

Submitter: Freya Galeazzi
On Behalf Of:
Committee: House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic: HB2948
Subject: Testimony in Support of House Bill 2948

Chair Nosse, Vice Chairs Javadi and Nelson, and Members of the Committee:
My name is Freya Galeazzi & I am a registered nurse in the K-12 schools in Bend, Oregon. I have been an RN for 20 years, with 16 of them in pediatrics & 4 years dedicated to school nursing. I am writing to express my strong support for HB 2948, which ensures that only a registered nurse may supervise a nurse in a school setting, concerning nursing practice.

As a school nurse, I play a critical role in ensuring the health, safety, and well-being of students with diverse medical needs. The complexity of my work requires adherence to professional nursing standards and clinical judgment. HB 2948 recognizes the importance of having qualified supervision specific to nursing practice. This distinction is essential for the following reasons:

1. Clinical Expertise and Patient Safety

Nursing practice includes performing assessments, developing care plans, and managing medical emergencies. These tasks require clinical expertise that can only be effectively evaluated and supervised by another registered nurse. An administrator or non-nursing supervisor may not have the medical knowledge necessary to provide meaningful oversight in these areas. Allowing registered nurses to supervise school nurses ensures that clinical practices align with the Oregon Nurse Practice Act (ORS 678.010).

2. Clear Distinction Between Nursing and Administrative Functions

HB 2948 clarifies the boundaries between clinical and non-clinical supervision. Administrators are vital to supporting the broader functions of a school nurse, such as scheduling and policy adherence. However, when it comes to decisions about patient care, only a registered nurse possesses the training to provide appropriate guidance and evaluation. This bill ensures that nurses are not placed in compromising situations where individuals evaluate their clinical judgment without a medical background.

3. Support for Professional Growth and Accountability

Registered nurses are uniquely qualified to mentor and guide other nurses in clinical settings, fostering professional growth while maintaining accountability. HB 2948 creates a structure that empowers school nurses to perform their duties effectively, knowing they are supported by peers who understand the profession's nuances.

4. Alignment with Best Practices in Healthcare

Healthcare settings outside of schools consistently rely on registered nurses to supervise other nurses. Extending this standard to the school environment ensures that Oregon students receive high-quality nursing care and that the nurses providing this care are supported by appropriate clinical oversight.

Our district manager is not an RN and he does not have any medical experience. And though our direct supervisor is wonderful, and she is an RN, she has to get approval from this NON-nursing admin. He makes many decisions that are not based on student acuity; Ex when we came back from summer break last year & had 4 new Type 1 Diabetics, he did not approve even one additional nursing position to support these 4 schools that now needed a nurse on site. Even with the data & numbers that clearly supported more nursing staff, we had to split these students up & add them to our already heavy case-loads. I had 2 students who needed daily tube feeds (medically complex/nursing dependent) while also managing a newly diagnosed diabetic who was not "stable" during the school day. One day, the parent had to pick up the student because he was having low blood sugars & there wasn't an RN immediately available to manage his care. We are responsible for caring for these students during the school day and the fact that it had to fall on the parents was completely unacceptable. This is just one of many examples I have.

Thank you for considering my testimony. I am happy to answer any questions/provide additional insights based on my experience.

Respectfully,

BLS RN
