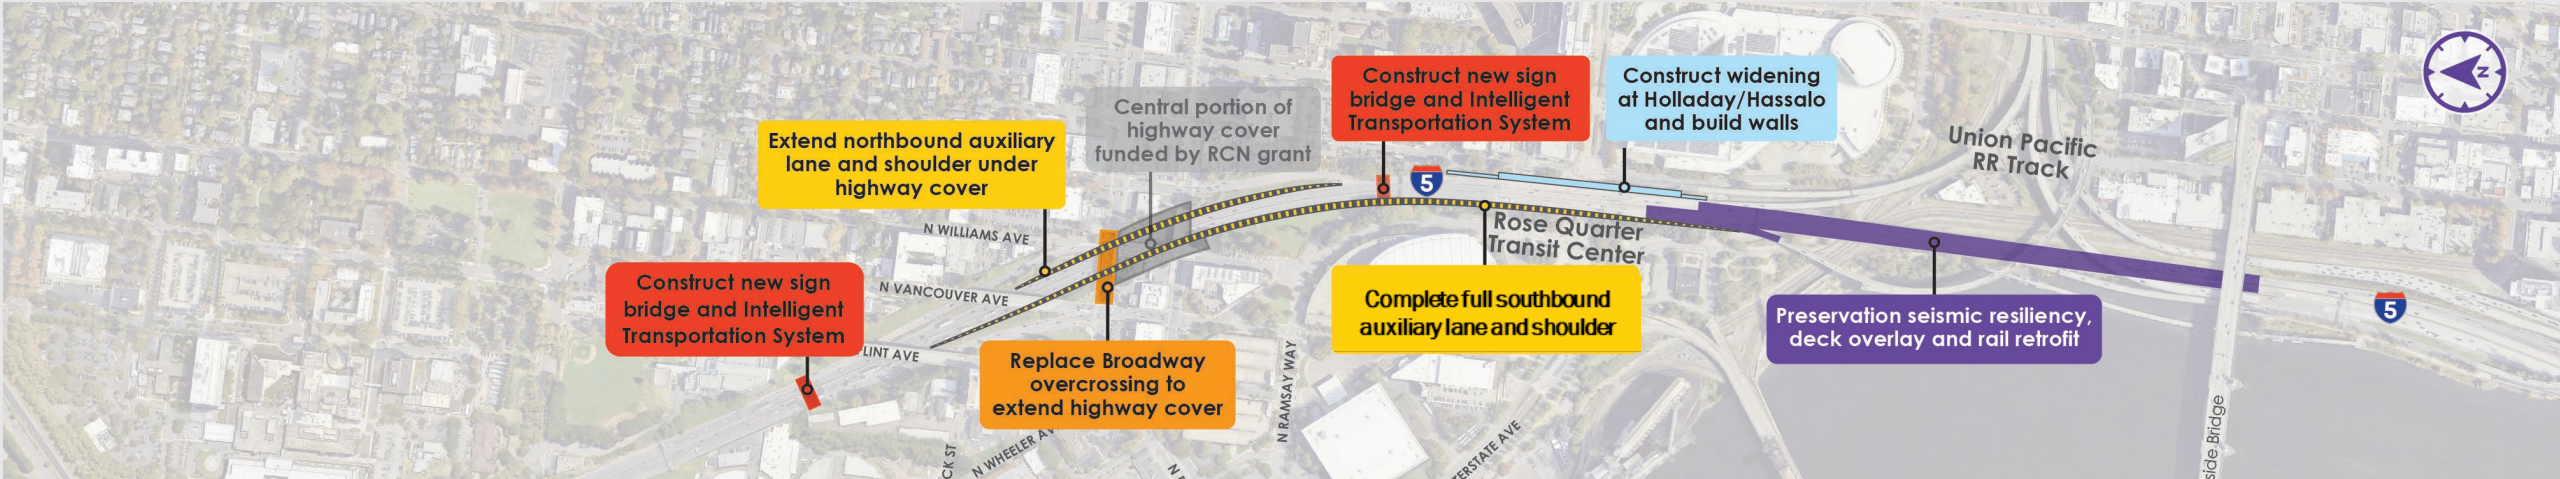

Construction will start in 2025

All amounts will be met by transferring HB 2017 UMS funds back to RQ from I-205, as originally intended, and backfilling I-205 with Bridge bond proceeds

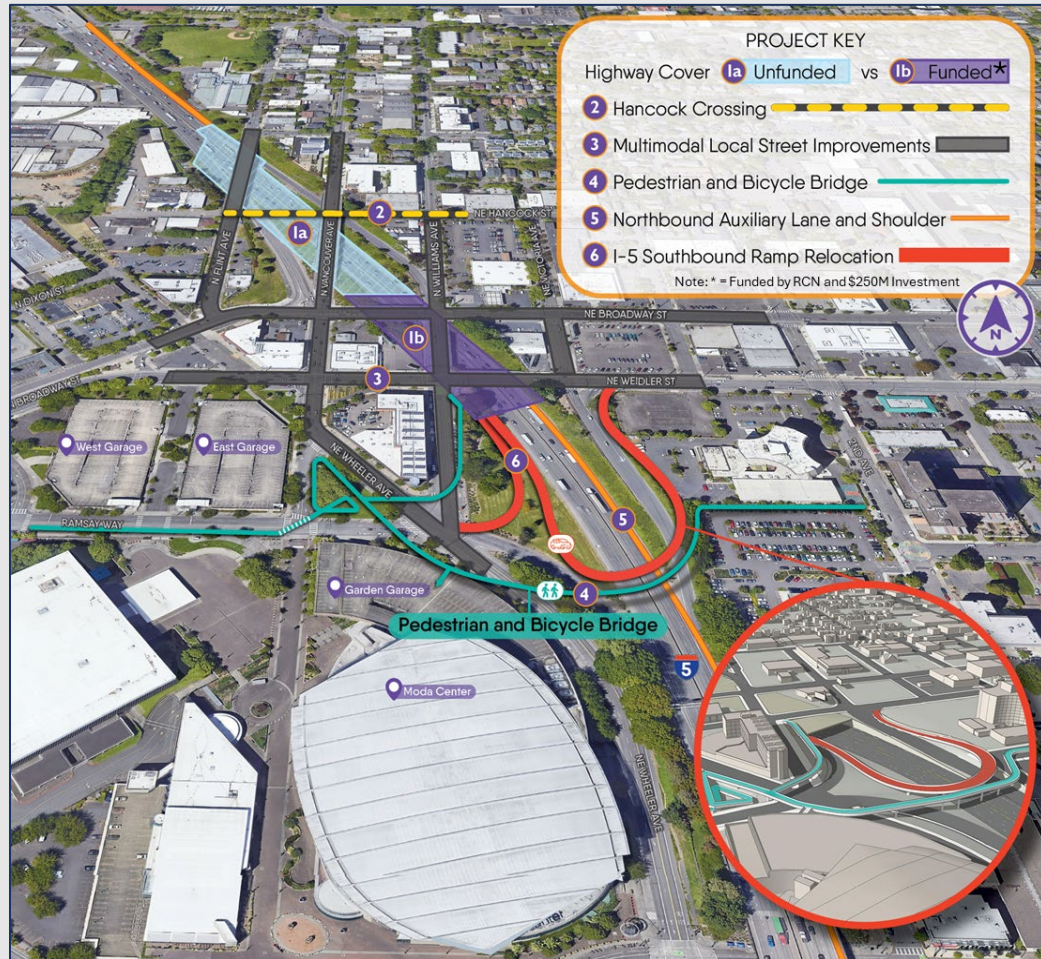

I-5 Rose Quarter Additional \$250M Investment (\$850M Total)

Construction Start: 2025

Scope	Benefit
<p>Build full southbound aux lane and shoulders, extend existing northbound aux lane and shoulder under highway cover</p> <p>Extend initial, central portion of highway cover built with RCN grant; Lower highway to finished profile and final pavement under constructed cover</p> <p>Construct sign bridges & Intelligent Transportation Systems</p> <p>Bridge work in southern project area</p> <p>Stormwater facilities near I-405</p> <p>Widen Holladay/Hassalo bridge and build walls</p>	<ul style="list-style-type: none"> • Completes full extension of the southbound aux lane, completing a continuous auxiliary lane between I-405 and Morrison Bridge exit • Extends existing northbound auxiliary lane from I-84 to north of Weidler • Provides additional highway cover area • Improves construction efficiency and reduces temporary mitigations (throw-away work) by completing the cover north of Broadway • Reduces traffic and streetcar disruption (avoids a second round of impact) • Provides signage necessary for tunnel safety and improved highway operations, supports full project construction signage needs • Builds portion of southbound aux lane from I-84 exit to Morrison Bridge exit • Preserves I-5 bridge structures • Provides required stormwater facilities for ODOT's Portland Harbor agreement

Remaining Rose Quarter Project Elements After \$250M Investment

1. Completing the highway cover (~between Flint and Broadway)
2. Constructing the Hancock crossing
3. Completing multimodal local street improvements outside of RCN-funded highway cover area
4. Constructing the pedestrian and bicycle bridge
5. Completing the northbound auxiliary lane and shoulder
6. Relocating the I-5 southbound off-ramp and new flyover structure

Remaining cost estimated at \$650 million to \$1.05 billion based on current cost estimate

UMS Finance Plan December 2024 Update

Project	December 2024 Update	What It Buys
I-205 Abernethy	\$815*	Updated cost to complete I-205 Abernethy, including soil stabilization; does not include pricing remaining risks; no funding for adding 3 rd lane
I-5 Rose Quarter	\$858	Completes preliminary engineering, constructs portion of highway cover, complex SB aux. lane and portion of NB aux. lane
I-5 Boone Bridge	\$4	Completes preliminary planning; no further funding
Tolling	\$70	Cost for work on RMPP, I-205 Tolling, Statewide Toll Systems
Short Term Financing	\$15	Net costs associated with short-term interests and other financing costs
Total Funds Needed	\$1,762	Current total estimate of work on each project
Total Resources	\$1,267	Total estimated federal, state and local resources available
Funding Gap	\$(495)	Total estimated funding gap to be filled with HUTR bonds
Annual Debt Service	\$35	Annual debt service on HUTR bonds

*Does not include pricing identified risks.

Highway User Tax Revenue Bonds

- I-205 Abernethy shortfall and Rose Quarter investments would be paid for by proceeds of HUTR bonds
- Bonds may also be used for other ODOT projects, such as Highway 22 Center Street Bridge in Salem (HB 2017 named project)
- ODOT will request legislative authorization in the 2025 bond bill
- Bonds would be sold in several tranches over the next 2-4 years based on cash flow needs
- Bonds to be repaid by HB 2017 Bridge/Seismic funds
- Debt service will continue for 25 years

Impacts of Bonding on Statewide Bridge Program

- Will require cancelling or delaying project phases in the '24-'27 STIP
- ODOT has identified potential projects to cancel or delay projects in the '24-'27 STIP but will return to OTC for actions once debt service is known
- In the 27-30 STIP, the Bridge Program funding is \$272M total and \$105M will go towards debt service
- For future STIP cycles, debt service will be a line item in the program budget and there will be less money available for delivering other projects

STIP Cycle	Federal Fiscal Year	Annual Debt Service (Millions)
24-27	'26	\$12M
	'27	\$35M
27-30	'28	\$35M
	'29	\$35M
	'30	\$35M

UMS Finance Plan Funding Gap

Project	Cost (High)	Available Funding	Funding Gap
I-5 Rose Quarter	\$1,900	\$858	\$(1,042)
I-205 Abernethy	\$815	\$815*	\$0*
I-205 Phase 2	\$800	\$0	\$(800)
I-5 Boone Bridge	\$725	\$4	\$(721)
Total	\$4,240	\$1,677	\$(2,563)
*I-205 Abernethy available funding and funding gap includes \$495m of HUTR bonds	Annual Debt Service		\$170-190
	Fuels Tax Equivalent		8 cents/gallon

Potential Sources to Close the Urban Mobility Strategy Funding Gap

- Additional STIP funding
- Federal discretionary grants
- Additional statewide tax revenue
- Regional funding
- Tolling revenue

Urban Mobility Strategy Finance Plan Update

December 2024¹

Introduction

In June 2023 the Oregon Transportation Commission approved a finance plan for the Urban Mobility Strategy at the direction of Governor Tina Kotek after she directed ODOT to delay the collection of tolls until 2026. The finance plan laid out the available resources for the UMS in light of this decision, allocated available funding among projects to meet key milestones, estimated remaining funding gaps for each project, and offered potential funding sources to close these gaps and complete the projects.

In the nearly one year since approval of this initial plan, a number of major factors have impacted the original plan approved by the Commission.

- In March 2024, Governor Kotek directed ODOT to stand down on tolling for the time being by canceling the Regional Mobility Pricing Project, transferring toll collections for the Interstate Bridge Replacement Program to WSDOT, and indefinitely pausing work on the I-205 Tolling Project. This will lead to substantial reductions in expenditures compared to the funding allocated to tolling in the UMS Finance Plan but will also eliminate \$385 million in projected funding from tolls on I-205.
- The estimated cost to complete construction of the I-205 Abernethy Bridge Project, which is already under construction, has increased for a number of reasons, including structural engineering elements, unanticipated project changes, delay, escalation and risk for a multi-year project.
- The I-5 Rose Quarter received a \$450 million Reconnecting Communities and Neighborhoods (RCN) grant from the U.S. Department of Transportation, allowing the project to expand its scope of work to complete design on the main construction package and construct an initial portion (but not all) of the highway cover that will help knit back together the Albina neighborhood that was torn apart by the original construction of the Interstate through a thriving Black community. ODOT is developing plans to get this portion of the project under construction and is developing options for adding elements if additional funding is provided.

The net effect of these impacts is that there is a shortfall in the funding needed to complete the I-205 Abernethy Bridge, and also an opportunity to get the Rose Quarter under construction if additional funding can be identified.

This December 2024 reflects updates to the UMS Finance Plan approved by the OTC in June 2024 and December 2024, which closed the I-205 Abernethy Bridge funding gap and provided funding to the I-5 Rose Quarter to start construction in 2025. All figures in this document are estimates as of December 2024 and subject to change as actual project costs and expenditures are updated with additional time. Similarly, the available funding from HB 2017 Urban Mobility Strategy bonds is subject to significant

¹ Updated after OTC action to provide \$250 million to Rose Quarter on December 4, 2024.

uncertainty, and the timing of expenditures and cash flow needs that will determine bond sales timing and debt service amounts for each year into the future will be determined as projects move forward. ODOT also maintains a more in-depth operational finance plan for the UMS projects that tracks expenditures and funding needs by quarter, which is used to determine the timing of bond issuance.

Program Funding

Since the June 2023 UMS Finance Plan, a number of factors have changed the amount of funding available for the UMS.

- The decision to halt tolling on I-205 has reduced estimated resources for the I-205 Abernethy Bridge by \$385 million.
- The \$450 million RCN grant for the Rose Quarter has opened up new opportunities to make progress on a critical project.
- In June the OTC approved a proposal to redirect \$100 million of Bridge program funds from the I-405 Fremont Bridge to the Abernethy Bridge.

With all these changes, the UMS has \$1.267 billion in total resources available after the actions the OTC took in June 2024.

Table 1: Total Resources for UMS After June 2024 Update

Revenue Sources	Amount	Notes
HB 2017 UMS	\$560	Bond proceeds and cash from the \$30 million annual set-aside of HB 2017 funds. Originally directed by HB 2017 to Rose Quarter; HB 3055 in 2021 allowed for use on other elements of the UMS.
Other Federal/ State/Local	\$257	Includes a variety of federal, state and local revenue sources, including \$100 million approved by OTC to transfer from I-405 Fremont to I-205 Abernethy in June 2024.
Federal Competitive Grants	\$450	Reconnecting Communities and Neighborhoods Grant for I-5 Rose Quarter.
I-205 Tolls	\$0	Tolling revenue is no longer included in UMS Finance Plan.
Total Resources	\$1,267	

Note: All dollar figures throughout this document are in millions of dollars.

The revenue estimate from cash and bonds from the \$30 million allocation to the UMS from HB 2017 remains unchanged, though it has elements of uncertainty. ODOT has sold the first tranche of bonds backed by these resources, totaling about \$240 million in net proceeds, and expects a second sale in the 2025-2027 biennium, with the timing dependent on cash flow needs and other factors. The total resources available from HB 2017 will depend on key details of financing, including bond interest rates and maturities, as well as when the bonds are sold; ODOT will continue to receive cash from this allocation until funds are fully dedicated to debt service payments after the second tranche of bonds is sold.

Project Costs and Expenditures

Since June 2023 a number of changes have occurred that impact expected costs and expenditures for the UMS projects.

Tolling

The original UMS Finance Plan allocated \$263 million to implement tolling, including costs of developing and constructing tolling infrastructure on I-205 and I-5 and building the back office and customer service center necessary to collect tolls. Due to cancellation of the RMPP, pausing tolling on I-205, and transferring toll collection on IBR to the Washington State Department of Transportation, ODOT now anticipates spending about \$70 million on tolling across three toll projects, presenting savings of approximately \$193 million. The net loss of I-205 toll revenue due to the pause on tolling is about \$192 million.

I-205 Abernethy Bridge

The total cost of completing the I-205 Abernethy Bridge project is currently estimated at \$815 million. This includes the anticipated total cost of three elements.

- Preliminary engineering for the I-205 corridor improvements.
- I-205 Abernethy Bridge construction (currently underway).
- Soil stabilization necessary for seismic resilience on the I-205 Abernethy Bridge.

