

Submitter: Nick Trowbridge

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB2961

The ban on Diesel Vehicles needs to be at least delayed. The technology to switch to electric options doesn't currently exist. And if it did exist our electric grid is not robust enough to support them. If you ban diesel vehicles right now it will effectively cripple our economy. Everything comes to you on a diesel truck. Don't kill our states ability to compete in the marketplace.
