

Submitter: Melinda Rumsey

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2143

Jan 28,2025

Thank you for reading my testimony

My name is Melinda Rumsey, I am a student of POCA tech acupuncture school, and I have been lucky enough to receive acupuncture for years.

5NP is so simple, and I would love for this to be readily and easily available to more people.

I urge you to support House Bill 2143. This provides a simple treatment of acupuncture provided by trained professionals to more populations that need it and could use it- such as lower income, houseless, and working class individuals. This simple treatment has had many studies that show how greatly it supports the nervous system and reduces stress, which can also help with other medical and mental health conditions including addictions.

I urge you to support this, thank you,  
Melinda Rumsey