ODOT anticipates completing the base construction project by the end of 2026, with soil stabilization work likely to begin in 2027 under a separate contract.

The 2023 UMS Finance Plan projected a total cost of the I-205 Abernethy Project of \$662 million; the June 2024 update estimated \$750 million. Drivers of the higher cost include:

- Structural engineering elements, including additional steel reinforcement for existing bridge cross beams, additional structural steel fabrication and materials, reconciling as-built conditions vs. contract plans, delay related to changes during construction, and additional engineering.
- Unanticipated project changes, including additional underground storage tanks, blast caps, soundwall panel changes, and environmental permit required changes.

This current estimate of \$815 million does not include the likely price of additional risks that have been identified by the project team, so ODOT will return to update the Commission on the total cost of the project as risks are either addressed or become real. Additional funding will be likely be needed to address these risks and will be requested as needed in future STIP amendments to be approved by the Commission.

I-5 Rose Quarter

The 2023 UMS Finance Plan provided the I-5 Rose Quarter an allocation of \$158 million from HB 2017 funds and other state, federal and local funds. This allocation allows ODOT to complete design of the three early work packages (formerly known as early work packages A, B and C), reach 30% design of the

main construction package and prepare for property acquisitions needed for construction. However, this funding will not allow the project to start construction.

The \$450 million federal RCN grant, awarded in March 2024, will fund design completion (including right of way acquisitions and utility relocations) and construction of an initial portion of the highway cover, which will be forward compatible with the construction of the remainder of the highway cover and I-5 mainline improvements. The grant did not fund the proposed bicycle/pedestrian bridge over I-5, the project's auxiliary lanes and shoulders, the I-5 southbound off-ramp relocation, nor multimodal street improvements. Grant funding is secured, with the design funding available now and construction funding to become available in advance of construction, now that ODOT has completed a grant agreement with the Federal Highway Administration. Construction on the RCN portion of the project is anticipated to begin by 2027.

Even with this grant, the Rose Quarter faces a significant funding gap of about \$1.3 billion, based on the project's high-end estimate of \$1.9 billion. This is in part because UMS funds originally dedicated to Rose Quarter by HB 2017 were set aside for I-205 Abernethy and implementation of tolling after passage of HB 3055 to move the construction-ready I-205 Abernethy bridge project forward and jumpstart work on tolling. ODOT intended to repay these funds borrowed from Rose Quarter after selling bonds backed by toll revenue. This plan has been complicated by the cost increases required to complete the Abernethy Bridge and the loss of projected tolling revenue.

In May 2024 the OTC agreed to contingently allocate up to \$250 million in HB 2017 funds to match an INFRA grant request of up to \$750 million. This funding would have closed a significant portion of the project's funding gap and allowed construction to begin in 2025, but ODOT did not receive this grant.

However, in December 2024 the OTC approved allocating an additional \$250 million to the Rose Quarter to fund the following elements, with construction able to start in 2025 if funding is provided in December and to expand upon the construction funded by the RCN grant.

- Build the full southbound auxiliary lane and shoulder from I-405 to the Morrison Bridge exit.
- Extend an initial portion of the northbound auxiliary lane and shoulder under the highway cover.
- Extend the initial, central portion of highway cover built with RCN grant, and lower the highway to its finished profile and final pavement under the constructed portion of the highway cover.
- Complete bridge work in the southern project area, construct stormwater facilities near I-405, and construct sign bridges & Intelligent Transportation Systems.

These improvements will have significant value, both in terms of providing a significant improvement to traffic flow and safety on I-5 (with the most robust improvements in the southbound direction) and also in extending the highway cover to north of Broadway. Funding will come from HB 2017 Urban Mobility Strategy funds in the form of cash and bonds; these funds were originally intended to fund Rose Quarter construction and will be redirected back to the project. The loss of funds provided to I-205 Abernethy

will be backfilled by Highway User Tax Revenue Bonds repaid by HB 2017 Bridge and Seismic funds, as described below.

After Commission approval of the additional \$250 million for Rose Quarter construction, the following elements of the project would remain to be funded:

- Completing the highway cover between Flint and Broadway
- Constructing the Hancock crossing (as part of the completed highway cover between Flint and Broadway)
- Completing multimodal local street improvements outside of RCN-funded highway cover area
- Constructing the pedestrian and bicycle bridge
- Completing the northbound auxiliary lane and shoulder (between the Broadway on-ramp and the Greeley off-ramp and between the I-84 on-ramp and Weidler off-ramp)
- Relocating the I-5 southbound off-ramp and new flyover structure

Based on the project cost range of \$1.5 to \$1.9 billion, the project's remaining costs are estimated at approximately \$650 million to \$1.05 billion. The Urban Mobility Office will update and validate the Rose Quarter cost estimate, including this identified funding gap, in coordination with the Federal Highway Administration in spring of 2025.

Closing the Urban Mobility Strategy Funding Gap

With higher costs and reduced revenues available to complete the I-205 Abernethy Bridge Project, ODOT faces the need to close the immediate funding gap for that project to ensure completion. A plan to close this gap needs to be developed in the near future, as ODOT does not have the cash on hand to spend hundreds of millions of dollars on UMS projects over the next few years without a funding source.

ODOT has covered expenditures prior to toll revenue coming available in 2026 through short-term borrowing using a commercial paper program. ODOT has taken out about \$280 million in commercial paper, which the agency originally planned to pay back using toll revenue. Plans for additional commercial paper draws against the program's total cap of \$500 million are temporarily on hold now that tolling isn't available as a repayment source. ODOT may need additional short-term borrowing from our commercial paper program or other sources to meet cash flow needs for I-205 construction costs prior to selling bonds to pay off the short-term borrowing. Taking out additional short-term debt requires identifying a replacement revenue source to pay back this short-term debt.

Table 2 shows the funds allocated to each UMS project in the June 2024 UMS Finance Plan Update, as well as an update based on new cost estimates of I-205 Abernethy, tolling, and short-term financing and the additional \$250 million investment of HB 2017 UMS funds to start construction in 2025. The total funding gap will be covered using proceeds from Highway User Tax Revenue (HUTR) bonds backed by ODOT's HB 2017 Bridge and Seismic State Highway Fund revenues. If the Commission chooses to provide the additional funding for Rose Quarter, funding from the HB 2017 Urban Mobility Strategy funds would

be shifted from I-205 Abernethy back to Rose Quarter, requiring the sale of more bonds backed by Bridge/Seismic funds.

As shown here, the impact to the Bridge/Seismic program differs based on the scenario, with approximately \$18 million in annual debt service needed under the base scenario and up to about \$35 million needed under the scenario that invests \$250 million in the Rose Quarter.

Table 2: Estimated Funds Needed For UMS Projects

Project	June 2024 Update	December 2024 Update
I-205 Abernethy	\$750	\$815
I-5 Rose Quarter	\$608	\$858
I-5 Boone Bridge	\$4	\$4
Tolling	\$73	\$70
Short Term Financing Costs	\$36	\$15
Total Funds Needed	\$1,471	\$1,762
Total Resources	\$1,267	\$1,267
Funding Gap	\$(204)	\$(495)
Annual Debt Service	\$15	\$35

Additional bonds would need to be sold if the cost of I-205 Abernethy increases, as is expected based on the identified known risks. ODOT may also choose to sell additional bonds to cover cost escalation on other HB 2017 projects, such as the OR 22 Center Street Bridge, which faces a significant shortfall. Bonds would likely be issued in multiple tranches starting in the 2025-2027 biennium when funds are needed to pay project expenses. Legislative authorization for these bonds will be required in the 2025 bond bill.

Funding to pay back these bonds would be drawn from bridge projects statewide that are programmed in the 2024-2027 STIP or would be programmed in future STIPs. The bonds would likely be paid off in about 25 years from their date of issuance. Because all of the bonds will not be sold for several years, impacts to the Bridge program will likely be relatively small in the 2024-2027 STIP—likely in the range of \$45-50 million-- though ODOT will likely need to cancel or delay some projects. ODOT will return to OTC for actions to cancel or delay projects in the 2024-2027 STIP once we have greater insight into the amount of bonds to be issued, the timing of bond sales, and debt service amounts. The full impact will hit the 2027-2030 STIP after all the bonds are issued, but projects have not yet been programmed in this STIP. In the 2027-2030 STIP, the Bridge Program funding is \$272 million total and an estimated \$105 million will go towards debt service. For future STIP cycles, debt service will be a line item in the program budget and there will be less money available for delivering other projects.

Depending on the timing of long-term bond sales, these options may require additional short-term borrowing through the commercial paper program to meet immediate cash flow needs on I-205, and this borrowing comes with financing costs. To avoid the use of short-term financing, and its associated costs, ODOT may elect to move up the sale of the legislatively-authorized HB 2017 UMS bonds to meet

immediate cash flow needs. However, it should be noted that moving up the issuance of HB 2017 bonds will reduce the total resources available from HB 2017 UMS funding in two ways:

- ODOT generates about \$1 million in additional cashflow each month from the portion of the funding that is not yet being paid in debt service; and
- The longer ODOT is able to wait to sell the remaining portion of UMS bonds, the more proceeds it can generate. Conversely, the sooner ODOT sells the remaining portion, the less proceeds it can generate.

While ODOT has strong credit ratings from rating agencies—including a AAA rating from S&P—the issuance of additional debt against existing State Highway Funds without additional revenue enhancements, combined with the projected decline in the gas tax and the agency’s funding challenges, could lead to a rating downgrade or other negative guidance from the rating agencies that could increase the agency’s cost of borrowing.

Funding Needed to Complete the Urban Mobility Strategy Projects

While closing the short-term funding gap for the I-205 Abernethy Bridge project is urgent and critical, it is also important to lay out options for completing other unfunded work in the UMS, including:

- Construction of the full I-5 Rose Quarter, including completing the auxiliary lanes and shoulders to address the traffic bottleneck and safety issues, as well as constructing the remainder of the highway cover, the multimodal local street improvements, and the relocation of the I-5 southbound off-ramp.
- Construction of I-205 Phase 2, which includes the missing lane between Stafford Road and the Abernethy Bridge as well as bridge investments for seismic resilience through the southern end of the corridor. Further design work on this project was put on indefinite hold in 2023 when tolling was delayed; additional funding is needed to complete environmental review, design and undertake construction.
- Replacement of the I-5 Boone Bridge for seismic resilience and congestion relief. This project has only undertaken preliminary planning and requires funding to complete environmental review, design and enter construction.

The total cost of I-5 Rose Quarter, I-205 Improvements (both Abernethy Bridge and Phase 2), and I-5 Boone Bridge totals an estimated \$4.2 billion, with a \$2.6 billion funding gap, as shown in Table 3.

The Commission, Legislature, and ODOT have a variety of methods to seek to close this gap.

- **Additional funding in the STIP.** The Oregon Transportation Commission could dedicate additional funding from discretionary resources in the Statewide Transportation Improvement Program (STIP). However, these funds are already allocated among programs through 2030, with no additional funding dedicated to UMS projects. What’s more, discretionary resources are increasingly constrained due to the need to fund the ADA program and other programs required under law: in the 2027-2030 STIP the Commission had less than \$100 million in discretionary

resources to allocate among programs, and many areas including Fix-It and Public and Active Transportation took cuts.

- Federal discretionary grants.** In the last year major highway projects in the Portland metro region have secured over \$2.5 billion in federal discretionary funding available under the Infrastructure Investment and Jobs Act. In addition to the Rose Quarter’s \$450 million RCN grant, the Interstate Bridge Replacement secured a \$600 million MEGA grant and a \$1.5 billion Bridge Investment Program grant. ODOT intends to continue seeking other federal grants for the UMS projects—particularly the Rose Quarter. However, ODOT did not receive an INFRA grant for Rose Quarter, and INFRA grants have now been awarded through 2026, when the Infrastructure Investment and Jobs Act expires. Funding for discretionary grant programs beyond that timeframe are dependent on congressional action to reauthorize the IJA, which could be challenging given a significant shortfall in user fee revenue flowing into the Highway Trust Fund. UMS projects may be eligible to receive other grants, though most are likely to be much more modest in size than those received to date.
- Additional statewide tax revenue.** Additional statewide tax revenue could be dedicated to the UMS projects. Generating \$2.6 billion in bond proceeds to close the funding gap would require about \$180-190 million in annual funding for debt service, which amounts to a statewide gas tax increase of nearly 8 cents per gallon, along with complementary weight-mile tax revenue.
- Regional funding.** A portion of the UMS funding gap could be raised through transportation taxes and fees within the Portland metro region, as was originally contemplated as part of HB 2017; this option was set aside in favor of tolling.

Table 3: Project Funding Gaps

Project	Notes	Cost (High)	Available Funding	Funding Gap
I-5 Rose Quarter	Cost estimate will be updated in 2025. Available funding includes RCN grant, additional \$250m for construction, and previously allocated funding.	\$1,900	\$858	\$(1,042)
I-205 Abernethy	Incorporates additional costs as noted above and additional HUTR bonds repaid by HB 2017 Bridge and Seismic funds.	\$815	\$815	\$0
I-205 Phase 2	Updated to assume project construction begins in 2031.	\$800	\$0	\$(800)
I-5 Boone Bridge	Cost estimate has not been updated since 2023 finance plan. A new cost estimate range will be developed in late 2024.	\$725	\$4	\$(721)
Total		\$4,240	\$1,677	\$(2,563)
*Estimated annual debt service on 25 year Highway User Tax Revenue bonds, rounded to nearest \$10 million. **Increase in the statewide fuels tax along with complementary weight-mile tax to pay debt service, rounded to nearest penny.		Annual Debt Service*		\$180-190
		Fuels Tax Equivalent**		8 cents/gallon

- **Tolling revenue.** While implementation of tolling has been paused, it remains an option if other funding sources are unable to close the gap and policymakers wish to complete major congestion relief projects.

Completing these three major projects will likely require some combination of multiple of the above funding sources rather than relying on a single source.

Summary of Audits Division Audits of
Oregon Department of Transportation
February 1, 2022 – June 30, 2024

Audits Completed by the Secretary of State Audits Division

I. Audit Report Title

TEAMS IT Application Controls Review

Date

March 2022

Key Findings

In preparation for the FY2022 statewide financial audit of the Oregon Department of Transportation (ODOT), this was an audit of procedures over controls related to the Transportation Environment Accounting and Management System (TEAMS).

The audit found that overall controls were implemented and operating and were sufficient to provide reasonable assurance that transactions remained complete, accurate, and valid during input, processing and output; that change management procedures ensure the integrity of system data; and that logical access controls protected TEAMS against unauthorized use, modification, damage or loss. Although there are some controls that could be strengthened, the areas of weakness we found did not present a material threat to the integrity of ODOT's financial statements.

Major Recommendations

No recommendations were issued. Three opportunities for improvement were cited for improving processes for updating TEAMS reference tables, and one to ensure access is restricted only to those individuals with a demonstrated need for that access.

Agency Response

No response required.

Management Actions

No actions required.

New or Enhanced Funding or Savings

None.

Policy Package

None.

II. Audit Report Title

730-2022-04-01

Statewide Single Audit of Selected Federal Programs For the Year Ended June 30, 2021

Date

April 2022

Key Findings

The audit did not identify any deficiencies in internal control over compliance considered to be material weaknesses.

Major Recommendations

No recommendations were issued.

Agency Response

No response required.

Management Actions

No actions required.

New or Enhanced Funding or Savings

None.

Policy Package

None.

III. Audit Report Title

730-2023-01-01

Selected Financial Accounts For the Year Ended June 30, 2022

Date

January 2023

Key Findings

The audit identified deficiencies in internal control over compliance considered to be material weaknesses:

Documentation was requested to support the July 1, 2021, opening balances for Data Processing Software. The department's asset listing included 495 individual software assets acquired between 1990 and 2022 totaling \$138.9 million. Of the 26 items selected for review, 5 had insufficient documentation to support the asset's balance and classification as a capital asset. All 5 of the exceptions relate to software assets acquired prior to 2008. The reported acquisition cost for the 5 software assets was \$1.8 million; projected to the population, the unsupported beginning balance was \$24.4 million. Agency staff misunderstood the record retention requirements for capital assets.

Major Recommendations

ODOT should ensure staff understand the retention requirements for capital asset costs to ensure that documentation is retained as required.

Agency Response

Management agreed with the finding and recommendation.

Management Actions

Management has implemented the recommendation.

New or Enhanced Funding or Savings

Pending.

Policy Package

None.

IV. Audit Report Title

730-2023-05-01

Statewide Single Audit of Selected Federal Programs for the Year Ended June 30, 2022

Date

May 2023

Key Findings

The audit did not identify any deficiencies in internal control over compliance considered to be material weaknesses.

Major Recommendations

No recommendations were issued.

Agency Response

No response required.

Management Actions

No actions required.

New or Enhanced Funding or Savings

None.

Policy Package

None.

V. Audit Report Title

730-2023-05-02

Statewide Single Audit of Selected Federal Programs For the Year Ended June 30, 2022

Date

May 2023

Key Findings

The audit identified deficiencies in internal control over compliance considered to be material weaknesses:

1. 40 transfer journal entries that moved costs between federal project sub jobs were tested. 19 did not have documentation of timely approval. In two cases, approval was documented more than a year after costs were transferred. The 19 entries were all lump sum transfers processed by Program and Funding Services (P&FS).
2. 17 subrecipient awards were examined to ensure the information required under 2 CFR 200.332(a)(1) was communicated at the time of the subaward. Each award examined was missing one or more of the required elements:
 - i. 15 samples did not include the subrecipient's Unique Entity Identifier or DUNS number;
 - ii. 7 samples did not provide the Federal Award Identification Number (FAIN);
 - iii. 5 samples did not provide the Federal Award date; and
 - iv. 1 sample did not provide the correct assistance listing number.

