

Submitter: Trish Backsen
On Behalf Of: Oregon Feed and Irrigation
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I strongly support the passage of this bill. Oregon's legislature in the past decade has made some really bad choices and decisions on policy and laws for our state!! This is definitely one of the worst! There isn't enough infrastructure that currently exists to implement this ruling. I think if it isn't reversed and some common sense doesn't happen, then all of the legislators, lobbyists, and other proponents shouldn't be able to have any deliveries to their houses or businesses! If the trucking industry shut down for 72 hours, it would wake everyone up and maybe prove how critical that our diesel-based industries are!!
