

Submitter: Ciarra Larkin
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I've grown tired of hearing the word green and climate.

We want to stop diesel... but yet what? Use electric... which what requires cutting down forests to make room for what giant fans like the gorge that are far more toxic to the environment. Using electricity vehicles... that what? Charge on a charge using what? Electricity!

We have morons in the offices... please leave! Get on your bike and ride off into the sunset since using a vehicle is the an absolute worst thing in the world.

Literally hate the governments constant over reach, over spending of our tax dollars... for what? DEI bullshit and not real issues. You all suck! Hopefully Trump continues to halt federal money. Maybe then you people at the top would feel what regular people feel.

Pricks all of you!
