Oregon Prescription Drug Program (OPDP) & ArrayRx

Trevor Douglass

Director, OPDP

Informational Hearing – OPDP & ArrayRx

- What are OPDP and ArrayRx?
- Who administers ArrayRx?
- Data and documenting savings
- OPDP's Critical Access Pharmacy Program

What are OPDP and ArrayRx?

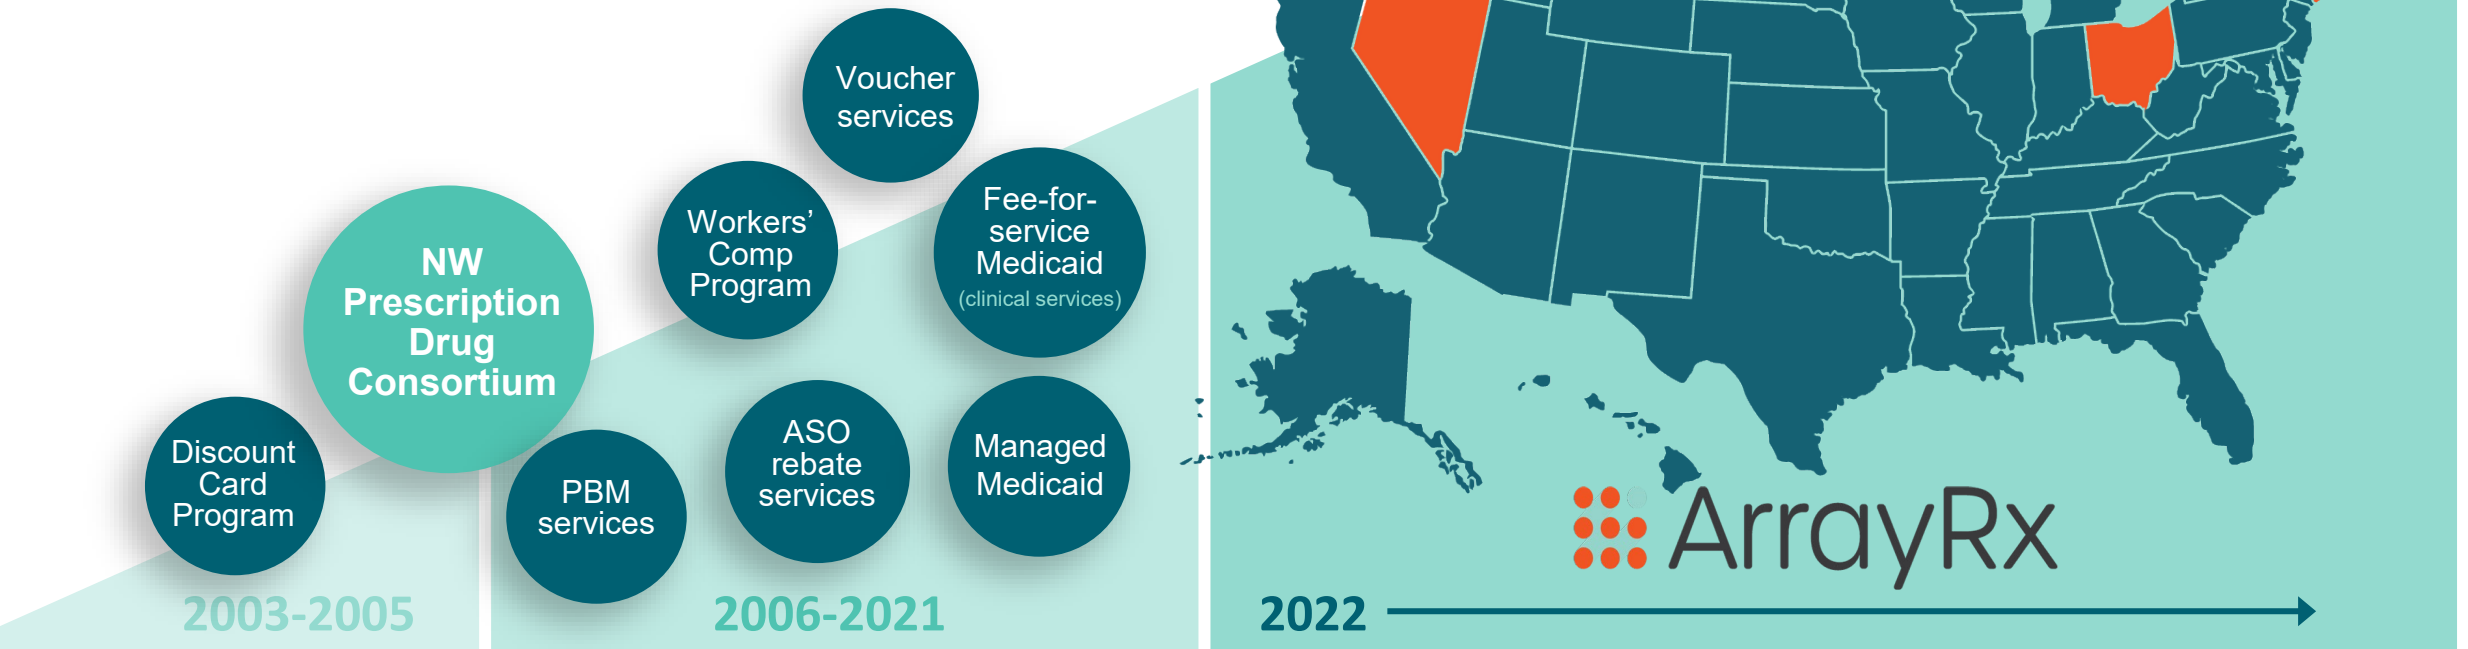

OPDP is the statutorily charged (*ORS 414.312*) program in Oregon instructed to:

- Be able to serve PEBB/OEBB, PERS, direct or indirect pharmacy purchasing state agencies, local governments, special governments, residents of Oregon, labor unions, and even private entities.
- Cooperate with other states or regional consortia.
- Maintain statewide program access – Critical Access Pharmacies.

ArrayRx is the name used by the multi-state cooperative procurement group providing pharmacy benefit solutions for public sector entities nationwide.

Member States participating in ArrayRx each have their own state statutory authority to participate.

OPDP & ArrayRx History

OR & WA establish prescription discount card programs in their states

OR & WA collaborate to offer a variety of **pharmacy solutions** in their states

The “Consortium” rebrands to ArrayRx to share successful programs and services beyond the Pacific Northwest

ArrayRx Programs

PBM Services	Discount Card	Voucher Programs	ASO Rebate Services	Medicaid Programs
Group Rx Benefits	State-Sponsored Discount Card	Corrections	Group Rx Benefits	Managed Medicaid
Workers' Comp		State Hospitals	Workers' Comp	Fee-for-Service Medicaid
