

Submitter: Jason Nolin

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Diesel pollution is a massive problem for our state. The Portland metro region is in the worst 10% for air quality due to diesel emissions. We need to enact advanced clean truck legislation SOONER — not later — to protect our air and the health of Oregonians. Despite the trucking industry's misleading statements, the technology exists. We can make our air cleaner and safer. We MUST make it cleaner and safer for all Oregonians. Please oppose this bill.

Thank you.
