Note: FPL = federal poverty level. A blank or N/A response indicates not applicable. NR = No response. The Medicaid buy-in program for working people with disabilities is an option that allows working individuals with disabilities whose income and/or assets exceed the limits for other eligibility pathways to "buy-in" to Medicaid coverage. Several states (GA, NH, RI) reported more than one buy-in program. FPL = federal poverty level. The Family Opportunity Act (FOA) allows children with disabilities whose family income is below 300 percent of the federal poverty level to buy into Medicaid. FOA children can be covered through the state plan option or through a waiver. In MA, disabled children over the Medicaid income limit with income up to 300% FPL are in CHIP. Disabled children over 300% are in CommonHealth, under the 1115 waiver.
