

Submitter: John Bosserman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Stop the non DEF diesel truck ban . This is just another government overreach causing massive economic damage to Oregon residents who rely on trucks to haul what they need for traded farms and more it will cause additional inflation and could even cause shortages of products at grocery stores who source local farms food the best of Oregon . The fact is the environmental benefits are slim and do not outweigh the need for a sound economy.