Major Recommendations

ODOT should:

1. Ensure procedures for review of transfer journal entries result in timely documented approvals.
2. Adopt procedures for preparing subaward agreements that ensure all required information is provided to subrecipients at the time of the subaward.

Agency Response

Management agreed with the findings and recommendations.

Management Actions

Management has implemented the recommendations.

New or Enhanced Funding or Savings

Pending.

Policy Package

None.

VI. Audit Report Title

730-2024-01-01

Selected Financial Accounts For the Year Ended June 30, 2023

Date

January 2024

Key Findings

The audit identified deficiencies in internal control over compliance considered to be material weaknesses:

Department staff historically performed a monthly reconciliation between each SFMA receipted cash account and its equivalent TEAMS cash fund. Management stated the monthly reconciliations were only performed the first quarter of fiscal year 2023 due to staffing changes and shortages. Without reconciliations between systems by fund the department is unable to ensure all transactions are accounted for accurately at the fund level, which could lead to inaccurate financial reporting.

Major Recommendations

ODOT should ensure reconciliations between SFMA and TEAMS are performed timely, and all outstanding reconciliations are completed

Agency Response

Management agreed with the finding and recommendation.

Management Actions

Implementation of the recommendation is in process, anticipated implementation date September 1, 2024.

New or Enhanced Funding or Savings

TBD - In progress.

Policy Package

None.

Audits in Progress by the Secretary of State Audits Division

I. Audit

IT audit of Oregon License Issuance and Vehicle Registration System Controls (OLIVR) Controls

Description

The Oregon License Issuance and Vehicle Registration System (OLIVR) is ODOT's new IT system for the Department of Motor Vehicles. This audit is examining and testing system controls to support work being performed by the financial audit team and may also include an accessibility and usability objective.

Status

Reporting phase.

Expected Issuance

September 2024.

Other Secretary of State audits in progress?

No other ongoing IT or Performance Secretary of State audits that will affect Agency Request Budget.

DATE: November 20, 2024
TO: Oregon Transportation Commission

FROM: Kristopher W. Strickler
Director

SUBJECT: **Agenda Item K** – Strategic Review Progress Report

Requested Action:

Review and discuss work the agency has accomplished on the Strategic Review, and provide feedback as the agency works to complete work on each of the recommendations.

Background:

The Oregon Department of Transportation maintains an approach and culture of continuous improvement, seeking always to find ways to deliver our work more efficiently, more safely, and more effectively. ODOT is a national leader among peers, pioneering innovative approaches, cultivating talented and dedicated leaders and staff, and challenging ourselves to evolve and grow to meet the changing needs of our state.

In furtherance of this mission and in light of recent specific challenges related to program delivery, ODOT requested an independent assessment of the agency's current state. In April 2024 a third-party expert review panel comprised of transportation professionals with over 150 years combined experience performed a rapid assessment Strategic Review (SR), identifying and recommending approaches foundational to top-performing transportation agencies nationwide. The SR evaluated specific topic areas and independently explored the agency's overall health, culture, and performance. The SR's work concluded in a report describing the agency's strengths, challenges, and opportunities for improvement.

Overall, the SR found agency strengths and clear indicators of high performance:

- General good condition of state highway system
- Dedicated agency staff
- Strong relationships with executive branch partners
- Notable stakeholder engagement within the Portland metro region
- Continuous improvement and growth mindset

The SR also found opportunities for improvement, including observations aligned with findings from the 2017 McKinsey report.

The SR's finding and recommendations can be summarized into three themes:

- Agency alignment and performance management culture
- Program planning and delivery, and transportation revenue projections
- Integration of Strategic Action Plan

Notably, the SR suggests that “with the full implementation of the key recommendations of this report, the agency will achieve the goal of being amongst the highest-performing agencies in the country.” The report also notes that “ODOT leadership cannot achieve this status without the resources and support...for sustainable workforce levels and the tools/systems that will enable” success. Decisions made by the Legislature “appear to have constrained the agency’s ability to effectively operate with limited positions and FTEs.” With full legislative consideration of the resources necessary to ensure long-term agency health and operations, ODOT can achieve the best practices identified in the report and join the ranks of most high-performing transportation agencies in the country.

ODOT presented the findings of the SR and its implementation plan for each of the work items and in October, the Commission received an update on our work. In December we are also providing an additional progress update as we begin to close out work on several items. For some of our more significant work items, we will provide a presentation on the work we have accomplished to date to address SR findings and improve overall agency health. We welcome commission feedback on the current efforts and on the timing of agency reforms underway to address the SR findings, as well as improvements that go beyond the review recommendations.

Attachments:

- Attachment 01 – December Strategic Review Progress Report

ODOT Strategic Review: November 2024 Update

Background

Director Strickler tasked a Strategic Review Panel with undertaking a rapid assessment of ODOT's effectiveness in certain processes and functions, with this goal: Recommend actions to assist ODOT in solidifying its position as a high-performing transportation agency with recognized credibility as a steward of the state transportation system and transportation funds.

We are focusing on three big areas:

- Providing and using tools, structures, and systems to improve outcomes.
- Building greater strategic alignment, collaboration, and shared ownership.
- Strengthening the agency's culture of performance management and accountability.

Snapshot

Workstream	Q4 2024 Status
1.A Improve Budgetary and Capital Programming Processes	🟡
1.B Develop and implement 5-10 year rolling program rather than programming in STIP	🟡
1.C Move toward centralized program management and project controls and reporting systems	🟡
1.D Develop and utilize tools and systems to effectively manage projects and programs from development through construction delivery	🟡
1.E Review Structural reporting or functional placement to improve outcomes	🟡
2.A Establish clear agendas for leadership meetings, including standing check-ins on key initiatives, tracking decisions, action item and key messaging follow-up	✅
2.B Implement cross functional teams for key initiatives	✅
2.C Consider leadership workshop to align agency directions, strategic action plan and consequent actions to measure progress	✅
2.D Develop roadmap for agency in conjunction with other leading state DOTs on how to transition from current state to the aspirations developed in strategic plan	🟡
2.E Increase staff engagement in strategic decisions and plans	✅
2.F Develop communications plan for both internal and external messages of agency reforms underway	✅
3.A Reinforce responsibility and accountability at all levels	✅
3.B Train and develop a sustainable workforce to deliver ODOT programs.	🟡
3.C Permanently fill key management positions.	🟡
3.D Review Advisory Committees protocol	🟡

Current Status Key

Green: 🟢 Work is on track as planned, no known concerns. ✅ Work is complete.

Yellow: 🟡 We anticipate or have experienced issues that may impact our ability to deliver the milestone in the timeframe planned.

Red: 🟠 We won't meet a milestone and need to renegotiate the deadline.

1.A Improve Budgetary and Capital Programming Processes

Develop and maintain a budget and capital programming practice that consistently and accurately identifies available funds to enable clear and effective programming of capital projects within available resources.

Leads: Marlene Hartinger and Travis Brouwer

Q4 2024 Current Status 

- Preliminary non-audit review completed 5/31/2024.
- Full comprehensive audit to identify programmatic errors and define corrections completed by 12/20/2024.
- Corrective plan, including implementation timeline for each item, expected by 1/1/2025.

1.B Develop and implement 5-10 year rolling program rather than programming in STIP

Enhanced progression of project development between various transportation plans and STIP to improve accuracy of scope, schedule, and budget. New Rolling program will have linkage to revenue projections. Program outcomes shall take effect immediately upon EST endorsement.

Leads: Travis Brouwer and Leah Horner

Q4 2024 Current Status 

- The Internal Project Management Team is meeting weekly, the Steering Team is meeting every other week, and six workgroups launched the week of Nov. 4.
- The six workgroups are composed of 51 people in different divisions and geographical regions of ODOT. The groups are each taking one focus area to research and develop the inputs needed to inform the Strategy. The groups will continue to meet until mid-December. The groups are:
 - Goal and Metric Setting
 - Plans and Processes
 - External and OTC Engagement
 - Project Identification, Needs, and Scoping
 - STIP Integration and Financial Constraints
 - Change Management and Roll Out
- An internal webinar open to the entire agency, but focused on project leads, program managers, and planners, was held on Nov.5 with good participation (125 people). The webinar is posted on the ODOT SharePoint site, and a Microsoft Form was set up to capture additional feedback.
- A virtual peer exchange is in development with CO, MN, AZ, and NV and will likely take place in early-to-mid December.
- Members of the Steering Team and Project Management Team continue to socialize the idea and request feedback with both internal and external groups.
- We are on track to have recommendations developed by the end of 2024.
- Implementation will be ongoing through 27-30 STIP with initial implementation target of Q2 2025.

1.C Move toward centralized program management and project controls and reporting systems

Implement key project controls and reporting for critical management objectives that are consistent across and supported by the organization.

Lead: Leah Horner

Q4 2024 Current Status

- **Delivery and Operations Division:**
- Initial implementation of (Quarterly Progress Reports) (QPRs) is completed - Materials & expectations rolled out through the division in Oct 2024.
- First QPRs are underway as follows:
 - R5 – 10/30 - completed
 - R1 – 11/4 - completed
 - R2 – 11/6 – completed
 - R4 – 11/21
 - R3 – 12/5
- First program QPRs (ADA, Fixit Programs, UMS, NEVI) to be scheduled for Jan-Feb 2025.
- 2025 Region QPRs are scheduled.
- Once the first round of Region QPRs is complete, an assessment of trends and themes will be developed to prioritize tools, systems, processes and training changes in project delivery.
- A color-coded dashboard report through SR Item 1D (see below) is in development to be used for future QPRs – both in Regions and Statewide Programs in 2025.
- **Public Transportation Division:**
- PTD has kicked off two reviews, one specific to the federal financial process and one specific to STIF. For the federal transit funding process review, PTD has contracted with WSP and the following has occurred in Q4:
 - The review process kicked off in October 2024.
 - Staff interviews and external transit provider and interested party feedback sessions and surveys have been conducted.
 - An initial draft assessment has been provided to PTD to review.
 - WSP will finalize a desktop analysis, complete interviews with ODOT staff, FTA, and DOTs, complete Phase 2 draft recommendations for improvements and provide a draft assessment and recommendations memo for ODOT feedback.
- For the Statewide Transportation Improvement Fund (STIF) Process Review, PTD has contracted with (RLS), who is the current contractor PTD utilizes for STIF review and engagement with transit providers and PTD. The following has occurred in Q4:
 - An initial assessment report provided to PTD on Qualified Entity oversight
 - External transit provider and interested party feedback sessions and surveys conducted
 - RLS will finalize Regional Transit Coordinator interviews, provide a draft report on recommendations for PTD review and complete and present the report to the Division Administrator.

1.D Develop and utilize tools and systems to effectively manage projects and programs from development through construction delivery

Utilization of standard tools and systems will enable programmatic oversight of project and program delivery to ensure completion; projects, programs, staff, and leadership across the agency will utilize consistent system(s) that include Scope/Schedule/Budget.

Lead: Leah Horner

Q4 2024 Current Status ●

- The Tools & Systems Work Group was established in October and meets biweekly. They have completed a summary of existing tools and reports and are finalizing an assessment of tools / reports in the context of needs, referred to in 1C, to be completed by the end of December 2024.
- Work Group is developing a Red-Yellow-Green (RYG) Dashboard Report to assess risks in project delivery health (scope, schedule, budget & community needs) – to be used internally for QPRs in Regions and Programs. Goal is to have RYG Report in place before 2025 Q1 QPRs (by March 2025).
- Utilization of standard tools and systems shall be complete by Q2 2025.

1.E Review Structural reporting or functional placement to improve outcomes

While organizational structure changes may be needed, the first step is to be clear on Roles and Responsibilities within Project Delivery. This should include defining the Authority, expectations, and accountabilities of each of the following areas: 1) Chief Engineer 2) Region Managers 3) Statewide Project Delivery Branch. In conjunction with this, more work should be done to analyze and adjust organizational structure, particular in the disciplines of Right of Way, Geo/Hydro and Bridge.

Lead: Leah Horner

Q4 2024 Current Status

- Scope and expectations are currently being shared throughout the division. For the Right-of-Way and Geo/Hazmat disciplines, we will be engaging existing work groups to assist in analysis. A new work team for Hydraulics that includes both statewide and Region discipline leads is being stood up. For the Bridge discipline – which is already centralized – this body of work will be wrapped into the FHWA review implementation plan. These efforts will initiate in January 2025.

2.A Establish clear agendas for leadership meetings, including standing check-ins on key initiatives, decision-making tracking, action item and key messaging follow-up

Leadership meetings enable informed decisions, reflect clear and shared outcomes, ensure responsible parties and actions are identified, ensure messaging alignment on decisions, priorities, and next steps, and ensure that key initiatives are being implemented effectively. Leadership is effectively engaged on key strategic and operational initiatives.

Lead: Paul Mather

Q4 2024 Current Status 

- Work is completed and is in the implementation stage. New agenda process is working, and ALT is adjusting to improve meeting effectiveness, communications across divisions and follow up on decisions made. Having Strategic Projects and Initiatives Manager capture key decision items and follow-ups is working well.

2.B Implement cross-functional teams for key initiatives

Key initiatives are delivered through cross-functional teams composed of agency staff and leadership as appropriate; key initiatives have clear scope, schedule, deliverables supported by staff and leadership; key initiatives receive clear direction from leadership and offer sufficient visibility to enable informed decision-making, and that all cross-functional teams reach conclusion for their tasks on the agreed upon schedule.

Lead: Paul Mather

Q4 2024 Current Status 

- This work is completed. The initiative tracker has been created and agreed to. Agency Leadership Team is in the process of populating it and making adjustments as needed to ensure cross-functional teams are in place and functioning.

2.C Consider leadership workshop to align agency directions, strategic action plan and consequent actions to measure progress

Consistent leadership alignment with expectations, goals, and success measures to ensure optimal agency performance. Leadership workshop to enhance alignment and develop collaborative approach for delivering strategic initiatives.

Lead: Carolyn Sullivan

Q4 2024 Current Status 

- Workshop occurred 9/9/2024.

2.D Develop roadmap for agency in conjunction with other leading state DOTs on how to transition from current state to the aspirations developed in strategic plan

EST has developed, and the agency is executing, a transition plan to enable the agency to deliver the priorities and outcomes of the Strategic Action Plan. The goal is to align the agency behind the outcomes of the SAP through ongoing communications, provide leadership and staff visibility into progress and challenges, and ensure accountability for achieving progress.

Lead: Travis Brouwer

Q4 2024 Current Status

- Cross-functional team developed, and draft workplan completed.
- Plans being executed for regular check-ins on SAP priorities at OTC and within ODOT leadership groups.
- Communication plan under development and check-in process between presentations to the OTC, expected by 12/20/2024.

2.E Increase staff engagement in strategic decisions and plans

ODOT staff understand agency's strategic direction, understand how individuals and teams fit into broader agency direction, feel engaged in development and have actionable ownership of agency outcomes.

Lead: Kris Strickler and Leah Horner

Q4 2024 Current Status

- Executive Strategy Team has defined outcomes, EST and Agency Leadership Team have discussed and understand gaps in engagement with the Strategic Action Plan and developed workplan to address gaps.

2.F Develop communications plan for both internal and external messages of agency reforms underway

Ensure Strategic Review findings and recommendations, and agency implementation of recommendations, are understood by internal and external audiences; ensure external audiences view findings and agency actions as credible and durable. Create a status of each of the reform areas; report progress quarterly as actionable outcomes.

Lead: Lindsay Baker

Q4 2024 Current Status

- Rollout plan and supplemental materials have been rolled out, as of 7/2024.
- Ongoing communications plan and quarterly progress reporting mechanism finalized.
- Staff engagement continued at Senior Leadership Group and Fall Forum in September and October.

3.A Reinforce responsibility and accountability at all levels

ODOT staff at all levels understand the strategic agency direction, key agency priorities and initiatives, and their individual role in delivering those outcomes. ODOT staff at all levels hold themselves, peers, managers, and employees accountable to outcomes through active, intentional, and consistent performance management. ODOT staff at all levels have clear performance expectations. Leadership provides quarterly review of major programs and projects that includes KPM's, scope/schedule/budget, and current and upcoming issues that need to be elevated.

Lead: Paul Mather and Leah Horner

Q4 2024 Current Status

- Manager and leadership expectations have been developed and communicated from the

director to his reports and from them to their reports.

- The Construction Oversight Review Committee (CORC) was rolled out and initiated in July 2024 to review CCOs for projects >\$50M. CORC meets 2x per month pending agenda items and is reviewing CCOs that meet schedule and cost impact thresholds. The CORC has a charter and guidance document.

3.B Train and develop a sustainable workforce to deliver ODOT programs

Agency is developing staff and leadership succession plan, focusing on positions that are “one deep” and high-risk areas for the organization, and plan for leaders to better understand the work performed within their teams.

Lead: Carolyn Sullivan

Q4 2024 Current Status 

- Updated succession planning document to be completed and submitted to DAS by December 31, 2024.
- Work is on track and being reviewed by Executive Strategy Team to:
 - Develop position- and team-specific succession plans.
 - Develop leadership position-specific core competencies, onboarding plans, and individual development plans as necessary.

