

Submitter: Kerry Backsen
On Behalf Of: HAYSTACK FARM AND FEED INC
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I strongly support the passage of this bill!! Oregon has once again put the 'cart before the horse' in implementing a rule that they 'haven't thought out' and provided the infrastructure that is required for the businesses to follow this rule!! There is only one 'charging station' for semi-trucks in the state. Semi-trucks, at this current date, don't get the range that is necessary for these vehicles to deliver products from the eastern part of the state to the western part of the state. The rule might look good in theory, but it isn't practical at this time! It will decimate a lot of businesses that are currently an integral part of Oregon's economy!
