On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Oregon needs to consider that practical implementation of the California rules our DEQ has blindly adopted is impossible.

We need leadership in this state that doesn't create their own crisis.

Suspend the DEQ's completely impractical rules that will cause economic harm and likely shortages of essential food and healthcare supplies when these ridiculous rules damage our supply chain.
