

Submitter: Shawn Finnerty

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

This makes no sense to me. These electric vehicles have more of an environmental impact when being built than a combustion engine does in its lifetime. There is not enough power in the grid to support these vehicles. And how about the cost to buy one or what do you do with the toxic waste from the batteries when it's at the end of the battery life?
