Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

Hello,

I am writing with concerns about the possibility of a rollback of Advanced Clean Truck rules. I live in Linnton above highway 30 and diesel fumes are a big concern for me as I raise two kids. We are exposed to more and more environmental toxins every day so we need to be moving forward towards mitigating our risks, not backwards. Please think about the future and cleaner air is such an important part of that.

Thank you,
Erica Lurie
