Measure Description

The measure requires the Department of Human Services (DHS) to develop minimum staffing requirements, including a ratio of recipients to staff of no less than 30:1, for community developmental disabilities programs and support services brokerages. The measure is effective on the 91st after sine die and is effective January 1, 2026. The measure is repealed on January 1, 2027.

Fiscal Analysis

The fiscal impact of reducing staffing ratios to 30:1 is \$72.7 million total funds. As of January 1, 2025, DHS maintains an average staffing ratio for 40:1. Currently, there are 38,681 recipients of care and 970 employees. To reduce the staffing ratio to 30:1, DHS will need to increase staff by 33% or 1,289. To meet the requirements of the measure, DHS will need to significantly increase its recruitment and retention of case managers and hire an additional 319 individuals in a six-month period (assuming caseload remains flat).

Relevant Dates

The measure takes effect on the 91st day after sine die and is operative January 1, 2026.

The measure is repealed on January 1, 2027.
