On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2143

5NP was developed BY community FOR community. It is long been known that the government and agencies representing and working on the government's behalf are NOT trustworthy, after a long history of intentionally harming and targeting communities 5NP serves. The government and systems such as the medical industrial complex treats people suffering from mental illness, substance use, and other disabilities as disposable criminals needing punishment, not as people needing care. Putting 5NP back in the hands of trusted community members is a step toward easing the suffering that is a product of decades of governmental abuse upon our most vulnerable populations.

5NP is FOR THE PEOPLE BY THE PEOPLE!
