House Committee On Revenue

Measure, Appointment or Topic:

HB3190

I write in strong favor for HB 3190. As a leader in the architecture, engineering, and construction world, I am speaking on behalf of the community to encourage more support for the heritage of our beloved designed spaces. As a resident of the city of Portland, I see our community of small, local businesses struggling with the complexities of keeping afloat while preserving community character. This bill would assist designers, builders, and community members alike to fall back in love with our city and see the support we give to keep them afloat and investing back in the community.
