

Submitter: Jason Hunton

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Dear House Committee members:

I oppose the current version of HB3119. It does not adequately consider the needs of the state Agriculture producers needs in rural areas using low annual mileage diesel vehicles such as seed trucks that are idle 10 months of the year but essential for 2 months of short-haul harvest use resulting in few miles. The replacement expense are literally insurmountable for family farms currently pressed with the Ag-Overtime laws and falling crop prices.

I'd be happy to discuss this more with any representative willing to hear me out on this.

Thank you for your time and attention.

Best regards
Jason Hunton
