BACKGROUND:

An automated external defibrillator (AED) is a portable electronic device used to treat sudden cardiac arrest, i.e. when a person's heart suddenly stops working.

[Senate Bill 556 \(2009\)](#) required the owner of a place of public assembly to have on the premises at least one AED. It exempted facilities owned by school districts, education service districts, private schools, public charter schools, and facilities primarily used for worship or education associated with worship. [Senate Bill 1033 \(2010\)](#) required schools to have at least one AED on premises by January 1, 2015.
