

Submitter: Amelia Barton

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Dear House Committee on Climate, Energy, and Environment,

I'm a long-time environmentalist, having worked in the non-profit sector for major environmental group in Washington, DC. And, supported major environmentalist meetings including the President's Council on Sustainable Development, chaired by Al Gore. I helped in the creation of the Global Energy Model - studying energy resources out to 2050 - which was presented to Trilateral Commission members.

I support this bill.

It is too radical to move this quickly to renewable energy. We do not have the infrastructure to support a complete ban on diesel.

A diesel ban would bring commerce to a screeching halt, and threaten the food supply, and goods/services to Oregonians.

In addition, there is currently only one electric charging station in Oregon, and it is often out of service.

Please vote in support of HB 3119.

Thank you.