3.C Permanently fill key management positions

Fill key positions identified by leadership and ensure agency posture and utilization of temporary, limited duration, and rotational assignments enables leadership development while meeting agency needs and maintaining holistic agency health. **Lead: Carolyn Sullivan**

Q4 2024 Current Status 

- Key positions have been filled with the exception of the PTD Administrator, which will be on rotation until the position is filled, which is expected to occur before the end of February 2025.
- Reviewing enterprise rotation policy; considering stand-alone ODOT rotation policy.
- Modified process for rotations approval for management service and executive service to require Division Administrator approval.

3.D Review advisory committee protocol

Advisory Committees are managed in a consistent and coordinated approach, with clear processes to establish, review, and abolish committees as well as clear expectations and consistent staff support. **Lead: Lindsay Baker**

Q4 2024 Current Status 

- Committee templates have been drafted and are ready for review.
- Advisory committee “community of practice” workgroup is under development and will kick off before 12/31/2024 to review and finalize templates.

- Full implementation of plan due in 7/2025.

DATE: January 6, 2025
TO: Oregon Transportation Commission

FROM: Kristopher W. Strickler
Director

SUBJECT: **Agenda Item I** – Accept Internal Audit Report on Budget and Capital Planning #25-02

Requested Action: Accept the Oregon Department of Transportation's (ODOT) Internal Audit Report #25-02: Internal Audit Report on Budget and Capital Planning.

Background:

The Oregon Department of Transportation (ODOT) has lacked key controls to ensure that its legislative budget is built with an accurate revenue figure. The 2023-25 ODOT budget totaled \$5.9 billion. However, ODOT later realized that there were issues in the budget development process leading to incorrect revenue assumptions made in developing the 2023-25 budget. Revenue was too high by \$1.1 billion. The objectives for this audit were to answer three questions.

1. Has ODOT been using reasonable revenue assumptions in the budget process for recent cycles?
2. Has ODOT taken sufficient actions to correct the 2023-25 budget error and to prevent such an error in the future?
3. Has the agency utilized dedicated HB 2017 funding in alignment with statute?

Outcomes:

ODOT Internal Audit will track ODOT's implementation of the recommendations until actions are completed. A follow-up audit may occur.

Attachments:

ODOT Has Taken Steps to Improve the Budget Development Process, But More Actions Are Needed

Report 25-02
January 9, 2025

Marlene Hartinger, Chief Auditor
James Hanseling, Principal Internal Auditor
Meredith Kim, Senior Internal Auditor

January 9, 2025

ODOT Executive Strategy Team Members:

Kris Strickler, ODOT Director

Travis Brouwer, Assistant Director – Revenue, Finance & Compliance

Leah Horner, Assistant Director – Operations

Lindsay Baker, Assistant Director – Government & External Relations

Serena Stoudamire-Wesley, Assistant Director – Social Equity

Carolyn Sullivan, Chief Administrative Officer

Dear Executive Strategy Team Members:

The Oregon Department of Transportation (ODOT) did not have key controls in place to ensure that its legislative budget was built with an accurate revenue figure. The 2023-25 ODOT budget totaled \$5.9 billion. However, ODOT later realized that there were issues in the budget development process leading to incorrect revenue assumptions made in developing the 2023-25 budget. Revenue was forecasted too high by \$1.1 billion. The objectives for this audit were to answer three questions related to the budget build process, actions taken to prevent future budget errors, and utilization of HB 2017 funds.

In developing the agency's budget, the process did not ensure that a reasonable federal revenue figure was used for the Delivery and Operations Division budget. An over-reliance on the highway cash flow model and a lack of understanding on how STIP programming impacts that model drove the budget error. Steps taken to remedy the budget error have addressed short-term impacts, but additional actions are needed to reduce the opportunity for future errors.

ODOT was able to demonstrate allocating the majority of the HB 2017 funds dedicated for highway purposes. However, a gap of \$173 million remained between what has been allocated and the expected amount based on revenue in the STIP. To reconcile the gap in what ODOT has allocated in the STIP and HB 2017 funds, staff identified other state funds that may fill the gap. We did not make a determination on whether these additional funds meet the statutory requirements for HB 2017 revenue.

Sincerely,

Marlene V. Hartinger, MBA, CPA, CIA
Chief Auditor

ODOT HAS TAKEN STEPS TO IMPROVE THE BUDGET DEVELOPMENT PROCESS, BUT MORE ACTIONS ARE NEEDED.

EXECUTIVE SUMMARY

The Oregon Department of Transportation (ODOT) has lacked key controls to ensure that its legislative budget is built with an accurate revenue figure. The 2023-25 ODOT budget totaled \$5.9 billion. However, ODOT later realized that there were issues in the budget development process leading to incorrect revenue assumptions made in developing the 2023-25 budget. Revenue was too high by \$1.1 billion. The objectives for this audit were to answer three questions.

1. Has ODOT been using reasonable revenue assumptions in the budget process for recent cycles?

State highway fund revenue has been forecasted and budgeted in close alignment with actual revenues across recent budget cycles, but the federal portion has not. ODOT has relied on a highway cash flow model to generate what the federal expenditures would be for the Delivery and Operations Division and then assuming sufficient federal revenues would be available to cover those expenditures. The model uses project information from the Statewide Transportation Improvement Program (STIP) to forecast what expenditures will be during the agency budget period. The federal share of agency revenue was then assumed based on the amount of federal funding for projects in the STIP at the time of budget build. The highway cash flow model has multiple limitations that lead to an inflated forecast of federal expenditures, which in turn lead to an inflated amount of federal revenue. This inflated number was not identified by staff during the budget build.

2. Has ODOT taken sufficient actions to correct the 2023-25 budget error and to prevent such an error in the future?

Further actions are required by ODOT to prevent budget errors occurring in the future. Actions taken so far appear to have remedied the short-term impacts of the budget error. This has been done through adjustments to the STIP, issuance of additional debt, and process changes to how ODOT develops the agency budget. The highway cash flow model was seen by our review as unreliable in forecasting expenditures for an upcoming budget cycle.

3. Has the agency utilized dedicated HB 2017 funding in alignment with statute?

Most of the HB 2017 funding has been programmed in the Statewide Transportation Improvement Program (STIP). We were able to verify approximately 85% of ODOT’s share in dedicated HB 2017 funding areas (bridge, seismic, preservation, culverts, and safety) has been allocated in alignment with statute. Agency staff pointed to two other areas to fill most of the gap: construction of a new maintenance facility and additional state bridge funding that was not programmed as HB 2017 funds in the STIP. Even with this, about a third of safety funds had not been allocated and the preservation and culverts program has been over-programmed.

BACKGROUND

In 2017, the Oregon Legislature passed House Bill 2017 which brought a significant increase of funding to ODOT. The additional state highway fund revenue came from fee increases at DMV, Commerce and Compliance (motor carriers), and the gas tax. At the time of passage, it was estimated that HB 2017 would generate \$5.3 billion in revenue over the first 10 years, including highway and non-highway funding. The bill directed how ODOT would utilize the increased revenue going to the state highway fund. The figure below captures the flow of how funding is to be allocated. The Safe Routes to School allocation increased in January 2023 (from \$10 to \$15 million) and the Interstate 5 Rose Quarter Project¹ (Urban Mobility) annual allocation of \$30 million started in January 2022. The Urban Mobility funds may cover current project costs and debt service on bonds related to the projects.

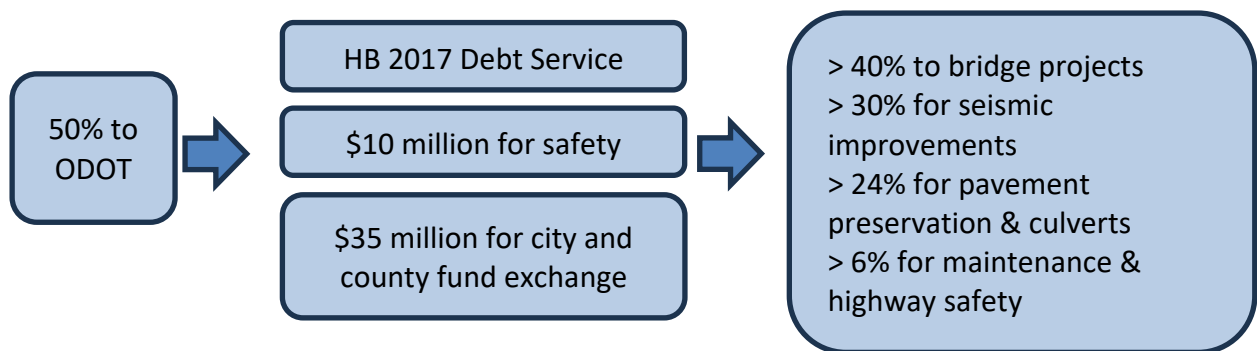

Oregon statute directs how HB 2017 revenue is used.

¹ Initially this was for the Interstate 5 Rose Quarter Project; House Bill 3055 changed this to include additional projects: Interstate 205 Improvements, Interstate 5 Boone Bridge, and implementation of a toll program.

ODOT’s portion is further dictated in statute for usage as shown in the figure below. Debt service payments started in December 2020 for bonds used to pay for named projects in the legislation. Additional named projects were to be funded with HB 2017 revenue and not bond funds. These projects totaled \$168 million. The city and county fund exchange started in 2023 after passage of HB 2101. After these allocations and the \$10 million for safety, the remainder is to be programmed to dedicated areas across ODOT programs.

ODOT’s portion of HB 2017 revenue is allocated based on statute.

ODOT has collected \$2.1 billion in state highway fund revenue from HB 2017 through June 2024. Counties have received \$605 million and cities \$403 million. Revenue forecasts project another \$1.4 billion over the next three years. The revenue from HB 2017 is identified and marked each month by accounting staff. Funds are kept in a fund detail along with other state highway fund revenue. The majority of ODOT’s HB 2017 revenue has been programmed in the STIP.

The STIP is ODOT’s short-term capital improvement program for state and regional transportation systems. The STIP provides project scheduling and resource allocation for most improvements with approved funding and that are likely to be undertaken during the four-year period. Preparation of the STIP determines which projects should be funded, when the work should be done, and what funding source should pay for them. A financial plan is included that identifies all capital and non-capital projects within the state with committed or reasonably available funding.

The following information is included for each project:

- Scope description
- Estimated total project cost
- Federal funds proposed by year
- Proposed source of Federal and non-Federal funding
- Responsible agency

The STIP development process starts about three years prior to its adoption by the Oregon Transportation Commission (OTC), Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA). ODOT is required to include a demonstration of fiscal constraint that shows that the projects included in the STIP can be implemented using the committed or reasonably available revenue sources. This is based on the state and federal dollars forecasted to be available.

AUDIT RESULTS

The development of ODOT's agency budget has lacked controls to ensure a reasonable federal revenue figure is used for the Delivery and Operations Division budget. An over-reliance on the highway cash flow model and a lack of understanding on how STIP programming impacts that model drove the budget error. Steps taken to remedy the budget error have addressed short-term impacts, but additional actions are needed to reduce the chance for future errors. ODOT was able to demonstrate allocating the majority of the HB 2017 funds dedicated for highway purposes. However, a gap of \$173 million remained between what has been allocated and the expected amount based on revenue in the STIP.

ODOT'S BUDGET BUILD PROCESS HAS LACKED NECESSARY CONTROLS TO ENSURE ALIGNMENT BETWEEN PLANNED EXPENDITURES AND PROJECTED REVENUES.

ODOT's development of its biennial budget has relied heavily on the results of agency's highway cash flow model to inform its budget for the capital program that is in the STIP. Staff did not understand how the highway cash flow model assumptions and mechanics were impacted by project funding in the STIP, namely, fund sources and allocations for projects. Staff utilized the highway cash flow model to establish budget figures for the capital program for the next biennium. The model extracts project data from the STIP during the budget build process. The model considers multiple factors in forecasting the amount of expenditures and when they will occur during the two-year budget cycle. Manual adjustments may be made to the model's results for projects not yet programmed in the STIP.

One factor that was not understood was the impact of how the highway cash flow model interpreted advanced construct funding in the STIP. Advanced construct is a tool utilized by ODOT to jump start projects using state funds that may or may not be reimbursed with federal dollars at a later date. Projects programmed in the STIP with advanced construct have the funding responsibility split the same as other projects with federal funding, commonly 89.73% federal and 10.27% state. However, some projects end up being 100% state funded.

The highway cash flow model interprets advanced construct funding as it is programmed in the STIP. This led to an overestimation of how much federal funding the agency would be utilizing to deliver the STIP projects during the budget cycle. It also underestimated the amount of state funds needed to pay the advanced construct expenditures pending federal reimbursement. The volume of advanced construct in recent STIP cycles requires that at least some remain 100% state funded.

Across the last three STIP cycles, the utilization of advanced construct has significantly increased. The 2018-21 STIP had \$229 million of advanced construct. By the 2024-27 STIP cycle, the figure had increased to \$972 million. The chart below shows the increase over the last three STIP cycles. This has coincided with the increase in HB 2017 revenue. When applicable, HB 2017 funds are initially programmed as advanced construct in the STIP to give flexibility to staff managing funding across projects. The HB 2017 funds can be switched out for federal funds at a later date.

The Amount of Advanced Construct Programmed in the First Two Years of the STIP Significantly Increased in the Last Two STIP Cycles.

At the project level, only state funds are used to pay for expenditures initially. No federal reimbursement is done unless the agency decides to do so. This decision is made separate from the group that manages the highway cash flow model. The near-term impact on state funds can be sizeable on a single project as seen in the table below, even if eventually reimbursed with federal dollars.

	Construction Funding	STIP Federal Share	STIP State Share	Actual State Share as Advanced Construct
Project A	\$38,000,000	\$34,097,400	\$3,902,600	\$38,000,000
Project B	\$9,700,000	\$8,945,340	\$754,660	\$9,700,000
Project C	\$12,476,467	\$11,228,820	\$1,247,647	\$12,476,467

A second issue that contributed to budget issues for the 2023-25 biennium, and likely the 2021-23 biennium also, was the budget build process relied strictly on the funding projections from the highway cash flow model derived from STIP programmed amounts to determine how much federal as other revenue² ODOT would receive.

There was no check on the reasonableness of the figure with historical actuals. Again, the cash flow model extracts the projects from the STIP and forecasts the expected expenditures during the biennium. Since the model is using funding breakdown for advanced construct projects with a high percentage of federal reimbursement, that translates into a significantly higher federal as other revenue expectation than what would be likely based on historical trends. This revenue shift can be seen in the chart below that includes the main revenue sources for ODOT for each legislatively approved budget going back to 2013-15. The large increase of federal as other revenue coincides with the large increase of advanced construct programmed in the STIP seen on the previous page. None of the three state sources had nearly the same growth rate.

² In the ODOT budget, federal as other revenue is the formula funds and any competitive grants received from FHWA. Most of these funds requires a 10.27% match.

Federal revenue grew much fast than other revenue sources for ODOT in the 2021-23 & 2023-25 budget cycles.

The increase to federal revenue for the 2021-23 and 2023-25 budgets was a significant increase over prior years. The amount budgeted was a 38% increase (\$489 million) in 2021-23 and 39% increase (\$698 million) in 2023-25 from the prior budget. Going back to fiscal year 2020, ODOT has budgeted more federal revenue than what has been received. In 2020, the gap was \$198 million and rose to over \$600 million in 2024. The chart below shows the comparison of the budgeted amount to actuals going back to fiscal year 2015.

Actual federal as other revenue was much less than budgeted revenue going back to 2020.

Figures in millions.

In contrast to the federal as other revenue, state revenue actuals have aligned much closer to the amount in the agency budget. The state revenue figures used in the agency budget come from the revenue forecasts completed twice a year. We reviewed revenue forecasts and compared to actuals to see how well the forecasts tracked with actuals. Forecasts have been fairly accurate in projecting what revenue will be that becomes more accurate as the forecast nears the actual year. Of note, forecasts prior to December 2017 were not included in the analysis since those did not include the additional revenue from HB 2017.

Actual state revenue has aligned closely with the budgeted amount over the last four biennium.

Figures in millions.

The process used to develop the 2023-25 agency budget, namely the amount of federal as other revenue left ODOT short \$1,175 million to fulfill commitments for the biennium. This issue is further exacerbated in that staff did not ensure that there was sufficient state revenue to deliver the 2024-27 STIP as programmed. Available state revenues could not support delivery of what is in the STIP for 2024 and 2025. Prior STIP cycles were also not checked against the agency budget and available state dollars. Per staff, the stance has been that there is always state revenue available to deliver on what is programmed in the STIP. Checking that the budget and STIP align was not seen as necessary. However, ODOT’s current cash flow challenges have put limits on the availability of state funds.

FURTHER CORRECTIVE ACTIONS NECESSARY BUT STEPS TAKEN TO DATE HAVE IMPROVED THE BUDGET PROCESS.

ODOT has taken multiple steps to address the issues leading to this disconnect between the amount of federal as other revenue budgeted to what is received. The results from the highway cash flow model are now checked with historical actuals to ensure the budget figure is reasonable. Staff have also added a step to adjust the model results accounting for advanced construct projects in the STIP. All advanced construct funding is considered 100% state funded instead of what the STIP lists as the federal and state split.

The STIP development process will also take steps to check that the STIP is constrained to the available state revenues to support project delivery. One change already made to the 2024-27 STIP and will be done for future STIP rounds, is balancing out the volume of work across the STIP years. The 2024-27 STIP was heavily frontloaded with more projects planned in the first two years compared to the second two years. The image below captures how the 2024-27 STIP was initially programmed and the change made to balance out the volume of projects across all four years.

ODOT delayed projects in the 2024-27 STIP to balance the volume of expenditures in each year.

