

Submitter: Larry Morrison

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

We've been a family owned Oregon business since 1947, started in Riddle, Or. hauling sawmill waste and rocking mill yards, loading gravel by hand. My dad hauled the ore samples off Nickel Mt in 1948, we evolved from a old GI 4 yard dumptruck too a fleet of trucks covering 11 western states.

We've experienced a lot of changes in the transportation industry. California has implemented regulations on truck emissions, without following the science behind climate change, in which California has changed, it's woke ideology, since there first attempt killed the vegetation along side the freeways, of course Oregon and Washington have to follow along the the idea that, if the government can tax an idea they can change the climate!!

The only thing this climate bill is going to do is cost jobs , raise prices on everything and is not change the 3-4 present of the carbon in the atmosphere man made.

The fires in California have released more hazardous chemicals into the atmosphere than trucks probably in the next hundred years. So please take in the real science of climate change, that you can't tax us to death for an idea that doesn't work, but raises tax money for greedy politicians.

Thanks for voice my opinion on HB 3119

L
