

Submitter: Jeff Knopf

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Oh, absolutely, let's rush into implementing HB 3119's Advanced Clean Trucks regulations right now, because clearly, Oregon is just brimming with electric truck technology. I mean, who needs practical, existing diesel trucks when we can have electric ones that cost twice as much and go half the distance? Brilliant! And let's not forget the joy of increased costs for everything from bread to milk because of these shiny new trucks. Oh, and the charging infrastructure? Abundant, especially in rural Oregon where there's just one supercharger, but hey, who's counting? Let's delay this until January 2027, because clearly, we need more time to appreciate the genius of this plan.
