

Submitter: Geena Barker

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2143

I am writing in to express my support for HB 2143 as a constituent in Astoria, Oregon. I have witness and experienced first hand the profound healing of pain and nervous system relaxation that the 5NP protocol can accomplish. In a time where public healthcare access is low and often non-existent, providing more options for people to manage pain, and relax their nervous systems is essential. This protocol is safe and affective, and should be made more widely available. Thank you for your time.
