

Submitter: Lucien Gunderman
On Behalf Of: Crown Hill Farm
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

As a farmer/businessman that owns three diesel trucks, I find the current upcoming regulation very offensive, and unworkable. Agriculture, and product movement is dependent on Diesel power equipment whether it be tractors, or trucks. Electric vehicles or equipment is un-feasible due to the lack of infrastructure now or in the future.

I see no possible way for complete changes to our fossil fuel vehicles and equipment to be made in any kind of equitable situation.

I would be in favor of the proposed bill, and feel it should be passed!

It's hard enough to keep a farm or business running without rules and regulations that make the whole thing harder and economically un-feasible.
