

Submitter: Rodney Tomblason
On Behalf Of: Self and other diesel users
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I just learning about this BAN on diesel having taken effect on Jan. 1, 2025. How ridiculous! I support delaying any such regulation or law. This nonsense is why friends are leaving Oregon.

Such bans are NOT following science. They are driven by political agendas that are anti-American.

It is unfair and inhumane to force diesel users to buy new equipment they can not afford.

This BAN is anti-small business. I used to work for a large trucking company, and also a small one. Both were great companies. Both would be injured greatly by further regulation on fuels they use.

Oregon needs new leadership. Hating oil is stupid. If a new technology merits purchase, I'm glad to voluntarily get in line. But I do not want to be FORCED.

California never qualified as a leader in anything, much less science. We need not follow them. Oregon has just as many smart people. We don't follow the lemmings over the cliff so to speak.

When will Oregon use common sense? Bring back logging and fishing, so we can prosper! We need multiple economies not just hi-tech.
