

Submitter: Michelle Garratt

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB718

I was diagnosed with young onset Parkinson's at 49 and my father has it too. I have been involved in 14 research studies to date. I feel very strongly about participation to end this disease. I believe a statewide registry would help not only in research and better understanding of how to treat this condition but also perhaps even get in front of it before it continues to affect other generations. That would be my wish and my goal. I am hopeful that you would agree and open up this registry and its information to better chances for others. I appreciate your time and your interest