Medicare Part D		County Health Departments	Medicaid Programs	

ArrayRx is not a typical Pharmacy Benefit Manager

	ArrayRx

Growth of OPDP & ArrayRx – Covered Lives

Oregon Footprint & Savings

OPDP currently serves over **300K** people via ArrayRx.

\$ 5,728,957 saved via passthrough pricing

\$ 115,362,000 invoiced via passthrough rebates

Savings and Rebates between 2022-2024

Value of ArrayRx

- ArrayRx, across all states, has delivered:
 - **\$35 million** in additional savings over contracted pricing by eliminating “spread pricing”. True **pricing pass-through** in action! (2022-2024)
 - **\$790 million** in rebates to be passed through to our participants. True **rebate pass-through** in action! (2022-2024)

Critical Access Pharmacy (CAP)

Problem: Last year, Oregon was recognized as having the **second worst** level of pharmacy access in the nation.

Solution: In 2009, OPDP created CAP designation in Oregon Administrative Rule 431-121-2000. In 2023, OPDP revised CAP rules to focus on frontier, rural and urban settings with specific focus on high-poverty US census tracts versus the old rule that was solely geographic. CAPs are afforded improved reimbursement.

- Oregon currently has **82** pharmacies with the CAP designation.

Closing Remarks

- **ArrayRx** exemplifies a successful and growing multi-state collaboration to manage pharmacy costs.
- **OPDP's leadership** has been instrumental in ArrayRx program development and expansion.
- OHA is always looking at ways to **enhance pharmacy access and affordability for Oregonians**
