On Behalf Of:

Committee: House Committee On Behavioral Health and Health  
Care

Measure, Appointment or  
Topic: HB2948

I support HB 2948. It is imperative for the safety and well being of Oregon students that School RNs be supervised by Nurses only as they have the expertise and training necessary for school health management. Non-nursing supervisors do not have this expertise or training and this can directly result in safety concerns related to health and medical management while students are attending school.
