

## Written Testimony Template for HB 2948

*Submitted to the Oregon House Committee On Behavior Health and Health Care  
1/28/2025*

---

**Subject:** Testimony in Support of House Bill 2948

**Chair Nosse, Vice Chairs Javadi and Nelson, and Members of the Committee:**

My name is Angela McAllister, and I am a registered nurse in the K-12 school setting at MSD549c in Medford, Oregon. I have been a nurse for 17, with 10 years dedicated to school nursing. I am writing to express my strong support for **HB 2948**, which ensures that only a registered nurse may supervise a nurse in a school setting concerning nursing practice.

As a school nurse, I play a critical role in ensuring the health, safety, and well-being of students with diverse medical needs. The complexity of my work requires adherence to professional nursing standards and clinical judgment. **HB 2948 recognizes the importance of having qualified supervision specific to nursing practice.** This distinction is essential for the following reasons:

**1. Clinical Expertise and Patient Safety**

Nursing practice includes performing assessments, developing care plans, and managing medical emergencies. These tasks require clinical expertise that can only be effectively evaluated and supervised by another registered nurse. An administrator or non-nursing supervisor may not have the medical knowledge necessary to provide meaningful oversight in these areas. Allowing registered nurses to supervise school nurses ensures that clinical practices align with the Oregon Nurse Practice Act (ORS 678.010).

**2. Clear Distinction Between Nursing and Administrative Functions**

HB 2948 clarifies the boundaries between clinical and non-clinical supervision. Administrators are vital to supporting the broader functions of a school nurse, such as scheduling and policy adherence. However, when it comes to decisions about patient care, only a registered nurse possesses the training to provide appropriate guidance and evaluation. This bill ensures that nurses are not placed in compromising situations where individuals evaluate their clinical judgment without a medical background.

**3. Support for Professional Growth and Accountability**

Registered nurses are uniquely qualified to mentor and guide other nurses in clinical settings, fostering professional growth while maintaining accountability. HB 2948 creates a structure that empowers school nurses to perform their duties effectively, knowing they are supported by peers who understand the profession's nuances.

#### 4. **Alignment with Best Practices in Healthcare**

Healthcare settings outside of schools consistently rely on registered nurses to supervise other nurses. Extending this standard to the school environment ensures that Oregon students receive high-quality nursing care and that the nurses providing this care are supported by appropriate clinical oversight.

#### **Personal Story:**

In my practice in the school setting it has been a struggle at times to help my supervisors and those higher up in administration to understand the detrimental and potentially fatal outcomes for students that are not being provided with the appropriate supportive care that needs to be provided. Some examples are:

The need for a 1:1 RN for cases that require airway support (tracheotomy/ventilator).

The requirement that the RN be provided delegatable delegated diabetic care aides in every school setting with students with Type 1 Diabetes who are willing and able to provide accurate and safe diabetic care.

The RN must be supported in their clinical decision as to whether or not the RN has determined if the aide can conduct these duties as trained or not and a subsequent aide must be provided if the aide is not deemed delegatable by the RN.

The RN to trust that the decision to delegate is theirs only under their license and that threat of job termination or penalties should not be implied should the RN refuse to delegate a UAP that is considered undelegatable.

The RN is considered a valuable voice amongst their supervisors when it comes to implementing health care, student safety decisions, and the implementation of policy and procedure.

In conclusion, HB 2948 provides critical safeguards for students and school nurses by ensuring clinical supervision is conducted by those with the appropriate training and expertise. I urge you to support this bill and help Oregon schools continue to provide safe, effective, and professional nursing care to our students.

Thank you for considering my testimony. I am happy to answer any questions or provide additional insights based on my experience.

#### **Respectfully,**

Angela McAllister BSN, RN  
Student Wellness/District Nurse
