Measure, Appointment or Topic: HB3119

I am glad to live in a state where we are making progress in cleaning up harmful diesel pollution from cars and trucks. Oregon's Clean Truck rule is critical for cleaning up dirty diesel pollution from big trucks, vans, and buses and protecting our health.

Please do not delay the implementation of Oregon's clean truck standards. I know that some truck makers don't like these rules. But our health and the health of our neighborhoods is negatively affected by these diesel trucks. We need to get rid of dirty diesel and invest in clean, zero emissions trucks ASAP.

Thank you.