From ODOT presentation made to the OTC in May 2024.

Supporting documents used to develop the agency budget have been adjusted to include HB 2017 revenue as a standalone line item instead of including it with all state highway revenue. The change has also included identifying the specific uses of HB 2017 to show how the funds are being allocated in accordance with statute. The supporting documents for the 2025-27 agency request budget clearly showed this change and the figures were accurate based on forecasted revenue.

Other actions taken by the agency to address the revenue gap included issuance of additional debt that was not included in the 2023-25 budget. The amount totaled \$497 million and was done through a combination of commercial paper and GARVEE bonds. Commercial paper is a short-term borrowing program to provide more liquidity for the agency. GARVEE bonds can be paid back using federal funds. The additional debt in combination with the STIP amendment was expected to address the budget gap and state highway fund balance issues for the agency.

AGENCY RECORDS COULD NOT DEMONSTRATE THAT ALL HB 2017 REVENUE HAS BEEN ALLOCATED IN ALIGNMENT WITH STATUTORY REQUIREMENTS.

Records could not demonstrate how ODOT used \$98 million of HB 2017 revenue. Legislation did not direct ODOT to program all funds in the STIP but in practice, this is how ODOT has allocated the vast majority of the funds. The amount of HB 2017 revenue allocated to dedicated funding programs in the STIP through 2027 totaled \$986 million. Plus, an additional \$50 million for a capital construction project³ brings the total to \$1,036 million. But based on revenues, the total should be \$1,183 million. Within the STIP, ODOT identified a funding responsibility for the dedicated HB 2017 revenue: bridge/seismic, preservation, culverts, and safety⁴.

The HB 2017 legislation directed how ODOT was to allocate the 50% of the revenue it receives. First, \$10 million goes to safety, and ODOT pays for debt service on bonds issued for named projects under the legislation. The remainder is split in the following way for dedicated programs:

- 40% for bridge projects
- 30% for seismic projects
- 24% for preservation and culvert projects
- 6% for highway maintenance and safety improvements

In 2023, legislation was passed that directed ODOT to allocate \$35 million of HB 2017 revenue to the city and county fund exchange program.⁵ This program allows local agencies to exchange federal highway funds with state dollars.

³ The project is a consolidation of three office/maintenance stations into one location that will be seismically resilient, serving the south coast area of Oregon.

⁴ Safety is broken up into multiple funding responsibilities: Statewide Safety, Region 1, Region 2, Region 3, Region 4, and Region 5. The total of each one accounts for safety in the report.

⁵ HB 2101

This additional \$35 million comes out of ODOT’s share prior to the allocation to the dedicated programs moving forward, and ODOT backfills the state money with federal funds that were previously available to local governments.

The chart below shows the gap between the amounts allocated to each program in the STIP compared to ODOT’s total revenue for each of the categories. The expected amount was calculated using actual revenue collected through fiscal year 2024 and forecasted revenue through fiscal year 2027. It focuses on the funds allocated for bridge, seismic, preservation and culverts, and safety. The 6% for highway maintenance and safety improvements was not included in the audit scope.

The allocation of HB 2017 revenue to dedicated programs was less than the expected amounts in two areas.

To reconcile the gap in what ODOT has allocated in the STIP and HB 2017 funds for bridge and seismic, staff pointed to two other areas. The first is \$117 million in state bridge funds allocated under other funding responsibilities. These are state dollars that were not programmed as being funded with HB 2017 revenue in the STIP. The second is usage of HB 2017 seismic funds to pay for a new maintenance facility. As a capital construction project, it is not included in the STIP and has been included in recent legislatively adopted budgets. If these funds are included, it would more than cover the gap between the expected amount of bridge and seismic funds to what we expected based on revenue. We did not make a determination on whether these additional funds meet the statutory requirements for HB 2017 revenue.

Funding allocation for preservation and culverts is overprescribed by \$13 million. To address the \$30 million gap in safety funds, staff identified an additional \$3.2 million in state funds allocated to safety projects outside of the dedicated HB 2017 safety funds that could be used to fill the gap. As with bridge and seismic, we did not make a determination on whether these funds meet the statutory requirements for HB 2017 revenue. Additionally, staff shared that a separate funding category for HB 2017 safety was not initially created in the STIP.

ODOT'S HIGHWAY CASH FLOW MODEL HAS HAD A LOW LEVEL OF ACCURACY IN FORECASTING CAPITAL CONSTRUCTION EXPENDITURES OVER RECENT YEARS.

The highway cash flow model is limited its ability to reasonably forecast expenditures due to project delivery uncertainty and model mechanics. Across the four years reviewed, the model consistently forecasted amounts with high variability over and under actual expenditures. Across calendar years 2020-2023, we reviewed a subset of projects to determine how actual construction expenditures aligned with what the highway cash flow model projected for coming year. We identified two issues in the mechanics of how the cash flow model operates that contributed to the forecast being different than actuals by a significant amount. The first was the model including the entire construction budget when only a portion impacts ODOT's cash flow and the second was under or overestimating the rate of expenditures in the coming year.

We reviewed 40 projects from each year for a total of 160.⁶ Across all four years, there were 2,186 projects included in the November cash flow model forecasts. Auditor judgment was used to select a group of projects meeting a mix of criteria: the construction contract already bid, planned to bid in the coming year, a range of forecasted expenditures, and different project types.

We did not consider a significant schedule or budget change for a project during the year reviewed as reason for the cash flow model being inaccurate.

We did not consider a significant schedule or budget change for a project during the year reviewed as reason for the cash flow model being inaccurate. It was expected that a significant schedule change, such as delaying when the construction contract bid would negatively impact the accuracy of the cash flow model. Additionally, if a construction budget was significantly changed causing the forecast to differ from the actuals, we did not attribute the difference to cash flow model. We considered a significant schedule change to be more than a 30-day change in the let date. A significant budget change was 10% (plus or minus) or more. If either of these changes occurred for a project, we considered whether it was the driver for the difference between the forecasted and actual construction expenditures.

One contributing factor on schedule changes impacting the cash flow model was the STIP not having accurate bid let dates.

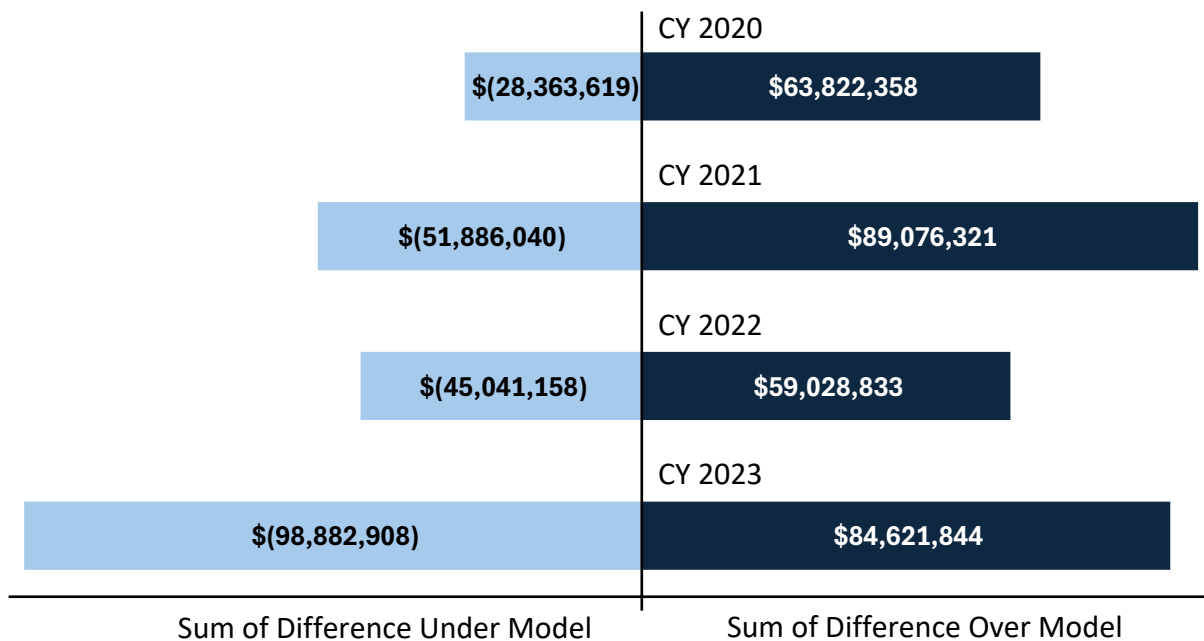

One contributing factor on schedule changes impacting the cash flow model was the STIP not having accurate bid let dates. The cash flow model relies on the bid let date in the STIP to know when construction expenditures are likely to begin. We saw multiple projects that did not have an accurate bid let date in the STIP. This can cause projects to have forecasted construction expenditures well before work begins. For example, one project's bid let date was 7/24/2019 but the contract wasn't let until January 2022. The cash flow model included the project in forecasting expenditures in 2020 and 2021. The STIP was not updated with the actual bid let date.

Of the 160 projects we reviewed, 44 fell into this category of having a significant budget or schedule change. The cash flow model forecasted \$203 million for these projects with actuals being \$94 million, a net difference of \$109 million. Actual construction expenditures differed considerably with the forecasted amounts for the remaining 116 projects.

⁶ The same project may be included in different years.

Combining the differences across projects can hide issues in how the cash flow model operates. The differences in the actual versus the projected expenditures were attributed to the how the cash flow model operates. The net difference was \$72 million for the projects from a total forecast amount of \$754 million. But if the difference is taken on an absolute value, the total difference is \$521 million. The chart below shows the total amount of difference, over and under, for each year reviewed. The total amount of over (positive total) is the sum of when the model forecasted more than actuals. The total amount of under (negative total) is the sum of when the model forecasted less than actuals.⁷

The total amount of over/under difference in the forecast and actuals shows a significant issue versus looking at the net difference.

⁷ The same chart can be seen in appendix A for projects that had a significant schedule or budget change. Appendix B includes a breakdown by each project included in the review.

Project expenditure forecasts were missed consistently by the cash flow model across the four years reviewed. Forecasted expenditures often had a consistent pattern over an estimated project timeline with seasonal changes. In the actuals, project expenditures occurred much faster. An example is seen in the graph below of a project that expended over \$15 million by the 11th month compared to the forecast which showed that amount in the 24th month.

The project construction expenditures occurred much faster hitting \$15 million 13 months sooner than forecasted.

In contrast, projects also had construction expenditures that occurred at a slower rate compared to the forecast. Below is an example of one project that had a forecasted total of \$11.2 million but actuals were \$6.4 million for calendar year 2021.

Forecasted construction expenditures were \$4.8 million higher compared to actuals for the project across the calendar year.

A systemic issue of not accounting for how much of a project’s construction expenditures was seen in the cash flow model across certain project types. Projects with a connection to local agencies, the Washington State DOT (WSDOT), and projects with funding from the Western Federal Lands Highway Division (WFLHD)⁸ all had common discrepancies. The cash flow model included the entire construction amount from the STIP and used that figure as the basis for the expenditure forecast. However, the cash flow model did not account for whether ODOT would pay a portion of or all the expenditures.

For many of these projects, ODOT incurred only a small portion of the construction expenditures. Often, none of a project’s forecasted expenditures were incurred by ODOT. Across the four years, the cash flow model forecasted \$226 million in construction expenditures with actuals being \$10.9 million.

⁸ WFLDH is with the Office of Federal Lands Highway which promotes effective, efficient, and reliable administration for a coordinated program of federal public roads and bridges; to protect and enhance natural resources; and to provide needed transportation access for Native Americans.

The highway cash flow model will include the entire project's construction expenditures to show how much cash is needed to fund the project.

The STIP identifies the different funding sources for a project. For an ODOT project, the state will pay for the entire project with FHWA reimbursing ODOT for the federal share (typically 89.73%) after the expense is paid. The highway cash flow model will include the entire project's construction expenditures to show how much cash is needed to fund the project before being reimbursed. On a local agency project, ODOT can be billed for a share of the project cost. In practice, several projects didn't follow this pattern.

One local agency project shows how impactful it is when expenditures are not passed through ODOT as typically assumed in the highway cash flow model. This project was 100% local agency funded in the STIP, yet the cash flow model included the entire construction phase in the November 2019 report. The model projected it would have \$1.3 million in expenditures, but the actuals were \$0. It showed up again the November 2020-22 reports with a projected amount of \$7.3 million each year. And each year no actual expenditures came through ODOT as the project doesn't have an expenditure account for transactions to be billed to.

The cash flow model projected \$16.6 million in expenditures for one project but actuals were only \$71,280.

Projects tied to the WFLHD funding program consistently overestimated the amount of construction expenditures that would occur. These projects and contracts are managed by FHWA with ODOT only expending the state share of the cost. This amount is much less than what is programmed in the STIP. One project had a construction estimate of \$21.5 million in the STIP and the cash flow model projected \$16.6 million in expenditures in calendar year 2022. However, the actuals were only \$71,280. The same pattern was seen across all projects within this funding program. In total, the cash model projected \$226 million in expenditures, yet actuals were \$10.9 million. Some of these projects were included year over year with little to no actual expenditures.

The impact was significant as this pattern played out across the years reviewed. The chart below shows how sizeable the difference was for the projects that the entire construction phase was included in the cash flow model but only a small, if any, expenditures actually came through ODOT. Projects included in the chart data were local agency, joint projects with WSDOT, and WFLHD.

The forecated construction expenditures were significantly more than actuals across multiple years.

These projects can linger in the model year after year because they are in the STIP and little to no expenditures have come through ODOT. One project was included in the forecast three consecutive years with over \$16 million in projected expenditures. In total, across those three years actual expenditures were just over \$1.6 million in the middle year. However, the cash flow model continued to include the project with a high amount of projected construction expenditures. Another project had \$16.9 million forecasted in one year and \$16.6 million forecasted in the following year. Actual expenditures were \$252,362 and \$49,757.

The highway cash flow model holds another limitation tied to how it performs in forecasting construction expenditures. The model runs on older technology (COBOL) and was likely developed in the 1990s. We could not determine exactly when the model was developed and implemented since it predates current staff. Feedback from the ODOT Information Systems Branch staff is that the model couldn't be modified from how it currently operates and would take a tremendous amount of effort to determine what exactly it is doing. Program staff using the model also noted the inability to understand exactly what it is doing as a limitation to know whether it is working or not.

CONCLUSION

ODOT has taken steps to address issues arising from the 2023-25 budget error, but further actions are necessary. Carrying the planned actions out will be key to preventing future errors. The limitations and accuracy issues with the highway cash flow model reduce its reliability as a tool to inform what figures should be used in building ODOT's budget. Current steps to monitor and track allocation of HB 2017 revenue has left dedicated programs short of funding. Although ODOT may be able to fill the gap with other state dollars, improvements are needed to demonstrate how statutory requirements are met.

RECOMMENDATIONS

ODOT should:

1. Complete a reconciliation of forecasted HB 2017 revenue with actual revenue at least every biennium to ensure allocation follows statutory requirements.
2. Create a fund detail to hold HB 2017 revenue separate from other state highway fund revenue.
3. Ensure alignment between the STIP and the agency budget for how state highway revenue is committed. Retain supporting documentation for both the STIP and budget development on what the commitment of state highway revenue is.
4. Review the 2025-27 budget for potential adjustments per the observations made concerning the highway cash flow model's use to develop the Delivery and Operations Division budget.
5. Ensure bid let dates in the STIP are kept current based on project schedule changes and are updated timely.
6. Explore viable alternatives to the highway cash flow model and move to a new approach for developing the Delivery and Operations Division budget. Consider other options for forecasting construction expenditures that meet the agency's needs to support adherence to the budget and cash flow.

**OBJECTIVE, SCOPE AND
METHODOLOGY**

The objectives for the audit included the following:

1. Has ODOT been using reasonable revenue assumptions in the budget process for recent cycles?
2. Has ODOT taken sufficient actions to correct the 2023-25 budget error and to prevent such an error in the future?
3. Has the agency utilized dedicated HB 2017 funding in alignment with statute?

Audit scope for the first objective was the 2013-15 to 2023-25 budget cycles. For the second objective, we reviewed actions taken since June 1, 2024, with our initial feedback to agency management occurring on May 31, 2024. The third objective covered the start of HB 2017 revenue in January 2018 and reviewed allocation through 2027. Revenue from bonds issued to deliver HB 2017 projects and HB 2017 non-highway revenue was not included in the audit scope. Federal revenue outside of Delivery and Operations was not included in the scope.

We reviewed the programmed revenue supporting each budget against corresponding revenue forecasts and actuals to determine if revenue assumptions were reasonable. Budgeted amounts for federal as other funding were matched against reporting from FHWA on the allocation estimates for Oregon.

To determine if dedicated HB 2017 funding was allocated to funding programs as listed in statute, the following steps were completed:

- Reviewed ODOT accounting records to calculate how much HB 2017 has been received.
- Reviewed allocation of HB 2017 revenue as recorded in the STIP.
- Met with agency staff to understand how revenue has been utilized.
- We did not review project expenditures for compliance with statute.

The highway cash flow model is run monthly by staff. We reviewed the February, May, August, and November reports from 2019-2024.⁹ The results from the model from the November 2019-2022 reports were matched against actuals from the following calendar year. TEAMS records were used to determine what actuals were. Only construction expenditures were included in the review and preliminary engineering, right of way, or utility phases were excluded. The highway cash flow model doesn't include these areas.

