

Submitter: Susan Crabb
On Behalf Of: Oregonians
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

To fellow Oregonians We support this bill to stop the process of implementing clean truck regulations for the purpose that it would shut many farm and rural communities down as they already abide by using def in all diesels but to regulate even more would put such hardships on their livelihood. The soaring costs of equipment and the maintenance to keep it running good is at an all time high but to burden them with even more regulations will shut many down. Thank you for consideration.
