On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2143

Hi,

I am writing to support 5NP as someone who has ben fired from the use of acupuncture in both clinical and non clinical settings. It is important that communities have access to health care that is more accessible and community oriented. Things are rapidly changing within our government and giving more people access to health care services is imperative. I support community health work and so should you!