Additional steps taken to complete the audit include:

- Reviewed applicable Oregon Revised Statute and legislative documents.
- Reviewed ODOT materials related to the budget, STIP, revenue forecasts, and accounting records.
- Reviewed FHWA funding allocations and related materials.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

⁹ November 2024 was not included since testing occurred prior to that month.

MANAGEMENT RESPONSE

Oregon

Tina Kotek, Governor

Oregon Department of Transportation
Finance & Budget Division
355 Capitol Street NE

January 8, 2025

Marlene Hartinger
ODOT Chief of Audit Services
355 Capitol Street NE
Salem, OR 97301

Re: Budget and Capital Planning Audit – Management Response

Dear Ms. Hartinger,

As part of the Strategic Review an internal audit was conducted to review financial processes in ODOT to answer three specific questions.

1. Has ODOT been using reasonable revenue assumptions in the budget process for recent cycles?
2. Has ODOT taken sufficient actions to correct the 2023-25 budget error and to prevent such an error in the future?
3. Has the agency utilized dedicated HB 2017 funding in alignment with statute?

The audit spanned several months and worked with a variety of Finance and Budget Division (FBD) staff and leadership to build a comprehensive understanding of the current financial processes and procedures to answer the three questions. The audit shows while some elements of the budget process are in good shape and changes already in place have moved the agency in the right direction, there is still work to be done.

For the first question the audit found the revenue assumptions for state revenue were shown to be reasonable, while the federal assumptions were not. Beginning with the 2025-2027 Agency Request Budget, FBD has already adjusted the method for forecasting federal revenue, shifting from using the Delivery & Operations (D&O) Division cash flow model to using historic actual federal funds as the basis for the projection. While this change fixes this specific problem, questions linger about the D&O cash flow tool historically used for forecasting federal expenditures.

Regarding the second question the audit found that actions taken so far have solved the short-term issue, but some longer-term concerns remain, particularly with the D&O cash flow model.

In looking at the third question, the audit found the agency has not set up a fund structure to readily answer this question and documentation is lacking around decision making when HB 2017 was first passed, leading to unclear categorical expenditures of these funds. During the process of the audit, FBD was able to identify eligible expenditures for all HB 2017 revenue.

January 8, 2025

Page | 2

However, the lack of a separate fund structure made this difficult or impossible to track, and documentation of key decisions made immediately after passage of HB 2017 was missing. Based on the audit findings in answering these questions, the auditors came to a series of six recommendations. Below are the recommendations and the agency's immediate plan for implementing each recommendation.

1. Complete a reconciliation of forecasted HB 2017 revenue with actual revenue at least every biennium to ensure allocation follows statutory requirements.

If forecasted revenue does not match actual revenue as allocated in the Statewide Transportation Improvement Program (STIP), then the STIP becomes either over or under allocated over time. To prevent this from occurring, regular adjustments need to be made as actuals come in to ensure any imbalance is corrected in the current or future STIP. To address this recommendation, the FBD will:

- Report to the OTC actuals each fiscal year compared to allocated amounts, beginning with fiscal year 2025, including a lookback of prior fiscal years.
- Adjust either the next STIP, or if possible, work with the OTC to adjust the current STIP to account for the difference between actuals and allocated amounts.

2. Create a fund detail to hold HB 2017 revenue separate from other state highway fund revenue.

Currently the additional HB 2017 revenue that stays in ODOT dedicated to safety, bridge, seismic, preservation and maintenance does not have a separate fund in the agency's accounting system that would allow easy tracking of revenue and expenditures. Instead, these revenues and expenditures are comingled with other State Highway Funds. To address this recommendation, the FBD will:

- Beginning July 2025 for state FY 2026, create specific fund details within the broader HB 2017 capital program fund to place the monthly ODOT share of incremental revenues from HB 2017.
- On a monthly basis, transfer the Maintenance funds to the appropriate maintenance fund detail.
- Beginning with new STIP project programming in July 2025, create Expenditure Accounts (EA's) to point to the new fund detail structure.

3. Ensure alignment between the STIP and the agency budget for how state highway revenue is committed. Retain supporting documentation for both the STIP and budget development on what the commitment of state highway revenue is.

Each biennial budget and three-year STIP relies on point in time forecasts for State Highway Fund revenue. This becomes a problem in that the time periods do not align, nor do they use the same forecasts for developing their estimates of State Highway Funds. Accordingly, the two financial documents will not match as each is developed due to timing. However, that does not

January 8, 2025

Page | 3

mean they cannot be adjusted throughout the STIP and/or budget cycle. To address this recommendation, the FBD will:

- Develop a report to show total State Highway Fund revenue included in the STIP by allocation year.
 - Compare the reported amount to the State Highway Fund revenue available to the Project Delivery appropriation in the budget.
 - Using the most recent available State Highway Fund revenue forecast and/or actuals, propose adjustments to the STIP and/or budget if necessary to ensure alignment in revenue.
 - Document this process and develop a report to the ODOT Fiscal Policy Steering Team for recommended changes to the OTC.
 - Create ongoing detailed documentation of all STIP investment decisions so the agency and decisionmakers can easily understand and trace how and where different funds were allocated in the STIP.
4. Review the 2025-27 budget for potential adjustments per the observations made concerning the highway cash flow model's use to develop the Delivery and Operations Division budget.

In prior biennia, strict reliance on the D&O cash flow model's expected expenditures without adjustments proved to overstate the amount of revenue required. This error was explored during the 2024 calendar year and development of the 2025-27 budget bypassed this old process, instead using historic actual federal reimbursements to forecast 2025-2027 revenue. However, validation of this change is warranted. To address this recommendation, the FBD will:

- Develop a report on the use of the D&O cash flow model in development of the 2025-27 budget and deliver it to the Fiscal Policy Steering Team for recommendation of any proposed changes to the 2025-27 budget and for development of the 2027-29 budget.
5. Ensure bid let dates in the STIP are kept current based on project schedule changes and are updated timely.

The Delivery and Operations cash flow model uses STIP bid let dates for forecasting expenditures over time. Having the most accurate and up to date information on these dates will ensure more accurate forecast results. To address this recommendation, the FBD will:

- Work with D&O Project Controls Office to review bid/let dates every quarter to ensure the most accurate bid/let dates are in the STIP Financial Plan system (STIP-FP). Future construction projects currently in the STIP will be reviewed quarterly for bid/let accuracy.
6. Explore viable alternatives to the highway cash flow model and move to a new approach for developing the Delivery and Operations Division budget. Consider other options for

January 8, 2025

Page | 4

forecasting construction expenditures that meet the agency's needs to support adherence to the budget and cash flow.

The Delivery and Operations cash flow model was developed internally during the 1990's and no one currently completely understands the context for some of the model assumptions or can fully update its parameters. An attempt to replace this model was undertaken about a decade ago, but ultimately failed. While it continues to serve a vital function as the only tool available to forecast expenditures at the project level, we must continue to look for a new alternative. To address this recommendation, the FBD will:

- Continue to rely primarily on federal actual reimbursements in setting the Project Delivery budget rather than the cash flow model, as was done for the 2025-2027 Agency Request Budget.
- Document the current uses of the cash flow model output.
- Based on the uses of the cash flow model, identify the components required for a new model.
- Report results to the Fiscal Policy Steering Team no later than June 30th, 2025.
- Based on the requirements, research potential replacement model options.
- Move to purchase and deploy a new model as funds become available.

Beyond the specific findings included in the audit, FBD is taking several other steps to address the budget error and tighten up agency financial management.

Develop a new State Highway Fund revenue and expenditure tracking model. Historically, a model called the "Funding Allocation" provided actual and projected revenue and expenditures as well as a State Highway Fund cash balance. This model proved to be increasingly difficult to update and was not adaptable to our changing financial needs. During 2024, a new model was developed looking at both State Highway Fund and federal revenues and expenditures and providing a cash balance forecast for the State Highway Fund. This new tool provides a check on the D&O cash flow model as well as providing a comparison of actuals and forecast to the agency budget numbers.

Monitoring Delivery and Operations expenditures in the 2023-2025 budget to better understand the budget error and solutions for future biennia. Because the budget error overestimated federal revenue for the 2023-2025 budget, FBD has been closely monitoring expenditures in the D&O Project Delivery and Local Government budgets to ensure that we do not overspend available resources, as well as producing updated federal revenue forecasts on a quarterly basis. As of November 30, 2024, the Project Delivery and Local Government budget areas had spent \$1.673 billion, just 74% of the anticipated expenditures to that date. This means that the budget error appears to have overestimated both actual federal revenue and actual expenditures, reducing the likelihood that ODOT will overspend against available resources.

Addressing how ODOT uses the federal "Advance Construction" (AC) tool and monitoring balances of AC obligations. A significant portion of the budget error related to how the D&O cash flow model translated projects where funds were programmed using the AC tool. When ODOT programs a project in the STIP as AC, it allows the agency to spend state funds with the

January 8, 2025

Page | 5

option to receive federal reimbursements for some or all of the project in the future. To provide flexibility for receive federal reimbursements on projects, more projects were programmed using AC than the available federal funding. However, the cash flow model converted all projects programmed as AC into federal reimbursements in the year of expenditure—even though not all projects would be federally reimbursed, and reimbursements often are not received for several years. To address issues around use of AC, FBD is modifying how it manages its use of AC, including monitoring projects using AC and converting state expenditures to federal reimbursements more expeditiously. In addition, the D&O cash flow model has been modified to assume all AC marked projects are assumed 100% State Highway Funded, rather than any percentage of federal. This change provides a conservative estimate of the State Highway Fund resources required during a biennium, not knowing when or if an AC project will be converted to federal.

Thank you for the opportunity to provide a response to the audit and for the diligent work of the audit staff in completing the audit.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel Porter". The signature is stylized and cursive.

Daniel Porter
Finance & Budget Division Administrator

APPENDIX A

The total amount of over/under difference in the forecast and actuals for projects with a significant schedule or budget change driving the difference.

APPENDIX B

The difference between the forecasted and actual construction expenditures varied widely across projects.
Data includes the 116 projects that the difference is attributed to the highway cash flow model.

The difference between the forecasted and actual construction expenditures varied widely across projects. Data includes the 44 projects that the difference is attributed to a significant schedule or budget change.

To: Capital Projects Advisory Board
From: Randy Gengler, Facilities Services Branch Manager
Subject: Plan Submission Cover Memo

Agency Accomplishments:

ODOT has made significant improvements in reducing leased office space and moving staff into ODOT owned space. We have ended 7 leases totaling 168,000 SF and saving the agency \$5.5 million in the 2023-25 biennium. ODOT has made the decision to end another lease by September 2025 of 38,000 SF saving another \$750,000 in 2027-29. ODOT is at 56% in meeting the DAS goal in reducing office space by 30% by 2027.

ODOT is currently analyzing our largest 40 office buildings to determine what available space can be created in hopes of leasing that out to other state agencies. ODOT worked with DAS Leasing to create a small office lease policy and lease template, and DAS delegated authority to ODOT to use these in leasing space directly with other agencies. Our goal is to free up the other 44% of the 30% DAS reduction goal, then work with DAS Leasing on filling that space.

ODOT Facilities has fully implemented the use of zLink for conducting our Facilities Condition Assessments and have "cleaned up" all our deficiency data by confirming the right deficiencies are listed, updating the urgency of action (priority) and updating the cost estimates. Because of this our total deficiency need has grown to \$500 million, representing an FCI of .40. Unfortunately, ODOT does not have the funding available to adequately address this need, but at least we have good data and know what our true need is.

Agency Challenge:

For several years ODOT has been forecasting a revenue shortfall. In 2021-23 we began reducing our spending, and in 2023-25 implemented a 10% budget reduction across the agency. Our major maintenance funding was reduced by 40% this biennium and our Capital Improvement funding will be reduced by 36% in 2025-27. Unless ODOT can increase our revenue or get additional funding from the legislature, we are looking at up to a 30% agency wide reduction in 2025-27 to compensate for a \$350 million shortfall.

Agency 2025-27 Plan:

ODOT has put a hold on all Capital Construction projects in 2025-27. We use Capital Improvement funds for new structures and major improvements, and use our Major Maintenance for all standard maintenance and replacements. Due to our reductions in both MM and CI for 2025-27, ODOT has made the decision to not construct anything new in 2025-27 and spend all CI and MM funds on the highest priority building repairs. We have identified 47 roof projects; 57 HVAC projects, and 7 exterior envelop projects that are critically needed. Our desire is to continue replacing buildings that are obsolete, but with our reductions, that just isn't possible now.

Major Construction:

ODOT is not spending any Capital Construction funding in 2025-27. We are wrapping up three CC projects in 2023-25, and putting a hold on CC until 2027-29.

Oregon Department of Transportation

ODOT Facilities Services Branch

2025-27 Agency Facility Plan

Capital Projects Advisory Board

August 9, 2024

Oregon Department of Transportation 25-27 Agency Facility
Plan - Capital Projects Advisory Board

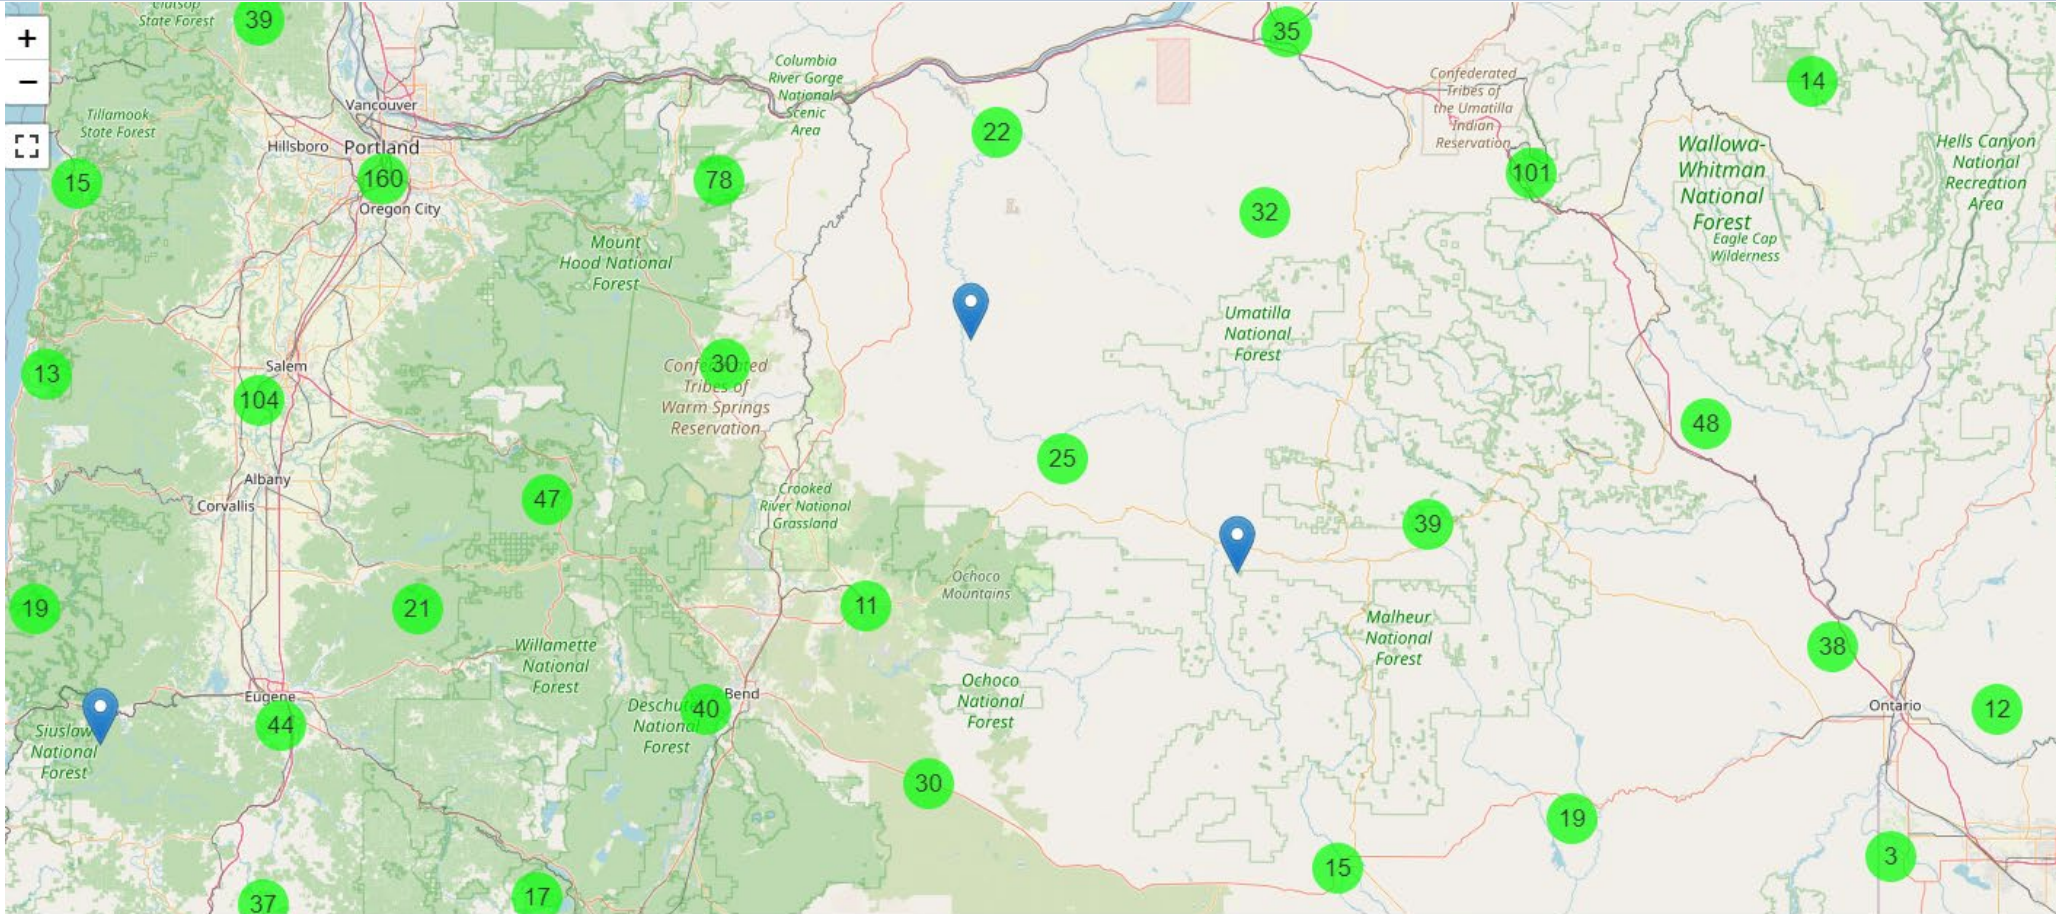

Mission

ODOT provides a safe and reliable multimodal transportation system that connects people and helps Oregon's communities and economy thrive.

