

Submitter: Cynthia Yee

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I oppose HB 3119. As a person with respiratory problems, I am very aware of the importance of clean air standards. Implementation of HB 3119 would place industry concerns over the health needs of Oregon citizens. Pushing back these standards is more important to industry than the lives of Oregonians who will die in that time from diesel pollution. The technology exists to mitigate diesel pollution. California has already imposed standards for mitigating diesel pollution.

Thank you for your consideration.
