

Submitter: Dale Ott  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB3119

It makes no sense to implement a policy when there is not the necessary infrastructure in place to support such a drastic change to our supply chain. Even the technology of the trucks to be used for this is fledgling at best. The EV requirement does not take into consideration the far reaching cost increases to goods and services along every step of the supply and production chain. Every step! Every item we buy and service we require will cost a lot more.
