On Behalf Of:
Committee: House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic: HB2204

As an optometric physician practicing in Oregon, I ask for your support in the passage of HB 2204. The bill removes the requirement that optometric physicians have hospital consulting privileges in order to qualify for a rural tax credit.

Having practiced in Coastal Oregon (Lincoln City & Tillamook), I know that rural communities rely upon financial incentives, such as tax credits and student loan forgiveness, to compete with positions that are available in the urban and high population centers of the state.

As you already know, to function as intended, tax credits must be easily accessible. The requirement to have a hospital affiliation is an unnecessary barrier to many optometric physicians in rural communities. The credentialing process is arduous. It can take months or even years for small rural hospitals to establish criteria for new providers, and they often have little or no motivation to do so.

I strongly support expanding access to rural healthcare, and HB 2204 is a positive step forward. Thank you for your support!
