

Submitter: Chuck Worley

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Please delay and rework the Oregon Advanced Clean Truck Rules. This legislation will create lasting economic damage to Oregon businesses, self employed contractors, and the Oregon working families that rely on diesel powered trucks for their livelihood and daily life. Replacement technology does not currently exist at an affordable level for Oregon workers. Please register this testimony as support for SB3119.