Mission

ODOT's Portfolio

- Total Facilities – Approximately 1,200*
- Total Gross Square Footage (GSF) – 3.4M
- Total Current Replacement Value (CRV) – \$1.2B**
- Total Major Facilities (over \$1M CRV)
 - Count – 371
 - GSF – 2.8M
 - CRV – \$1.0B

*Count is all ODOT owned buildings; includes Safety Rest Areas that we maintain

**Does not include CRV for grounds related assets

ODOT's Portfolio

ODOT's Portfolio By Building Type

Planning Factors

Emergent Issues/Business Trends

ODOT's Funding

Funding Type	17-19 Expended	19-21 Expended	21-23 Expended	23-25 Budgeted	25-27 Estimated
Major Maintenance (DM/CR)	\$9,932,746	\$7,298,922	\$4,482,763	\$2,700,000	\$2,700,000
ESB	\$3,636,322	\$3,101,345	\$4,858,277	\$1,415,140	\$1,400,000
Tenant Funded	\$4,533,957	\$3,360,208	\$4,514,207	\$1,370,312	\$1,000,000
Total DM Funding	\$18,103,025	\$13,760,475	\$13,855,247	\$5,485,452	\$5,100,000
Capital Improvement (Modernization)	\$8,781,294	\$7,452,055	\$7,827,953	\$7,574,561	\$4,862,000
Capital Construction (CC)	\$3,841,039	\$8,767,268	\$30,513,862	\$11,863,117	\$0
Total Modernization Funding	\$12,622,333	\$16,219,323	\$38,341,815	\$19,437,678	\$4,862,000 **

** 25-27 CI funds will be used for deferred maintenance, not modernization.

Planning Factors

Current/Future Demand

- 3,500 identified deficiencies in 719 owned buildings, totaling \$485 M
- Immediate Needs FCI = $\frac{\text{Current Priority Deferred Maintenance} + \text{Capital Renewal}}{\text{CRV}} = \frac{\$39 \text{ M}}{\$1.2 \text{ B}} = \mathbf{0.032}$
- Total FCI = $\frac{\text{Total Deferred Maintenance} + \text{Capital Renewal}}{\text{CRV}} = \frac{\$485 \text{ M}}{\$1.2 \text{ B}} = \mathbf{0.40}$
- Needed funding for improvements is 4.79 % of CRV, per year:
 - $4.79 \% \times \$1.2\text{B} = \frac{\$57 \text{ M}}{\text{year}} = \frac{\$114 \text{ M}}{\text{biennium}}$
 - As CRV increases with annual inflation, annual funding needs also increase
- Current funding is less than \$5.5 M for 23-25, which is only **0.45%** of CRV

Planning Factors

Strategic Opportunities

- ❖ Lease consolidations & independent leasing policy
 - 53% progress toward meeting the DAS 30% Office reduction goal
- ❖ Prioritize deferred maintenance to keep buildings operational
- ❖ Looking at bonding for master plan

Facility Strategies

Risk/Climate Change Mitigation

- ✓ Electric Vehicle Charger Installation
- ✓ Meeting/Exceeding SEED
- ✓ Fuel Switching, where applicable
- ✓ Enrolling in Community Solar
- ✓ Continuation of Strategic Energy Management
- ✓ Use of drought tolerant, low-maintenance, native plants in landscaping

Major Project

Facility Condition

Portfolio Facility Condition Index (FCI)

Facility Plan Summary

AGENCY PLAN SUMMARY	DM/LIFE SAFETY (PRIORITY 1)	CAPITAL RENEWAL (PRIORITY 2)	CAPITAL RENEWAL (PRIORITY 3)	SEISMIC/RISK (PRIORITY 4)	MODERNIZATION (NET PRIORITY 5)	TOTAL
DM/CR	\$17,382,574	\$16,124,516	\$5,515,354	\$0	\$0	\$39,022,444
Resilience/Risk	\$0	\$0	\$0	\$15,300	\$0	\$0
Modernization	\$0	\$0	\$0	\$0	\$0	\$0
Total	\$17,382,574	\$16,124,516	\$5,515,354	\$15,300	\$0	\$39,037,744

Summary

- 1,200 buildings on 450 sites
- \$500M in Deferred Maint
- Reduced spending
- Hold on all new buildings
- Prioritizing roofs, HVAC and building envelopes

Definitions

Current Maintenance Priority 1-4	1	Current costs for all facility maintenance and deferred maintenance except those that are covered in operations and maintenance budgets (routine maintenance).
Construction Year	2	Original Construction Year
Current Replacement Value	3	Current Replacement Value Reported to Risk Management or Calculated Replacement Value Reported from Facility Conditions Assessment (FCA)
Priority One: Currently Critical	4	From the Budget Instruction: Priority One projects are conditions that require immediate action in order to address code and accessibility violations that affect life safety. Building envelope issues (roof, sides, windows and doors) that pose immediate safety concerns should be included in this category.
Priority Two: Potentially Critical	5	From the Budget Instruction: Priority Two projects are to be undertaken in the near future to maintain the integrity of the facility and accommodate current agency program requirements. Included are systems that are functioning improperly or at limited capacity, and if not addressed, will cause additional system deterioration and added repair costs. Also included are significant building envelope issues (roof, sides, windows and doors) that, if not addressed, will cause additional system deterioration and added repair costs.
Priority Three: Necessary - Not yet Critical	6	From the Budget Instructions: Priority Three projects could be undertaken in the near to mid-term future to maintain the integrity of a building and to address building systems, building components and site work that have reached or exceeded their useful life based on industry standards, but are still functioning in some capacity. These projects may require attention currently to avoid deterioration, potential downtime and consequently higher costs if corrective action is deferred.
Priority Four: Seismic and Natural Hazard Remediation	7	From the Budget Instructions: Priority Four projects improve seismic performance of buildings constructed prior to 1995 building code changes to protect occupants, minimize building damage and speed recovery after a major earthquake. Projects also include those that mitigate significant flood hazards.
Facility Condition Index	8	A calculated measure of facility condition relative to its current replacement value (expressed as a percentage)

Facility Plan - Maintenance Priority 1-4
2025-27 Biennium

Definitions

Current Maintenance Priority 1-4	1	Current costs for all facility maintenance and deferred maintenance except those that are covered in operations and maintenance budgets (routine maintenance).
Construction Year	2	Original Construction Year
Current Replacement Value	3	Current Replacement Value Reported to Risk Management <i>or</i> Calculated Replacement Value Reported from Facility Conditions Assessment (FCA)
Priority One: Currently Critical	4	From the Budget Instruction: Priority One projects are conditions that require immediate action in order to address code and accessibility violations that affect life safety. Building envelope issues (roof, sides, windows and doors) that pose immediate safety concerns should be included in this category.
Priority Two: Potentially Critical	5	From the Budget Instruction: Priority Two projects are to be undertaken in the near future to maintain the integrity of the facility and accommodate current agency program requirements. Included are systems that are functioning improperly or at limited capacity, and if not addressed, will cause additional system deterioration and added repair costs. Also included are significant building envelope issues (roof, sides, windows and doors) that, if not addressed, will cause additional system deterioration and added repair costs.
Priority Three: Necessary - Not yet Critical	6	From the Budget Instructions: Priority Three projects could be undertaken in the near to mid-term future to maintain the integrity of a building and to address building systems, building components and site work that have reached or exceeded their useful life based on industry standards, but are still functioning in some capacity. These projects may require attention currently to avoid deterioration, potential downtime and consequently higher costs if corrective action is deferred.
Priority Four: Seismic and Natural Hazard Remediation	7	From the Budget Instructions: Priority Four projects improve seismic performance of buildings constructed prior to 1995 building code changes to protect occupants, minimize building damage and speed recovery after a major earthquake. Projects also include those that mitigate significant flood hazards.
Facility Condition Index	8	A calculated measure of facility condition relative to its current replacement value (expressed as a percentage)

Priority Five: Modernization	1	From the Budget Instructions: Priority Five projects are alterations or replacement of facilities solely to implement new or higher standards to accommodate new functions, significantly improve existing functionality as well as replacement of building components that typically last more than 50 years (such as the building structure or foundations). These standards include system and aesthetic upgrades which represent sensible improvements to the existing condition. These projects improve the overall usability and reduce long-term maintenance requirements. Given the significant nature of these projects, the work typically addresses deficiencies that do not conform to current codes, but are 'grandfathered' in their existing condition to the extent feasible.
Construction Year	2	Original Construction Year
Current Replacement Value	3	Current Replacement Value Reported to Risk Management <i>or</i> Calculated Replacement Value Reported from Facility Conditions Assessment (FCA)

Agency Name Oregon Department of Transportation

1. What are the key drivers for your agency's facility needs, and how do you measure space/facility demand?

Highway lane miles maintained by each Maintenance Station, equipment size and maintenance needs, safety needs driven by weather conditions, environmental factors and availability of resources in the immediate vicinity.

2. What are the key facility-related challenges over the next 10-years? (Please answer in order of priority)

1. Lack of funding due to revenue stream logistics
2. Modernization of equipment is well ahead of funding to replace obsolete and inadequate structures to house the equipment
3. Obsolete buildings leave expensive equipment unprotected and reduce the lifespan
4. Seismic retro fits needed on several structures
5. Growing time lines for jurisdictional permits pushing beyond biennial funding timelines

3. What do you need to meet these challenges

Resolution of the revenue stream issues sooner rather than later. Capital Improvement threshold raised to \$2M to allow modernization of buildings to protect equipment. Fully staffed crews to manage the projects.

Facilities Operations and Maintenance Budget	1	The Facilities Operations and Maintenance budget includes costs to operate and maintain facilities and keep them in repair including utilities, janitorial and maintenance costs. Maintenance costs are categorized as external building (roof, siding, windows, etc.); interior systems (electrical, mechanical, interior walls, doors, etc.); roads and ground (groundskeeper, parking lots, sidewalks, etc.) and centrally operated systems (electrical, mechanical, etc.). Agencies with significant facilities may include support staff if directly associated with facilities maintenance activities. Do not include other overhead costs such as accounting, central government charges, etc.
O&M Estimated Fund Split Percentage %	2	Show the fund split by percentage of fund source allocated to facility O&M for your agency

Total Short and Long Term Maintenance and Deferred Maintenance Plan for Facilities Value Over \$1M	3	All Maintenance excluding routine O&M costs. 25-27 and 27-29 auto-populates with 2% of the sum of your agency portfolio's CRV. Written to deliver on SB 1067: SECTION 9. (1) Each biennium, the Governor shall propose as part of the Governor's recommended budget an amount for deferred maintenance and capital improvements on existing state-owned buildings and infrastructure that is equivalent to at least two percent of the current replacement value of the state-owned buildings and infrastructure.
Priority One: Currently Critical	4	From the Budget Instruction: Priority One projects are conditions that require immediate action in order to address code and accessibility violations that affect life safety. Building envelope issues (roof, sides, windows and doors) that pose immediate safety concerns should be included in this category.
Priority Two: Potentially Critical	5	From the Budget Instruction: Priority Two projects are to be undertaken in the near future to maintain the integrity of the facility and accommodate current agency program requirements. Included are systems that are functioning improperly or at limited capacity, and if not addressed, will cause additional system deterioration and added repair costs. Also included are significant building envelope issues (roof, sides, windows and doors) that, if not addressed, will cause additional system deterioration and added repair costs.
Priority Three: Necessary - Not yet Critical	6	From the Budget Instructions: Priority Three projects could be undertaken in the near to mid-term future to maintain the integrity of a building and to address building systems, building components and site work that have reached or exceeded their useful life based on industry standards, but are still functioning in some capacity. These projects may require attention currently to avoid deterioration, potential downtime and consequently higher costs if corrective action is deferred.
Priority Four: Seismic and Natural Hazard Remediation	7	From the Budget Instructions: Priority Four projects improve seismic performance of buildings constructed prior to 1995 building code changes to protect occupants, minimize building damage and speed recovery after a major earthquake. Projects also include those that mitigate significant flood hazards.
Priority Five: Modernization	8	From the Budget Instructions: Priority Five projects are alterations or replacement of facilities solely to implement new or higher standards to accommodate new functions, significantly improve existing functionality as well as replacement of building components that typically last more than 50 years (such as the building structure or foundations). These standards include system and aesthetic upgrades which represent sensible improvements to the existing condition. These projects improve the overall usability and reduce long-term maintenance requirements. Given the significant nature of these projects, the work typically addresses deficiencies that do not conform to current codes, but are 'grandfathered' in their existing condition to the extent feasible.
Facility Condition Index	9	A calculated measure of facility condition relative to its current replacement value (expressed as a percentage)

RSF	2	Rentable SF per BOMA definition. The total usable area plus a pro-rated allocation of the floor and building common areas within a building.
USF	3	Usable Square Feet per BOMA definition for office/administrative uses. Area of a floor occupiable by a tenant where personnel or furniture are normally housed plus building amenity areas that are convertible to occupant area and not required by code or for the operations of a building. If not known, estimate the percentage.
O&M	4	Total Operations and Maintenance Costs for facilities including all maintenance, utilities and janitorial

Priority (ranked most to least preferred)		Agency	SCR or Activity Initials	Program Unit/Activity Description	GF	LF	OF	NL-OF	FF	NL-FF	TOTAL FUNDS	Pos.	FTE	Used in Gov. Budget Yes / No	Impact of Reduction on Services and Outcomes
Dept	Priority														
Delivery & Operations	1	ODOT	100-00-00-00000	Safety/Ops Quick Fix			2,205,000				\$ 2,205,000			No	Low cost improvements to the transportation system would not be funded and could impact safety and operation of the system.
Delivery & Operations	2	ODOT	100-00-00-00000	Operating Costs			3,933,552				\$ 3,933,552			No	May impact the operations of the Maintenance Branch to pay licensing invoice and/or covering uncovered expenditures due to standard labor distribution.
Delivery & Operations	3	ODOT	100-00-00-00000	Timber Program			55,000				\$ 55,000			No	Funding would not be available for removing hazard trees and may impact the seamless operation and use of the highways.
Delivery & Operations	4	ODOT	100-00-00-00000	Telematic Funding			1,000,000				\$ 1,000,000			No	Safety for employees, environmental stewardship and material use efficiency with more knowledge of material use and location, fuel efficiency and greenhouse gas reduction, fleet maintenance management, and risk management efficiencies associated with tort claim may be impacted.
Delivery & Operations	5	ODOT	100-00-00-00000	SOLVE Contract			125,000				\$ 125,000			No	No SOLVE litter clean up will be conducted.
Delivery & Operations	6	ODOT	100-00-00-00000	Illegal Camping Management			1,000,000				\$ 1,000,000			No	Immediately increases the number of concerns with the neighbors and potentially increased pollution to streams as well as having more damage to bridges.
Delivery & Operations	7	ODOT	100-00-00-00000	Fleet Acquisition & Replacement			12,575,026				\$ 12,575,026			No	Further aging of ODOT's fleet inventory will occur which may cause safety issues, costly future increases in vehicle maintenance costs and reduced equipment reliability. It also decreases the ability to seek green alternatives in fleet equipment such as elimination of the ability to purchase emission reduction enabling technology
Delivery & Operations	8	ODOT	100-00-00-00000	Fuel Reduction			2,000,000				\$ 2,000,000			No	This is a corresponding reduction to the reduction in fleet inventory.
Delivery & Operations	9	ODOT	100-00-00-00000	Pave Patch Program			12,000,000				\$ 12,000,000			No	This reduction will cause more sinks and pavement to fail more quickly. It will also impact the cost of pavement repair and replacements.
Delivery & Operations	10	ODOT	100-00-00-00000	Position Reductions & Corresponding S&S			25,553,979				\$ 25,553,979			No	The Maintenance level of service for Oregonians will drop in every area and type of Maintenance activities.
Delivery & Operations	11	ODOT	100-00-00-00000	Preservation Program			30,347,251				\$ 30,347,251			No	The pavement conditions and pavement condition ratings will decline.
Delivery & Operations	12	ODOT	100-00-00-00000	Bridge Program			37,277,690				\$ 37,277,690			No	A reduction will delay much needed bridge repair work and could result in long detours for heavy loads.
Delivery & Operations	13	ODOT	100-00-00-00000	Highway Safety and Operations			35,552,994				\$ 35,552,994			No	A funding reduction will lessen the ability to address safety problems possibly leading to an increased fatality rate and will impact the ability to operate the transportation system safe and efficiently.
Delivery & Operations	14	ODOT	100-00-00-00000	Modernization			42,027,141				\$ 42,027,141			No	Reductions in funding for the Modernization Program results in greater congestion, higher levels of carbon monoxide emissions as vehicles sit idling in traffic, less efficient freight movement, greater risks to drivers and higher project costs due to project delays. These results, in turn, negatively impact air quality, livability, economic health, and other associated transportation issues.
Delivery & Operations	15	ODOT	100-00-00-00000	Special Programs			92,978,785				\$ 92,978,785			No	Reductions will impact the funding for bike and pedestrian projects, Federal Lands Access Program, Winter Recreation Parking, Snowmobile Facilities and the newly created Urban Mobility Office that focusses on a comprehensive congestion relief strategy. It would further impact the support functions to deliver ODOT's construction program in areas like technical disciplines and statewide standards, policies and guidelines.
Delivery & Operations	16	ODOT	100-00-00-00000	Local Government			41,600,826				\$ 41,600,826			No	A reduction will result in fewer completed projects with Local Governments and will cause more emergency bridge repairs, declining pavement conditions and less safety projects addressed.

