

Submitter: Tara Britt
On Behalf Of: Rare Disease Innovations Institute Inc
Committee: House Committee On Behavioral Health and Health
Care
Measure, Appointment or Topic: HB2457

I am Tara J. Britt and I co-founded the first RDAC with a patient advocate in the US. These RDAC's are vital for the rare and chronic patient population to give them a voice in their care and to also assist leaders with best practices on access to care. These councils are meant to be set up as clearinghouses to assist legislators with any future legislation submitted concerning rare or chronic diseases. Please make this happen for your great state!
