

Submitter: David D Hunter

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I support HB 3119. I oppose any attempts by OR DEQ of banning diesel fuel. I drive a F 250 diesel work truck; I don't want the failed EV version of pickup trucks. The whole climate agenda is a rouse, it is about control not CO2. We need CO2 for growing better trees, oh wait the forests burned. It is time to stop this climate control of the citizens. CO2 is not the problem; it is the leftist politicians who want to impose their wrath on rural Oregonians who actually work for a living not sucking off the government tit (we the taxpayers pay for the slackers sucking off the government tit). Diesel engines operate and provide power for forestry, wildland fire equipment, fire districts to operate fire engines, fishing boats, farmers harvesting food crops. Why does Oregon government hate its citizens so bad to harm our livings and economy. I support stopping the corrupt DEQ from implementing a diesel ban and a ban on work trucks that run on diesel. Climate change is a hoax, it really is about control and climate wording is used. The environment would be better if you allowed us to harvest trees, provide fundings for rural cities and schools. New trees actually grow and reduce CO2 and give us O2 to breathe. I am a professional forester / urban forester/ consulting arborist, so I understand CO2 and forestry. What the legislature is doing is wrong thinking and is about control because of the corrupt party that has been in power since corrupt vote-by-mail. I support HB 3119. Thank you.
