contractors, or sign
up to become an
approved contractor
on ODOE's website.

The Oregon Rental Home Heat Pump Program provides rebates and grants for the installation of heat pumps and related upgrades in dwellings used as residential tenancy (rentals) and in manufactured homes or recreational vehicles located in a rented space.

Heat pumps must be installed by ODOE-approved contractors who will reserve and receive rebates for eligible heat pump projects. The full rebate savings must be passed on to the dwelling owner.

Incentive Amounts

Rebate amounts vary depending on the efficiency of the heat pump installed and the income level of the tenant. Low- to moderate-income households are eligible for higher incentives.

	Residential tenancy (cannot exceed 60% of cost to purchase and install)		Manufactured home or recreational vehicle (cannot exceed 80% of cost to purchase and install)	
	Standard Efficiency	Higher Efficiency	Standard Efficiency	Higher Efficiency
Not Low- Mod Income	\$2,000	\$3,000	\$2,000	\$4,000
Low-Mod Income	\$4,000	\$5,000	\$5,000	\$7,000

Additional grants are available for upgrades that facilitate the installation of the heat pump.
(Cannot exceed 100% of the cost of the upgrade.)

Not Low-Mod Income	\$2,000
Low-Mod Income	\$4,000