DMV	1	ODOT	200-00-00-00000	Reduced telecommunications and expansion, reduce payments to Office of Administrative Hearings, delay life cycle replacement of PCs.			2,866,528				\$ 2,866,528	0	0.00	No	This could limit some external contact points with reduced phones. Replacement of fewer computers could contribute to productivity lag or limited capacity with using older computers and increased potential for failure.
DMV	2	ODOT	200-00-00-00000	Reduction of staff in headquarters.			2,644,549				\$ 2,644,549	14	14.00	No	No improvement in customer service, and continue to function below capacity. Slower productivity or production or issue resolutions and implementations.
DMV	3	ODOT	200-00-00-00000	Eliminate temporary appointments.			1,311,626				\$ 1,311,626	0	0.00	No	Limit ability to cover backlogs or implementations of new things using temporary staffing. Limit seasonal peak support.
DMV	4	ODOT	200-00-00-00000	Reduce phone support			250,000				\$ 250,000	0	0.00	No	Increase call wait times.
DMV	5	ODOT	200-00-00-00000	Reduction of staff in call center, training, and field offices.			4,031,682				\$ 4,031,682	17	17.00	No	Increase call wait times.
DMV	6	ODOT	200-00-00-00000	Reduce headquarter facility maintenance.			200,000				\$ 200,000	0	0.00	No	Reduce ability to address building issues on an aging facility.
DMV	7	ODOT	200-00-00-00000	Reduce printing of all non-required forms. Only envelopes, triplicate, sensitive (titles & other forms w/control numbers), mailing inserts would be printed. Field offices would not print items on request.			990,000				\$ 990,000	0	0.00	No	Hardship for customers who lack computer access or proficiency, or those who arrive at office unprepared.
DMV	8	ODOT	200-00-00-00000	Eliminate interim printing of credentials (driver license, permit, ID, etc.)			150,000				\$ 150,000	0	0.00	No	Customers would not have photo ID while credential is being mailed. Could cause issue in situations when photo ID is required.
DMV	9	ODOT	200-00-00-00000	Eliminate pre-printed trip permits and temporary registrations.			284,961				\$ 284,961	1	1.00	No	Potential issue would be if permit purchaser has internet or computer access issues and not able to print when needed. Home printed permits would be less secure.
DMV	10	ODOT	200-00-00-00000	Add option of emailing renewal reminders for registrations and license/ID credentials.			340,000				\$ 340,000	0	0.00	No	Would involve unknown cost for programming, and long time to scale. May result in customers missing key notices due to mistaken email addresses, messages going to junk mail, etc.
DMV	11	ODOT	200-00-00-00000	Eliminate Field offices accepting vehicle registration renewals.			1,591,695				\$ 1,591,695	9	8.75	No	Will cause frustration and confusion for customers who are limited in access to computer usage.
DMV	12	ODOT	200-00-00-00000	Close field offices and further reduce staff.			16,614,464				\$ 16,614,464	81	81.00	No	This would result in frustration and inconvenience for customers who lose a local office and have to travel to go further to get DMV services. Will also result in longer office wait time as fewer locations and staff are available.
DMV	13	ODOT	200-00-00-00000	Reduce Grant for Commercial driver licenses.					245,625		\$ 245,625	0	0.00	No	Limit ability to upgrade computer system to meet new requirements.
DMV	14	ODOT	200-00-00-00000	Reduce Law Enforcement grants					1,204,002		\$ 1,204,002	0	0.00	No	Limit some training or special uses of law enforcement.
DMV	15	ODOT	200-00-00-00000	Reduce Statewide Public Information & Education Grants					1,821,470		\$ 1,821,470	0	0.00	No	Limit safety messages related to traveling public safety.
DMV	16	ODOT	200-00-00-00000	Reduce State Board of Towing			66,614				\$ 66,614	0	0.00	No	Inhibit effectiveness of board work and program implementation to protect from vehicle owners from bad towing practices.

Priority	Priority	Agency	SCR or Activity Initials	Program Unit/Activity Description	GF	LF	OF	NL-OF	FF	NL-FF	TOTAL FUNDS	Pos.	FTE	Used in Gov. Budget Yes / No	Impact of Reduction on Services and Outcomes
Dept															
Dept	Priority	Agency	SCR or Activity Initials	Program Unit/Activity Description	GF	LF	OF	NL-OF	FF	NL-FF	TOTAL FUNDS	Pos.	FTE	Gov. Budget Yes / No	Impact of Reduction on Services and Outcomes
Commerce & Compliance	1	ODOT	300-00-00-00000	Closure of the Portland Metro Counter Services			511,776				\$ 511,776	2	2.00		Truck service agents who cannot go online would now have to call or drive to Salem. Reduced capacity to conduct legislatively mandated program.
Commerce & Compliance	2	ODOT	300-00-00-00000	Reduction of 3 vehicles			75,000				\$ 75,000	0	0.00		This could possibly delay response in an emergency such as a derailment. It would result in increased usage of Motor Pool/personal vehicle reimbursement which has administrative effects.
Commerce & Compliance	3	ODOT	300-00-00-00000	Reduction in Payment Processing Staff who process daily all checks received in the mail.			362,004				\$ 362,004	2	2.00		Customers would experience delays in checks being cashed and payments processing to their account.
Commerce & Compliance	4	ODOT	300-00-00-00000	Reduction in Rail Safety Programs including railroad inspections and rail crossing project planning			1,202,371				\$ 1,202,371	3	3.00		This would have a large impact on the speed and ability to conduct statewide inspections on state and federally mandated safety requirements.
Commerce & Compliance	5	ODOT	300-00-00-00000	Closure of Springfield Audit location			1,636,775				\$ 1,636,775	5	5.00		Loss of 19% of 2024 motor carrier audit capacity (reduced 20% in last 6 years), will reduce weight mile revenue, increase tax evasion, reduce local customer service/outreach, and threaten our ability to meet IFTA and IRP audit requirements.
Commerce & Compliance	6	ODOT	300-00-00-00000	Reduction in CCD Support Services staff			422,534				\$ 422,534	2	2.00		Work would be spread amongst remaining staff. Efficiencies will reduce some of the burden but invoices will be paid slowly, potentially occurring late fees.
Commerce & Compliance	7	ODOT	300-00-00-00000	Reduction in call center staff available to answer phones.			2,029,053				\$ 2,029,053	8	8.00		Increased call wait times in Tax Service Call Center. Reduction in timely collection of revenue. Potential for increased tax evasion. Reduced capacity to conduct legislatively mandated program.
Commerce & Compliance	8	ODOT	300-00-00-00000	Reduction in Over-dimension permit staffing			695,719				\$ 695,719	2	2.00		Increased call wait times. New system implementation may offset this impact.

ODOT_ Delivery & Operations Division
2025-27 Biennium

100-20-00-00000 Maintenance
100-50-00-00000 Project Delivery and Support
100-65-00-00000 Local Government

Detail of Reductions to 2025-27 Current Service Level Budget															
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Priority (ranked most to least preferred)		Agency	SCR or Activity Initials	Program Unit/Activity Description	GF	LF	OF	NL-OF	FF	NL-FF	TOTAL FUNDS	Pos.	FTE	Used in Gov. Budget Yes / No	Impact of Reduction on Services and Outcomes
Dept	Priority														
Commerce & Compliance	9	ODOT	300-00-00-00000	Reductions in Audit staffing in various locations			1,361,543				\$ 1,361,543	5	5.00		Loss of additional 19% of 2024 motor carrier audit capacity, will reduce weight mile revenue, increase tax evasion, reduce local customer service/outreach, and likely end our ability to meet IFTA and IRP audit requirements. Reduced capacity to conduct legislatively mandated program.
Commerce & Compliance	10	ODOT	300-00-00-00000	Reduction in business operations staffing including imaging and accounts reconciliation			392,723				\$ 392,723	3	3.00		Reduction in service levels internally and externally as it will take supporting documentation longer to be visible in document management system. Also reduces checks and balances in cash handling for daily balancing.
Commerce & Compliance	11	ODOT	300-00-00-00000	Reduction in Commercial Vehicle Licensing operations and policy analysis			337,261				\$ 337,261	1	1.00		Lose capacity to facilitate portions of WIM/Greenlight program. Lose ability to facilitate Trusted Carrier Program. Policies and procedures would not receive necessary updates for administration of multiple licensing services and programs.
Commerce & Compliance	12	ODOT	300-00-00-00000	Reduction in staff conducting FMCSA mandated new carrier entrant audits					529,739		\$ 529,739	2	2.00		Potential to fall beyond required deadlines for conducting federally mandated new carrier entrant audits should volume of new carriers increase - result would be loss of federal funds and a lack of compliance with federal mandate.
Commerce & Compliance	13	ODOT	300-00-00-00000	Reduction in Safety Compliance Staff across the state			1,766,591		88,330		\$ 1,854,921	6	6.00		Cutting 6 Compliance Specialist 2's would result in 144 non-compliant carriers continuing to operate without corrective action and 2400 drivers/vehicles operating without inspection. Cutting our safety staff jeopardizes our federal funding through the MCSAP grant.
Commerce & Compliance	14	ODOT	300-00-00-00000	Closure of 15 scale facilities across the state			70,000		0		\$ 70,000	0	0.00		The scales proposed in the cuts are all located on highways other than the interstate and national network highways. These routes consistently see a higher number of Over-dimension violations which contribute to quicker road degradation. These highways would not be monitored regularly for size and weight compliance.
Commerce & Compliance	15	ODOT	300-00-00-00000	Reduction in Motor Carrier Enforcement Officers (MCEO) staffing			452,412		0		\$ 452,412	2	2.00		Each reduction in MCEO equate to ~20k in CMVs not weighed or checked for compliance, which can produce ~550 violations. Of those, ~170 are size and weight noncompliance putting our infrastructure at risk. Reduced capacity to conduct legislatively mandated program.
Commerce & Compliance	16	ODOT	300-00-00-00000	Electronic screening roadside infrastructure operations and maintenance costs					1,116,209		\$ 1,116,209	0	0.00		These systems are covered by federal funding through the FMCSA MCSAP grant. Failure of these systems would jeopardize the federal funding as well as invalidate our data, putting us in a non-compliant status with FMCSA jeopardizing federal funding.

Policy, Data & Analysis	14	ODOT	400-10-00-00000	Transportation Data Section			100,000				\$ 100,000			No	Entry of vehicle accident data into Crash Analysis Reporting System will be delayed. This will delay reporting used to inform project selection and address critical safety needs.
Policy, Data & Analysis	15	ODOT	400-10-00-00000	Promoting Resilient Operations for Transformative, Efficient, and Cost-saving Transportation (PROTECT) Planning			126,109				\$ 126,109			No	Delay a research or pilot project and may impact ability to meet Federal Highway Administration timelines and expectations on programming Promoting Resilient Operations for Transformative, Efficient, and Cost-saving Transportation - Planning funding.
Policy, Data & Analysis	16	ODOT	400-10-00-00000	Research Program			182,000				\$ 182,000			No	Less research projects to find better, cheaper and/or faster ways to provide a safe, efficient transportation system that supports economic opportunity and livable communities for Oregonians. Downstream impacts may be felt by Oregon universities as 10% of our projects involve a work order to OSU or PSU.
Policy, Data & Analysis	17	ODOT	400-10-00-00000	Activity Based Model (ABM) development			250,000				\$ 250,000			No	Slower integration of Oregon Household Survey data, better integrating alternative mode usage and equity.
Policy, Data & Analysis	18	ODOT	400-10-00-00000	Transportation Data Section			10,000				\$ 10,000			No	Longer delivery cycles for programs.
Policy, Data & Analysis	19	ODOT	400-10-00-00000	Research Program			360,207				\$ 360,207	1	1.00	No	Delay in ongoing project management, review time, contract coordination and subject matter review of consultant work products.
Policy, Data & Analysis	20	ODOT	400-10-00-00000	Transportation Safety Action Plan (TSAP)			200,000				\$ 200,000			No	Transportation Safety Group covers the cost of the work or work to be done by inhouse staff delaying other project activity.
Policy, Data & Analysis	21	ODOT	400-10-00-00000	Research Program			100,000				\$ 100,000			No	Reduces ability to lead pooled fund projects that have national impact such as revising national standards that dictate how we provide a safe, efficient transportation system that supports economic opportunity and livable communities.
Policy, Data & Analysis	22	ODOT	400-10-00-00000	Freight Plan			250,000				\$ 250,000			No	Reduction in the amount of labor resources for other freight initiatives. Could extend the timeline for completion beyond the federal due date.
Policy, Data & Analysis	23	ODOT	400-10-00-00000	Transportation Data Section			873,507				\$ 873,507			No	Schedule delays for IT modernization projects like replacing the Crash Data Reporting System or the Road Network Data Management System.
Policy, Data & Analysis	24	ODOT	400-10-00-00000	Transportation Data Section			382,000				\$ 382,000			No	Some projects may incur longer delivery cycles. Increase in Crash data timelines.
Policy, Data & Analysis	25	ODOT	400-10-00-00000	Research Program			182,000				\$ 182,000			No	Less research projects to find better, cheaper and/or faster ways to provide a safe, efficient transportation system that supports economic opportunity and livable communities for Oregonians. Downstream impacts may be felt by Oregon universities as 10% of our projects involve a work order to OSU or PSU.
Policy, Data & Analysis	26	ODOT	400-10-00-00000	Oregon Highway Plan (OHP)			500,000				\$ 500,000			No	Oregon Highway Plan work will need to be done by internal staff. This will reduce the amount of in house resources available for other work and likely increase schedules.
Policy, Data & Analysis	27	ODOT	400-10-00-00000	Transportation Data Section			832,205				\$ 832,205			No	Schedule delays for IT modernization projects like replacing the Crash Data Reporting System or the Road Network Data Management System. Traffic counting equipment repair and replacement will be delayed or not done.
Policy, Data & Analysis	28	ODOT	400-10-00-00000	Research Program			71,432				\$ 71,432			No	Less research projects to find better, cheaper and/or faster ways to provide a safe, efficient transportation system that supports economic opportunity and livable communities for Oregonians. Downstream impacts may be felt by Oregon universities as 10% of our projects involve a work order to OSU or PSU.
Policy, Data & Analysis	29	ODOT	400-10-00-00000	Transportation Growth Management (TGM)			1,500,000				\$ 1,500,000			No	Delay transportation system plan development for local agencies and support of local jurisdiction land use and transportation efforts.
Policy, Data & Analysis	30	ODOT	400-10-00-00000	Oregon Household Survey (OHS)			717,440				\$ 717,440			No	Delay completion of Oregon Household Survey, essential for understanding impacts of transportation decisions.
Policy, Data & Analysis	31	ODOT	400-10-00-00000	Climate Friendly & Equitable Communities (CFEC)			610,647				\$ 610,647			No	Less funding for local agencies to complete State mandated Transportation System Plans.

2025-27 Biennium							

2023-25 ARPA Ending Balances							
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)
SCR	Program Description	2023-25 LAB	2023-25		2025-27 POP		Comments
			Ending Balance	Amount Obligated	Y/N	POP #	
73000-100-50-00-00000 (Project Delivery)	Project Delivery (Modernization DCR)	19,000,000	19,000,000	19,000,000	Y	160	Newberg Dundee Bypass POP #160 is \$19M; this amount is not included in the 23-25 LAB EB as we anticipated expending it, however at the end of the biennium the balance will be \$19M

expend only new est EB
not budgeted EB

Instructions:

- Column (a): Select the appropriate Summary Cross Reference number and name from those included in the 2023-25 legislatively approved budget.
- Column (b): List American Rescue Plan Act (ARPA) balances by legislatively approved uses and/or specified transfers to agency programs.
- Column (c): Provide the expenditure limitation approved for the ARPA funds in the 2023-25 legislatively approved budget.
- Column (d): Enter the total estimated balance of ARPA funds that will be unspent at the close of the 2023-25 biennium.
- Column (e): Enter the amount of the unspent ARPA balance obligated to a project/program through an award, grant agreement, or other contract as of December 31, 2024.
- Column (f) and (g): Indicate whether the 2025-27 Governor's Budget includes a policy option package (POP) to utilize the ARPA funds carrying forward into the 2025-2 biennium, and if so, provide the POP number.
- (h) Please provided any additional information related to ARPA ending balances.
